QUALITAS REPORTS 2Q26 RESULTS

Mexico City, July 21st, 2026 – Quálitas Controladora, S.A.B. de C.V. ("Quálitas", "Q", or "the company") (BMV: Q*), announces its unaudited financial results for the second quarter 2026.

Figures in this document are stated in millions of Mexican pesos except when otherwise indicated and many vary due to rounding and/or consolidation.

HIGLIGHTS:

- During the second quarter of the year, written premiums closed at $17,329 million, being -0.5% down versus same period of last year; on a year-to-date basis, written premiums reached $39,022 million, representing growth of +7.7% compared with the first six months of 2025. Quarterly results were impacted by a one-time effect resulting from a shift of coverage in one of our largest multi-annual accounts, excluding that, written premiums were up +3.4% in the quarter or +9.5% year to date.

- The second quarter of the year closed with +6.1 million insured units, increasing by +119 thousand units vs 2Q25, and ~50 thousand units vs the previous quarter. Despite aggressive pricing competition that affected overall top line, Qualitas was able to still increase insured units.

- Quarterly earned premiums increased by +4.4% versus 2Q25, reaching $17,392. Reserves totaling $322 million were released during the second quarter, representing a variance of +$1,052 million compared to the second quarter of 2025, in line with issuance performance and the portfolio mix. In a YTD basis Qualitas has constituted $2,563 million in Reserves.

- Quarterly loss ratio stood at 64.8% and at 63.7% for the first six months of the year, remaining within our long-term target range. Claim frequency has remained stable and even below the level we had in the second quarter of 2025. At our Mexican subsidiary, the loss ratio stood at 63.9% for the quarter and 62.5% on a year-to-date basis. These results already consider the early start of the rainy season, as well as the increase in average claims costs driven by the changes in the VAT regulation.

- The quarterly combined ratio was 95.7%, and 92.8% at the close of the first half of the year. Considering only the subsidiary in Mexico, the quarterly combined ratio closed at 93.8%, and at 90.7% on a year-to-date basis; both figures were below the target range.

- Quarterly and half year comprehensive financial income totaled $1,161 million and $2,337 million, respectively. The investment portfolio reached a quarterly and year-to-date ROI of 7.4%. As of the end of the period, the investment portfolio totaled $53,430 million, with 85.7% invested in fixed income with a duration of 2.6 years.

- Quarterly net result stood at $1,389 million, reflecting a -1.3% decrease compared to 2Q25. On the other hand, net result for the first six months of the year was $2,944 million. 12M ROE stood at 18.3%, reflecting the full year one time VAT impact recognized during Q4 of last year. The ROE for the period stood at 21.4%. Despite headwinds, we continue to be committed to a long term ROE of close or above 20%, including this 2026.

- By quarter-end, the company held ~6.2 million shares in treasury, with a remaining balance of $784 million in the share buyback fund.

- Required regulatory capital stood at $6,646 million, with a solvency margin of $15,984 million, equivalent to a solvency ratio of 341%.

Foreign subsidiaries	833	931	(10.5%)	1,742	1,918	(9.2%)
Total	**17,329**	**17,414**	**(0.5%)**	**39,022**	**36,236**	**7.7%**

Written premiums by foreign subsidiaries may include differences due to the exchange rate effect.

During the second quarter of 2026, written premiums totaled $17,329 million, representing a marginal 0.5% decline compared with the same period of the previous year. On a year-to-date basis, written premiums reached $39,022 million, equivalent to growth of 7.7% compared with the first six months of 2025. During the quarter, results were affected by a one-time event related to a shift in the coverage of one of our largest multiannual accounts. Excluding this effect, written premiums growth would have been 3.4% and year to date would have stood at 9.5%.

Performance in the traditional segment, which accounts for ~63% of total premiums, posted a decline of 3.2% in the quarter, while showing an increase of 5.5% growth year to date. Whitin this segment, individual business grew +2.5% for the quarter and +3.1% year-to-date; while fleets decreased 12.4% in the quarter and grew 8.9% year to date. The referred one-timer came into the fleet business, which would have grown mid-single digit if normalized.

Lastly, the financial institution's segment, representing about ~32% of the total business, reported a +5.9% growth for the quarter and a +15.4% for the first half of the year. The growth within this segment was also affected by the competitive environment in specific brands and models with some financial institutions.

In terms of written premiums, as reported, the international subsidiaries contributed ~5% of total written premiums year to date, with LATAM strong growth being partially offset by the US operation decline.

