CFE Fibra E Announces Advance Distribution to Holders of Series A Certificates

Mexico City, November 11, 2026. CFE Fibra E hereby informs the investing public that, in connection with the potential follow-on offering announced on November 9, and with the objective of ensuring that cash distributions are not affected by the increase in the number of Certificados Bursátiles Fiduciarios de Inversión en Energía e Infraestructura (CBFEs) resulting from the offering, thereby preserving the economic interests of its existing holders, it has determined to make an advance distribution to holders of Series A CBFEs in an amount equivalent to the Minimum Quarterly Distribution (MQD)[1], consistent with the cash flow generated during September, October, and the first half of November 2026, after ensuring that sufficient resources are available to meet all of CFE Fibra E's obligations.

The payment of this distribution is expected to be made on **November 19, 2026**, while the payment corresponding to the ordinary distribution of cash flows generated during the second half of November, taking into account the effects of the offering, is scheduled for **December 31, 2026**.

Through this measure, CFE Fibra E seeks to maintain appropriate economic fairness among its investors, ensuring that the benefits derived from cash flows generated by the electricity transmission sector are distributed to holders in accordance with their respective holding periods.

CFE Fibra E reiterates its commitment to protecting its investors' interests, prudently managing its resources, and generating long-term value for its holders.

[1] The Minimum Quarterly Distribution (MQD) amounts to MXN 490.6 million.
