Rotoplas has obtained validation of its emission reduction targets from the SBTi

Grupo Rotoplas, S.A.B. de C.V. (BMV: AGUA*) ("Rotoplas" or "The Company"), leader in water management solutions in the Americas, announces that its greenhouse gas (GHG) emission reduction targets have been validated by the Science Based Targets initiative (SBTi). This endorsement affirms that Rotoplas' objectives align with the 1.5°C trajectory, the most ambitious goal outlined in the Paris Agreement, and represents the highest recognition available through the SBTi process.

The SBTi, a collaboration between CDP, the United Nations Global Compact, the World Resources Institute (WRI), and the World Wildlife Fund (WWF), defines and promotes best practices in science-based target setting and independently assesses corporate targets. With this validation, Rotoplas solidifies its leadership and commitment to climate action.

This milestone further strengthens our strategy of embedding sustainability at the core of our operations, driving long-term value creation for our investors and society.
