If the terms of the Programme are modified or amended in a manner which would make the Prospectus, as supplemented, inaccurate or misleading, a new or supplement to the Prospectus will be prepared.

### **Undertaking referring to the Luxembourg Stock Exchange**

Each of the Issuers and the Guarantor has undertaken, in connection with the listing of Notes on the regulated market of the Luxembourg Stock Exchange, that if, while Notes are outstanding and listed on the regulated market of the Luxembourg Stock Exchange, there shall occur any material adverse change in the business, financial position or otherwise of any of the Issuers or the Guarantor, as the case may be, that is material in the context of issuance under the Programme which is not reflected in this Prospectus (or any of the documents incorporated by reference in this Prospectus), it will prepare or procure the preparation of an amendment or supplement to this Prospectus or, as the case may be, publish a new prospectus for use in connection with any subsequent offering of Notes to be listed on the regulated market of the Luxembourg Stock Exchange.

### **1. Summary of the “Risk Factors”**

An investment in the Notes involves certain risks relating to the relevant Issuer, the Guarantor and the relevant Tranche of Notes. While all of these risk factors are contingencies which may or may not occur, potential investors should be aware that the risks involved with investing in the Notes may (i) affect the ability of the relevant Issuer and the Guarantor, as the case may be, to fulfill its obligations under Notes issued under the Programme and/or (ii) lead to a volatility and/or decrease in the market value of the relevant Tranche of Notes whereby the market value falls short of the expectations (financial or otherwise) of an investor upon making an investment in such Notes.

However, each prospective investor of Notes must determine, based on its own independent review and such professional advice as it deems appropriate under the circumstances, that its acquisition of the Notes is fully consistent with its (or if it is acquiring the Notes in a fiduciary capacity, the beneficiary's) financial needs, objectives and condition, complies and is fully consistent with all investment policies, guidelines and restrictions applicable to it (whether acquiring the Notes as principal or in a fiduciary capacity) and is a fit, proper and suitable investment for it (or if it is acquiring the Notes in a fiduciary capacity, for the beneficiary), notwithstanding the clear and substantial risks inherent in investing in or holding the Notes.

The following is a summary of the Risk Factors described in Part A.II ("Risk Factors") below which represent certain risks inherent in investing in Notes issued under the Programme.

## **(i) Summary of the Risk Factors relating to BMW Finance**

### **Non-financial Risks**

#### *Operating Risks*

Non-financial risks could arise from operating risks. Risks mainly result from the use of computer systems and information technology. BMW Finance uses computer systems to monitor financial positions and daily cash flows and to process payments to internal and external counterparties. System failures can, therefore, lead to delays in payment processes.

### **Financial Risks**

Financial risks arise mainly from liquidity risk, the risk of an increase in credit spreads, currency risk, interest rate risk, credit risk and fair market value risk.

#### *Liquidity Risk*

Liquidity risk refers to potential negative impacts on the operations of BMW Finance as a result of the inability to generate sufficient funds to pay liabilities when due and to finance BMW Group companies and participations.

#### *Risk of an Increase in Credit Spreads*

Increases in the credit spreads could negatively affect the cost of borrowing and, therefore, the operating results of BMW Finance. Increases in credit spreads could arise from changes in demand for term debt instruments on capital markets, the removal of the unconditional and irrevocable guarantees of BMW AG from the above-mentioned debt issuance programs in which BMW Finance participates, a weakening credit profile of the BMW Group and a decreasing willingness of banks to provide credit lines and loans.

#### *Currency Risk*

Currency risk or exchange rate risk refers to potential changes of value in financial assets, liabilities or derivatives in response to fluctuations in exchange rates. Changes in exchange rates can have adverse effects on the financial position and operating result of BMW Finance. In order to mitigate the impact of currency risk arising from operational, financing and investment activities, BMW Finance continually assesses its exposure to this risk. Currency risk is managed and hedged through the use of derivative financial instruments, such as forward contracts, options and cross currency swaps. When deemed appropriate, there might be unhedged positions.

#### *Interest Rate Risk*

Interest rate risk refers to potential changes of value in financial assets, liabilities or derivatives in response to fluctuations in interest rates. BMW Finance holds a substantial volume of interest rate sensitive financial assets, liabilities and derivatives for operational, financing and investment activities.

#### *Credit Risk*

Credit risk results from the risk of default of internal or external counterparties. The amount recognised in the balance sheet of BMW Finance for financial assets is, ignoring any collateral received, the maximum credit risk in the case that counterparties are unable to fulfill their contractual obligations.

#### *Fair Market Value Risk*

IAS 39, *Financial Instruments Recognition and Measurement*, requires that all derivative instruments be recorded on the balance sheet at their respective fair values. In the case that hedge accounting is applied and that a hedge is a fair value hedge, the results of the fair value measurement of the derivative financial instrument and of the related hedged item are recognised in the income statement.

#### **(ii) Summary of the Risk Factors relating to BMW US Capital**

The risk exposure of BMW US Capital can be broken down into two main categories: non-financial risks and financial risks.

#### **Non-financial Risks**

##### *Operating Risks*

Non-financial risks could arise from operating risks. Risks mainly result from the use of computer systems and information technology.