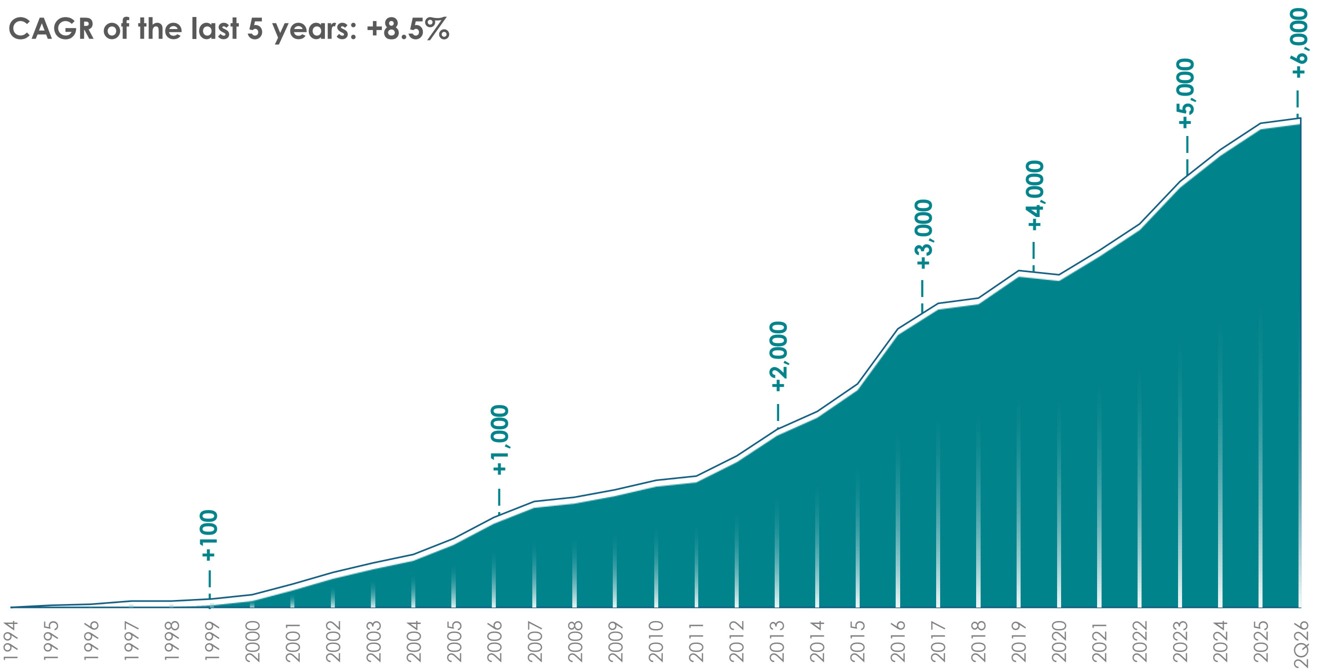
It is important to highlight that foreign exchange movements have had a particular impact during 2026, primarily due to the depreciation of the U.S. dollar; for example, Quálitas Costa Rica reported growth of 12.4% for the quarter and 14.9% year to date, while Quálitas Peru grew 12.3% and 10.0%, respectively. Excluding the FX effect, growth would have reached 23.5% for Costa Rica and 24.1% for Peru during the quarter, and 30.9% and 25.3%, respectively, on a year-to-date basis, all measured in U.S. dollar terms.

INSURED UNITS

During the second quarter of 2026, the insured units historical record was again surpassed, closing the quarter with 6.1 million. This represents an increase of +119 thousand units (or +2.0%) compared to the previous year, and ~50 thousand units (or ~1%) compared to the close of the previous quarter, maintaining a solid CAGR of +8.5% over the last five years.

6,143,717 insured units

CAGR of the last 5 years: +8.5%



Sales of light vehicles grew by +7.1% during the quarter compared to 2Q25, with a total of 372,868 thousand units sold; while sales of heavy equipment units increased by +8.2% compared to 2Q25. This resulted in a +7.1% increase in total new units sold during 2Q26.

