

Mexico City, September 28th, 2023.

Grupo Rotoplas has been recognized for the second consecutive year with the HSBC Sustainable Innovation Leading Companies Award.

Grupo Rotoplas S.A.B. de C.V. ("Rotoplas", "the Company" or "the Group") (BMV: AGUA*), the leading provider of water-solutions in the Americas, announces that, following a call that received more than 450 registered sustainability strategies, Grupo Rotoplas was chosen, for the second consecutive year since the inception of the award, as a Leading Company in Sustainable Innovation. This year, the recognition falls within the Social category for companies with total revenues exceeding 5 billion Mexican pesos by the end of 2022.

HSBC, in collaboration with EY and an independent panel of judges, recognized the importance of the social pillar in Rotoplas' Sustainability Strategy, based on conscious capitalism. This strategy places equal importance on the pillars of people, planet, and profit and focuses on four lines of action: Institutionalization and governance in sustainability, Collaborative innovation with purpose, Driving socio-economic development, and Safeguarding water as a future resource.

Selection criteria included projects where companies generate initiatives that promote decent work, inclusive communities, and resilience in the face of market challenges. This includes employing vulnerable groups, wage equity, parental support, training, and social protection. This robust approach reinforces Rotoplas' commitment to sustainability and the well-being of its employees and communities.

We reaffirm our commitment to all our stakeholders, creating 360° value, with a focus on generating positive impacts on our teams, the communities where we operate, and society at large."
