# FHipo announces a normalized net income ${ }^{1}$ per CBFI of Ps. 0.484 

Mexico City, Mexico, April 30th, 2020 - Banco Invex, S.A., Institución de Banca Múltiple, Grupo Financiero Invex or Fideicomiso Hipotecario ("FHipo") (BMV: FHIPO14), announces the first quarter results as of March 31 ${ }^{\text {st }}, 2020$ ("1Q20"). The financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") and published on the Mexican Stock Exchange ("BMV").

## First Quarter 2020 Highlights

- Normalized net income ${ }^{1}$ per CBFI ${ }^{2}$, considering the 417.2 million outstanding CBFIs, reached Ps. 0.484 in 1Q20. This resulted in an estimated distribution ${ }^{3}$, subject to our current Distribution Policy, of Ps. 0.459 , an increase of Ps. 0.352 as compared to the Ps. 0.107 distributed in 4Q19.
- During 1Q20, FHipo successfully finalized the internalization of the Advisor and Manager. FHipo made the total payment for the internalization to the seller holders, who immediately after made the capitalization to FHipo through the subscription and payment of $50,000,000$ CBFIs, finalizing with 417,210,259 outstanding CBFIs.
- The financial margin adjusted for credit risks as of the first quarter of 2020, reached Ps. 231.5 million, a $1.5 \%$ increase compared to the Ps. 228.0 million in 1 Q 19 (" 1 Q 19 ").
- Normalized net income ${ }^{1}$, excluding the non-recurring expenses ("other expenses") related to the closing of the internalization of the Advisor and Manager process, reached Ps. 201.8 million during 1Q20. Net income for 1Q20 was mainly a result of: i) a non-recurring expense of Ps. 456.4 million related to the closing of the internalization process; ii) an increase in interest expenses driven by the hedge management of financial derivative instruments that FHipo owns, and, iii) the movements in the allowance for loan losses as the result of the portfolio's performance during the quarter.
- As of March $31^{\text {st }}, 2020$, our consolidated non-performing $\operatorname{loan}^{4}$ ("NPL") ratio represented $2.81 \%$ of FHipo's Consolidated Portfolio, an increase of 113 basis points compared to the same period of the previous year. As of the end of 1 Q20, we maintained a coverage on expected losses of $\sim 1.79 x$ (times).
- During the first quarter of the year, we generated savings in operational expenses of ~Ps. 39.0 million compared to 1Q19, driven mainly by the decrease in Advisory and Administrative expenses, as a result of the internalization of the Advisor and Manager.
- As of 1Q20, FHipo maintained an on balance debt-to-equity ratio ${ }^{5}$ of $1.63 x$ (times), a 5 bp improvement compared to the 1.68x (times) reported during the same period of last year.

[^0]- As of 1Q20, FHipo maintained an outstanding loan portfolio balance of Ps. 29.06 billion, considering the securitized portfolio and collection rights ("Consolidated Portfolio"), a $7.3 \%$ decrease from the Ps. 31.34 billion reported in 1Q19.
- FHipo's accumulated normalized return on equity ${ }^{6}(\text { ROE })^{6}$ as of 1 Q20, reached $8.5 \%$.

## Message from the Chief Executive Officer

Dear Investors,
I am pleased to share with you that, during the first quarter of 2020, even with the complex and challenging environment that Mexico and the world is facing, we have successfully finalized the internalization of our Advisor and Manager (the "internalization"), with the objective of optimizing FHipo's profitability.

The internalization seeks to better align our investors and the Advisor and Manager's incentives against possible volatile scenarios in the market. It also positions us to continue increasing the Company's equity profitability, as well as the income per CBFI (EPS).

During the first quarter of 2020, the changes driven by the internalization continued to materialize in FHipo's results, through quarterly savings of $\sim$ Ps. 39.0 million, reaffirming our efforts to maximize shareholder value and to continue aligning to their interests.