Insured units are distributed as follows:

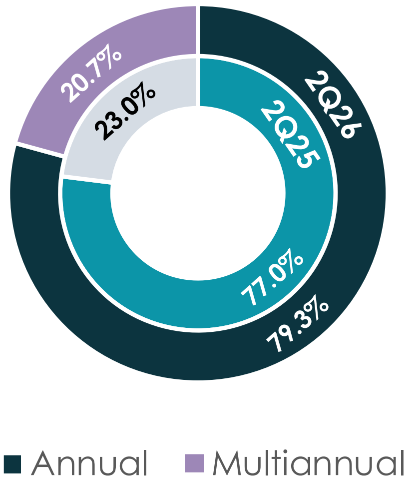
Insured units	2Q26	1Q26	Δ%	2Q25	Δ%
Mexico	5,801	5,769	0.6%	5,751	0.9%
Automobiles	*3,982*	*3,969*	*0.3%*	*3,904*	*2.0%*
Trucks	*1,515*	*1,505*	*0.7%*	*1,456*	*4.1%*
Motorcycles	*304*	*294*	*3.5%*	*391*	*(22.1%)*
El Salvador	48	48	0.7%	46	5.2%
Costa Rica	158	154	2.9%	134	17.7%
United States	18	19	(5.4%)	24	(23.9%)
Peru	93	88	5.2%	69	35.3%
Colombia	26	17	54.0%	2	NA
Total	**6,144**	**6,094**	**0.8%**	**6,024**	**2.0%**

*Motorcycles include motorcycles and foreign RC
Foreign and cross-border vehicles are classified in their respective segment (automobiles and trucks)

EARNED PREMIUMS

During the second quarter, earned premiums closed at $17,392 million, representing an increase of +4.4% vs. 2Q25. On the other hand, earned premiums for the first six months of the year closed at $36,192 million, reflecting +8.0% growth.

During the quarter, earned premiums grew at a faster pace than written premiums, driven by both, the deceleration seen in written premiums and a shift in the portfolio's multi-year premium mix, which fell from 23.0% in 2Q25 to 20.7% in 2Q26.



AQUISITION COST

Acquisition cost closed the quarter at $4,289 million, with an acquisition ratio of 25.1%, 1.0 pp above 2Q25. This ratio is slightly above the historical and target range, mainly due to portfolio mix and, by stronger growth in the financial institutions segment, which carries higher commissions.

Furthermore, it is noteworthy to highlight that there have been no changes in the commissions paid to agents and/or financial institutions, and that they are related to sales volume; and in the case of agents, they are also related to the profitability of their portfolios.

LOSS COST

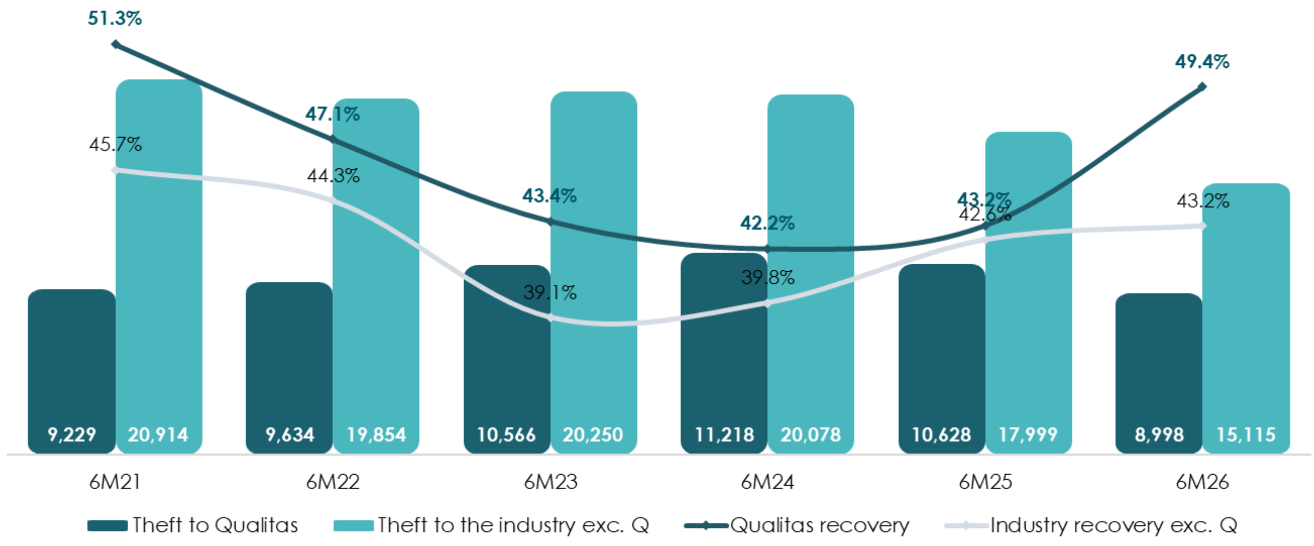
The quarterly cost and loss ratio were $11,272 million and 64.8%, respectively. This reflects a 1.7 pp increase compared to the same period of the previous year which already considers the early start of the rainy season, as well as the rise in the average cost of claims resulting from the impact of VAT regulations. On a year-to-date basis, the cost figure stood at $23,047 million, with a ratio of 63.7%, standing at the mid-point of our 62%-65% target range.

