COVID-19 Update

Rotoplas operations status update during August

Grupo Rotoplas, S.A.B. de C.V. (BMV: AGUA*) ("Rotoplas" or "The Company"), the leading provider of water-related products and services in the Americas, communicates the update on the status of its operations during August 2020.

Country or Region	Manufacturing plant and/or distribution center
Mexico	Continuous operations
Argentina	Continuous operation. The successful migration of the Kalypso system to SAP was achieved at the beginning of the month at the water flow plant. With this, 100% of Rotoplas' operations are now operating under SAP.
United States	Continuous operations
Peru	Continuous operations
Central America	The plant in Guatemala and the distribution centers in El Salvador, Honduras and Nicaragua operated continuously. The distribution center in Costa Rica was closed for 14 days.

The administrative staff continues to work remotely without setbacks. Rotoplas adheres to the strictest health and safety protocols to protect the personnel in plant operations and field services. All activities with members of the various stakeholders continue to be conducted digitally and efforts are being made to increase their productivity.

Rotoplas, in collaboration with Cántaro Azul, our strategic ally in innovation and co-creation of products with a social impact around the growing problem of water, published a manual for the construction of hand washing stations to address the health crisis. With this guide, we seek to offer a replicable and accessible alternative to the current needs of hygiene and public health, collaborating to prevent the spread of the pandemic due to the lack of hygiene infrastructure in public spaces. The manual can be consulted in the following link (**currently available in Spanish**):
