COVID-19: How is Rotoplas helping?

Grupo Rotoplas S.A.B. de C.V. (BMV: AGUA) ("Rotoplas" or "the Company"), the leading water solutions company in the Americas, shares the steps it is taking to support employees, clients, suppliers and the communities in which it operates during the COVID-19 pandemic and the related economic shutdowns.

At the corporate level, the large majority of staff continue to work remotely, in order to safeguard their health and well-being and that of their families. At the manufacturing & field service level, our operations are fully operational given they are considered essential activities except from Perú, El Salvador and Honduras.

For the health and safety of our people who continue to work in situ, we follow strict international health protocols, including thorough cleaning and sanitation of facilities, medical tests when necessary, reduction in staff per shift, and appropriate distancing, among other measures as recommended by the WHO.

Likewise, we have reactivated the "Water Program for Affected Areas" which was very effective in aiding the crisis caused by the earthquakes in Mexico in 2017, refocusing its purpose to this new sanitary emergency under the name "PAZA C-19", *Programa de Agua para Zonas Afectadas por COVID-19* or Water Program for Affected Areas due to COVID-19.

As access to clean water, regular handwashing and staying hydrated are one of the most effective measures to reduce or combat the COVID-19, Rotoplas is working hand-in-hand with government institutions, civil society organizations and NGOs to collaborate in social programs to enable handwashing stations, provide storage capacity for clean water and grant purified water dispensers, with special focus on hospitals and vulnerable groups.

For this purpose, Rotoplas has donated, as of this date, 402 water storage products to help stock water supplied by water trucks in vulnerable areas of Mexico, it has installed 1,000 hand washing stations in public spaces, and to address the emergency in hospitals, Rotoplas has donated Bebbia purification units including one year of service.

Rotoplas is ready to support all our stakeholders in this complex time. We believe is a time to stand together and to remain loyal to our purpose of helping people to have more and better water.