Additionally, during this first quarter of the year, we achieved a normalized net income ${ }^{7}$ per $\mathrm{CBFI}^{8}$ of Ps. 0.484 , which amounts to an estimated distribution, subject to the Current Distribution Policy, of Ps. 0.459. This represents an increase of Ps. 0.352 compared to the amount distributed during the last quarter of 2019, demonstrating once again FHipo's strength and stability in this challenging global environment.

I would like to reiterate that at FHipo we are taking all the preventive measures recommended by the health authorities against the current situation we are facing due to COVID-19 pandemic. Therefore, we are taking advantage of the systems and technology that we have built since the beginning of our operations; our interface allows us the remote access to all necessary systems to operate efficiently. This measure has been in place since March $17^{\text {th }}, 2020$, with the vast majority of FHipo's employees working remotely without impacting daily execution.

We stand in solidarity with our main mortgage portfolio manager and have adhered to the borrower's support measures in the face of the pandemic. These measures have been approved by INFONAVIT's Board of Directors, an institution with which we maintain close communication. We continue to analyze future measures that could be implemented in the borrowers' benefit, and that will strengthen the portfolio's performance in the medium term and the collection management under the current situation that Mexico faces.

Our outstanding mortgage portfolio reached a principal balance of Ps. 29.06 billion as of the first quarter of 2020, 7.3\% below the Ps. 31.34 billion reported in March 2019. The consolidated non-performing loan ratio for the quarter, reached $2.81 \%$, which represents a 113 bp growth, compared to the $1.68 \%$ reported during the first quarter of 2019.

In addition, during the first quarter of 2020, as a result of the recent approval of the Financial Derivative Operations Policy, we made adjustments to our interest rate hedging derivatives in order to improve the management of our hedges, which we expect will benefit FHipo's financial margin in the future.

I would like to end by mentioning that we will continue with a conservative strategy throughout the year, monitoring and analyzing new opportunities in order to maintain FHipo's strong financial position and to safeguard our investors' equity.

(1): The revenues consider the accrued interest of our on-balance portfolio, the indexation on the outstanding balance of our mortgage portfolio denominated in VSM, the interests of the collection rights on Fovissste's portfolio and the returns obtained from our liquid investments
(2): Excluding the expenses related to the culmination of the internalization of FHipo's Advisor and Manager process.
(3): Considers the outstanding CBFIs as of to date.

Interest Income increased by Ps. 20.2 million in 1Q20, amounting to Ps. 678.8 million, compared to Ps. 658.7 million reported in 1Q19; this increase was primarily due to the origination of mortgage loans at a higher interest rate (11.9\%) this year.

Interest Expense in 1Q20 was Ps. 637.3 million, an increase in comparison to the Ps. 407.4 million reported during 1Q19. This was mainly due to expenses related to certain adjustments made to our interest rate hedges as a result of our recent financial derivatives policy and, with the objective to improve the interest cost of our liabilities in the future.

The Financial Margin reached Ps. 41.5 million in 1Q20, a decrease compared to the Ps. 251.3 million as of the 1Q19; this decrease was mainly driven by a higher interest expense from FHipo's administration of financial derivative instruments.

Allowance for Loan Losses represented an income of Ps. 190.0 million in 1Q20. This positive result is driven by the portfolio's performance during the quarter. FHipo estimates its allowance for loan losses based on its expected loss methodology. The allowance for loan losses registered on the Balance Sheet as of March 31 ${ }^{\text {st }}, 2020$, was Ps. 395.1 million, which represents $1.9 \%$ of our on-balance portfolio.

The Valuation of Receivable Benefits in Securitization Transactions is determined based on the fair value of the equity residuals of our securitizations, which are calculated based on an income approach. This generated a profit of Ps. 56.2 million during 1Q20, a fall compared to 1Q19. This was mainly due to the natural seasoning of our portfolio and the effect of increased NPLs on the valuation of receivable benefits. As of today, we maintain four fiduciary equity residuals: CDVITOT 13U, CDVITOT 14U, CDVITOT 15U and FHIPOCB 17U.