As anticipated earlier this year, we estimated a higher loss ratio for this quarter, consistent with historical seasonal trends. Despite the rise in the ratio, the absolute cost of claims increased by only 7.2%, reflecting the company's efforts to contain the average cost of claims and the stabilization of claim frequency, which closed at 6.6%, 23 bp below the frequency recorded in the second quarter of 2025. At the close of the first half of 2026, the impact of VAT accounted for 320 bp of the loss ratio.

For our main subsidiary in Mexico, the loss ratio stood at 63.9% for the quarter and 62.5% on a year-to-date basis, representing increases of 3.5 and 3.2 percentage points, respectively, compared with the same periods of the previous year, while remaining within our sustainable target range of 62% to 65%. This performance primarily reflects the successful implementation of initiatives launched toward the end of 2025, including strict cost-control measures and operating efficiencies generated through our vertical integration.

Additionally, theft of insured vehicles in Mexico decreased by 15.3% for Quálitas and 16.0% for the rest of the industry. Quálitas recovered 49.4% of stolen vehicles during 6M26, significantly outperforming the 43.2% recovery rate reported by the rest of the industry, underscoring the effectiveness of its vehicle tracking and recovery processes. Theft-related claims represented approximately ~11% of the company's total claims cost, improving from 13.6% in 2Q25. This resulted in a quarterly claims frequency of 6.6%, below that observed in the second quarter of 2025.

General inflation in Mexico continues its stabilization trend, closing the quarter at 3.4%, while core inflation stood at 4.0%. Meanwhile, inflation in auto parts, spare parts, and labor stood at 3.6%.



OPERATING EXPENSES

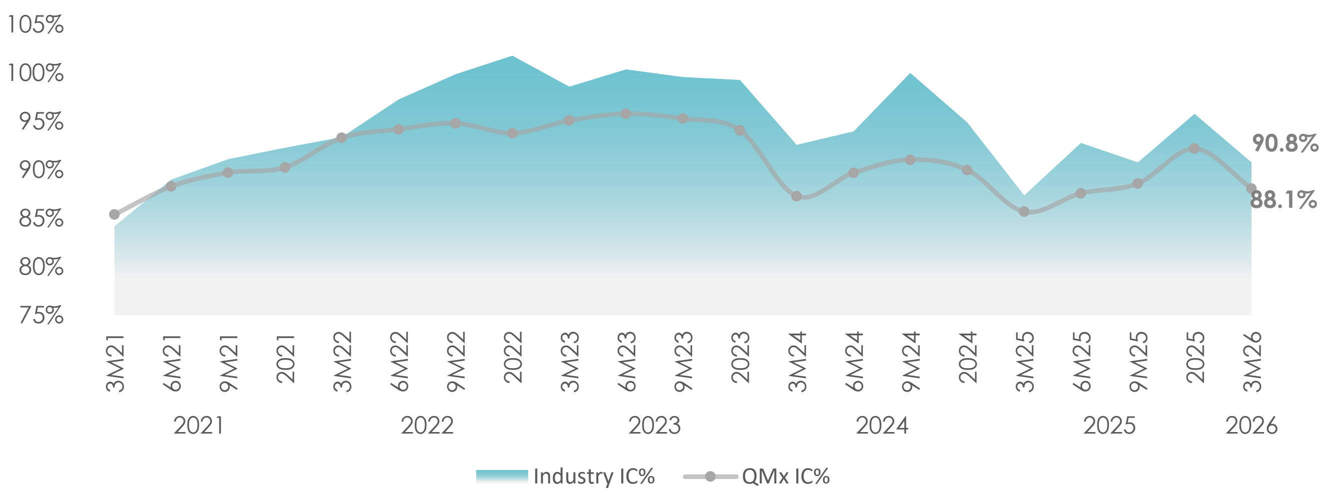
Operating expenses for the quarter and the year-to-date stood at $1,007 million and $2,095 million, with an operating ratio of 5.8% and 5.4%, respectively. The quarterly ratio increase was also influenced by the deceleration in written premiums, as a lower top-line base naturally puts additional pressure on the ratio.