Total Revenues reached Ps. 735.0 million during 1Q20, a decrease of Ps. 32.2 million compared to the same period of the previous year.

Advisory, Administration and Servicing Expenses, which include the advisory, administration and collection services received from Infonavit and our Advisor and Manager during the quarter, were Ps. 85.9 million, a decrease of $31.2 \%$ ( $\sim$ Ps. 39.0 million) compared to 1 Q19. This decrease was mainly driven by savings related to the internalization process.

Normalized Net Income ${ }^{1}$ reached Ps. 201.8 million in 1Q20. Normalized net income ${ }^{1}$ per CBFI reached Ps. 0.484, resulting in an estimated distribution, subject to our Current Distribution Policy of Ps. 0.459 , Ps. 0.352 above the distribution paid for 4Q19.

The following charts show the variation of our distribution per CBFI quarter over quarter, as well as the development of the allowance for loan losses compared to our on-balance mortgage portfolio.

| LIABILITIES AND EQUITY |  |  |  |  |
| Accounts payable and accrued expenses | \$142,614 | \$221,428 | $(\$ 78,814)$ | (35.6\%) |
| Notes/securities payable and borrowings | 16,526,477 | 17,764,419 | $(1,237,942)$ | (14.5\%) |
| Derivative financial instruments | 193,238 | 190,293 | 2,945 | 1.5\% |
| TOTAL LIABILITIES | 16,862,329 | 18,176,140 | $(1,313,811)$ | (7.2\%) |
| TOTAL EQUITY | 10,154,500 | 10,492,880 | $(338,380)$ | (3.2\%) |
| TOTAL LIABILITIES AND EQUITY | \$27,016,829 | \$28,669,020 | $(\$ 1,652,191)$ | (5.8\%) |

Total Assets as of March $31^{\text {st }}, 2020$ were Ps. 27.02 billion, a decrease of $5.8 \%$ compared to $1 Q 19$. This decline is mainly related to a decrease in the mortgage portfolio given the natural amortization process, and to a sale of rights on a portfolio during 4Q19; as well as to the reduction in the active valuation of financial derivatives and the decrease of receivable benefits in securitization transactions.

The On-balance Loan Portfolio as of 1Q20 is composed of 58,465 loans, with an outstanding principal balance of Ps. 21.20 billion, a decrease of $5.6 \%$, as compared to the Ps. 22.46 billion reported in 1Q19.

As of 1Q20, the total mortgage portfolio including the accrued interest receivable and the indexation of times minimum wage ("VSM"), reached Ps. 21.59 billion, which, considering the allowance for loan losses of Ps. 395.1 million, results in a net mortgage portfolio for 1Q20 of Ps. 21.20 billion.

Receivable Benefits in Securitization Transactions of the equity residuals, as of 1Q20 amounted to Ps. 2.57 billion, a decrease of $14.0 \%$ compared to the Ps. 2.99 billion registered in 1Q19. This decline is mainly due to the natural amortization process of these structures, the collection of the residuals, and the effect of the increase in nonperforming loans. In accordance with the IFRS, the fiduciary rights are valued at fair value.

The Active Position of Financial Derivative Instruments as of 1Q20, decreased compared to 1Q19, this contraction was primarily driven by the term of our derivatives and the variation in the local interest rate curve during the quarter. The derivatives are valued at fair value as of the end of each quarter.

FHipo's Consolidated Portfolio as of 1Q20, considering both the portfolio and the collection rights of securitization transactions, consists of 102,675 loans for a total value of Ps. 29.06 billion, considering its outstanding portfolio balance. This excludes accrued interest and indexation on loans denominated in times minimum wage ("VSM"), and resulted in a $1.8 \%$ decrease compared to the Ps. 29.61 billion as of 4Q19.

## Summary - Consolidated Mortgage Portfolio ${ }^{\circ}$

| Portfolio Balance (millions) | No. of Loans | Infonavit Total Pesos | Infonavit Total VSM | Infonavit Más Crédito ${ }^{10}$ | Fovissste VSM | Smart Lending ${ }^{11}$ | Non-Performing Portfolio |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Ps. 29,061 | 102,675 | 12.00\% | 9.49\% (real) | 10.94\% | 5.36\% (real) | 13.47\% | 2.81\% |

The Non-Performing Portfolio in consolidated terms represents $2.81 \%$ of the Consolidated Portfolio. This increase compared to the same period of the previous year, is mainly a result of the portfolio's performance and to the natural seasoning of our portfolio.

At a balance sheet level, FHipo's non-performing loans, including overdue interest, represents Ps. 428.1 million.
Allowance for Loan Losses ${ }^{12}$ reached Ps. 395.1 million as of 1 Q20, an increase of Ps. 37.0 million compared to 1 Q19. This was largely due to portfolio that has fallen into non-performing status, for which the allowance created corresponds to the expected loss during the remaining life of each loan. The accumulated allowance for loan losses results in an expected loss coverage was 1.79 x (times).

Stable Levels of NPLs with Conservative Allowance for Loan Losses*

(1) Considers weighted average loss given default (LGD) of FHipo's consolidated portfolio of $50.93 \%$, consolidated NPL's of Ps. 816.7 million. * Based on outstanding principal balance for NPL's and consolidated portfolio.

Other Receivables as of 1Q20 were Ps. 609.5 million, a decrease of Ps. 31.0 million compared to 1Q19. Other receivables registered up to March $31^{\text {st }}, 2020$ mainly consist of the effective collections made by Infonavit which have not yet been transferred to FHipo.

Total Liabilities as of 1Q20 amounted to Ps. 16.86 billion, a decrease compared to the Ps. 18.18 billion as of 1Q19, mainly due to a lower debt balance as a result of the execution of our leverage strategy.

Notes/Securities Payable and Borrowings were Ps. 16.53 billion as of 1Q20, representing a decrease of Ps. 1.24 billion compared to 1Q19. This decrease was largely due to the administration of the leverage levels, which resulted in a decrease of Ps. 650.0 million in banking loans and at maturity of short-term debt of Ps. 430.0 million.

The Passive Position of Financial Derivative Instruments as of 1 Q20 reached Ps. 193.2 million, an increase of Ps. 2.9 million compared to 1Q19. This increase was primarily driven by the term of our derivatives and the variation in the local interest rate curve during the quarter. The derivatives are valued at fair value as of the end of each quarter.

Development of our Leverage Strategy (on and off-Balance)

Note: Debt considers outstanding principal balance of financing.
(1) $2.19 x$ (times) Debt-to-equity, considering on and off balance leverage.

Total Equity amounted to Ps. 10.15 billion, a $3.2 \%$ decrease in comparison with the same period of the previous year. This was mainly due to the increase in the passive position of the financial derivative instruments mentioned above, the non-recurring expenses related to the culmination of the internalization of the Advisor and Manager process and the subscription of the internalization's CBFIs. Total Equity consists of the amount obtained from our Global Equity Offerings, net of issuance costs and accumulated earnings and other comprehensive income, minus acquisitions of CBFIs and distributions paid to investors.

## About FHipo

FHipo is the first real estate investment trust established to acquire, originate, co-participate, and manage mainly mortgage portfolios, that allows the general public to invest in residential mortgage portfolios, providing capital gains linked to mortgage returns and contributing to the financing and development of the housing sector in Mexico. Our portfolio is composed of residential mortgages in Mexico with an attractive risk-reward ratio. The current portfolio uses Infonavit's origination and servicing platform, allowing access for collection through payroll deduction, serving as a primary servicer of mortgage portfolios. In addition CH Asset Management, FHipo's subsidiary, has developed a proprietary technological platform. Through FHipo, investors can access the residential mortgage market in Mexico and benefit from the liquidity of an instrument listed on the BMV.