By regulation, the PTU provision is included within operating expenses. Excluding the effect of this provision, the operating ratio would have closed the quarter at 5.0% and 4.4% for the semester.

UNDERWRITING RESULT

For the second quarter of 2026, the company reported an operating profit of $825 million with an operating margin of 4.7%. The combined ratio for the quarter stood at 95.7%, representing an increase of 2.9 pp compared to 2Q25. On a cumulative basis, profit stood at $1,863 million, with a margin of 5.1% and a combined ratio of 92.7%, consistent to our 92% to 94% full year target.

Combined ratio – Mexico



Source: AMIS, Market share in Mexico as of March 2026.

According to the latest figures available from AMIS, as of March 2026, the Mexican auto insurance industry, excluding Quálitas Mexico, reported a combined ratio of 92.0%; highlighting Quálitas with a ratio of 88.1%, 3.9 pp lower than the rest of the industry.

COMPREHENSIVE FINANCIAL INCOME

During 2Q26, the referential interest rate in Mexico gradually decreased, closing at 6.5% compared to 8.0% in 2Q25. The average quarterly rate for 28-day CETES stood at 6.3%. While the drop in benchmark rates has moderated our portfolio's reinvestment yield, the Investment Committee has maintained a prudent and disciplined strategy, selectively capitalizing on opportunities arising from market volatility in recent months. During those periods, we successfully added instruments with attractive yields and extended our portfolio's duration at the long end of the curve, while keeping it within the ranges we have been targeting. In the case of Mexico portfolio, a yield to maturity of 8.9% was achieved, where reference rate is at 6.5%.

As of the end of June, 85.7% of the portfolio was invested in fixed-income securities and the remaining 14.3% in equities, with a duration of 2.6 years. Additionally, ~20% of the total portfolio is geographically distributed to meet the capital requirements of our international subsidiaries.

On the other hand, the equity portion of our portfolio demonstrated resilient performance during the first half of the year. Despite volatility observed in the first quarter, the S&P 500 posted a year-to-date return of 9.6%, fostering a more favorable investment environment heading into the second half of the year.

Quarterly comprehensive financial income closed at $1,161 million, while the year-to-date figure stood at $2,337 million. The investment portfolio achieved a quarterly and first half ROI of 7.4%. It is worth noting that accumulated unrealized gains amount ~$2.4 billion. If all positions were valued at market price, the ROI would have been 13.6% by June-end 2026.

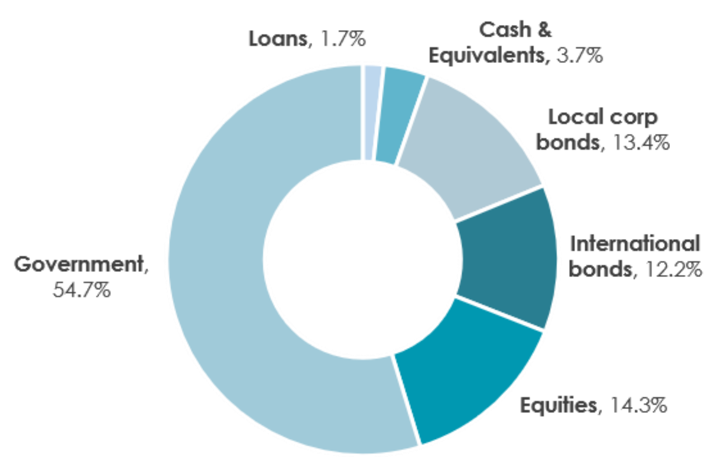
➔ Total

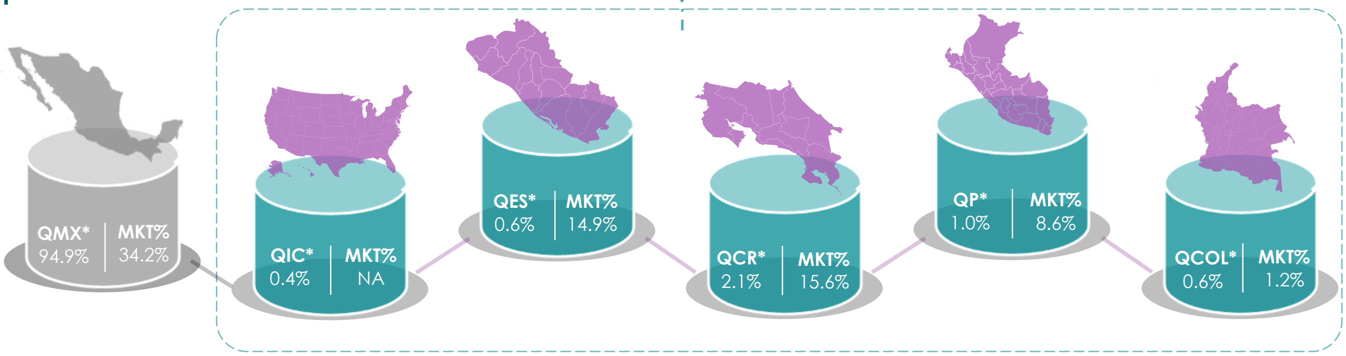


NET INCOME

Quarterly net income reached $1,389 million, representing a decrease of -1.3%, or $17.9 million. On a year-to-date basis, net income closed at $2,944 million, down -17.1% compared with the first half of the previous year. The tax rate for the quarter was 30.1%. Additionally, we reported a quarterly net margin of 8.0%. The 12-month ROE stood at 18.3% and the ROE for the period stood at 21.4%.

SUBSIDIARIES AS OF 2Q26

International subsidiaries (geographic) **represented 4.8% of the Holding Company's total quarterly written premiums:**



* Percentage as a proportion of quarterly written premium by Quálitas Controladora

The table below shows the performance in written premiums and sales of our subsidiaries:

Written Premium	2Q26	2Q25	Δ %	6M26	6M25	Δ %
Q ES	112	109	3.1%	220	231	(4.8%)
Q CR	371	330	12.4%	852	741	14.9%
Q IC	63	319	(80.3%)	129	605	(78.8%)
Q P	176	157	12.3%	353	321	10.0%
Q Col	111	16	NA	188	19	NA
Vertical*	456	415	9.8%	839	854	(1.7%)
Total	**1,289**	**1,346**	**(4.2%)**	**2,581**	**2,771**	**(6.9%)**

**Excludes intercompany operations and includes QSalud, Autos y Salvamentos, O&T, Activos Jal, DCT, Flekk, as well as Roto Cristales y Partes. Figures for prior periods may vary due to exchange rate fluctuations or consolidation.*

International subsidiaries had written premiums of $833 million for 2Q26, a decrease of -10.5% vs. 2Q25. On a year-to-date basis, subsidiaries reported $1,742 million, with a decrease of- 9.2%,

Across LATAM, as reported, written premiums increased by 26%, reaching $770 million. Important to highlight that the exchange rate has had a particular impact during 2026 mainly due to the depreciation of US dollars. Excluding this effect, growth would have been approximately +38.8% for the quarter and +40.1% for the semester in US dollars.

In Colombia, we currently have 20 active offices, well on track to meet our full-year target of 25. These offices have generated US $11.4 million in written premiums, significantly exceeding our initial projections.

Additionally, our U.S. subsidiary continues its downward trend, decreasing -80.3% on a quarterly basis, and -78.8% year-to-date, derived from the closing of cross-border business, consistent expectations as we focus only on the PPA and Bi-national Certificates.

Altogether, our international and vertical subsidiaries reported premiums and sales of $1,289 million during 2Q26, a quarterly decrease of -4.2% compared to 2Q25. As of June, they reported $2,581 million, -6.9% below the first half of 2025.

TECHNICAL RESERVES

During the second quarter of 2026, the company released reserves for $322 million, driven by the slowdown in the company's written premiums. This represents $1,052 million less than in 2Q25. For the first six months of the year, we constituted reserves of $2,563 million, equivalent to $60.1 million less than the first semester of 2025.

The company's technical reserves stood at $69,240 million as of June-end 2026, an increase of $7,714 million compared to the same period of the previous year, related to the growth in written premiums and the portfolio mix observed over the past year.

SOLVENCY

The regulatory capital requirement stood at $6,646 million by June-end, with a $15,984 million solvency margin, equivalent to a solvency ratio of 341%.

Our capital allocation strategy will continue to focus on: 1) strengthening our leadership in Mexico, 2) accelerating the growth of our subsidiaries, and 3) expanding our service to new business lines within the insurance ecosystem.