#### **Financial Risks**

Financial risks arise mainly from volatility relating to liquidity, credit spreads, interest rates, currency, credit and fair market value evaluations of derivative instruments.

##### *Liquidity Risk*

Liquidity risk refers to potential negative impacts on the operations of BMW US Capital resulting from the inability to generate sufficient funds to pay liabilities when due and to extend short- and long-term advances to support the financing activities of the companies of the BMW Group and its affiliates.

##### *Risk of an Increase in Credit Spreads*

Increases in credit spreads could negatively affect the cost of borrowing and, therefore, the operating results of BMW US Capital.

##### *Currency Risk*

Currency risk or exchange risk refers to potential changes of value in financial assets, liabilities or derivatives in response to fluctuations in exchange rates. Changes in exchange rates can have adverse effects on the financial position and operating result of BMW US Capital.

##### *Interest Rate Risk*

Interest rate risk refers to potential changes of value in financial assets, liabilities or derivatives in response to fluctuations in interest rates. BMW US Capital holds a substantial volume of interest rate sensitive financial assets, liabilities and derivatives from operational, financing and investment activities. Changes in interest rates can have adverse effects on the financial position and operating result of BMW US Capital.

##### *Credit Risk*

Credit risk results from the risk of default of internal or external counterparties. The amount recognised in the balance sheet of BMW US Capital for financial assets is, ignoring any collateral received, the maximum credit risk in the case that counterparties are unable to fulfill their contractual obligations.

#### *Fair Market Value Risk*

IAS 39, *Financial Instruments Recognition and Measurement*, requires that all derivative instruments be recorded on the balance sheet at their respective fair values. With respect to fair value hedges, the results of the fair value measurement of the derivative financial instrument and of the related hedged item are recognised in the income statement. Furthermore, if, contrary to the normal case within BMW US Capital, hedge accounting cannot be applied, the gains and losses from the fair value measurement of derivative financial instruments are recognised immediately in the income statement. This can lead to significant fluctuations in the positions "Gain/Loss on financial instruments" on the Statements of Income for BMW US Capital.

### **(iii) Summary of the Risk Factors relating to BMW Coordination Center**

The risk exposure of BMW Coordination Center can be broken down into two main categories: non-financial and financial risks.

#### **Non-financial Risks**

Non-financial risks could arise from operating risks. In addition, there are legal risks involved for BMW Coordination Center in connection with its coordination center status according to Belgium law.

##### *Operating Risks*

Operating risks mainly result from the use of computer systems and modern information technology.

##### *Risks in connection with the coordination center status of BMW Coordination Center*

BMW Coordination Center has obtained a 10-year extension of its coordination center status in 1997 and, therefore, the privileged tax status as a coordination center should remain in effect until the end of its fiscal year closing in 2007. In 2007, the BMW Coordination Center will apply for a further prolongation of its coordination center status until the end of its fiscal year 2010. A coordination center could forfeit its tax privileges before expiration of the 10-year term if it ceased to fulfill certain conditions of eligibility for coordination center status or engaged in activities not specifically authorised by the Royal Decree certifying it as a coordination center. However, at present nothing has been identified which could lead to the revocation of the coordination center status.

#### **Financial Risks**

Financial risks arise mainly from liquidity risk, the risk of an increase in credit spreads, currency risk, interest rate risk and credit risk.

##### *Liquidity Risk*

Liquidity risk refers to potential negative impacts on the operations of BMW Coordination Center as a result of the inability to generate sufficient funds to pay liabilities when due, to do factoring and intra-group financing.

##### *Risk of an Increase in Credit Spreads*

Increases in credit spreads could negatively affect the cost of borrowing and, therefore, the operating results of BMW Coordination Center. Increases in credit spreads could arise from changes in demand for term debt instruments on capital markets, the removal of the unconditional and irrevocable guarantees from BMW AG from the above mentioned debt issuance programs in which BMW Coordination Center participates, a weakening credit profile of the BMW Group and a decreasing willingness of banks to provide credit lines and loans.

##### *Currency Risk*

Currency risk or exchange rate risk refers to potential changes of value in financial assets, liabilities or derivatives in response to fluctuations in exchange rates. Changes in exchange rates can have adverse effects on the financial position and operating result of BMW Coordination Center. In order to mitigate the impact of currency risk arising from operational, financing and investment activities, BMW Coordination Center continually assesses its exposure to this risk.

##### *Interest Rate Risk*

Interest rate risk refers to potential changes of value in financial assets, liabilities or derivatives in response to fluctuations in interest rates. BMW Coordination Center holds a substantial volume of interest rate sensitive financial assets, liabilities and derivatives for operational, financing and investment activities.

##### *Credit Risk*

Credit risk results from the risk of default of internal or external counterparties. The amount recognised in the balance sheet of BMW Coordination Center for financial assets is, ignoring any collateral received, the maximum credit risk in the case that counterparties are unable to fulfill their contractual obligations.

The risk exposure of BMW Australia Finance can be broken down into two main categories: non-financial and financial risks.

##### **Non-financial risks**

###### *Operating risks*

Non-financial risks could arise from operating risks. Risks mainly result from the use of computer systems and information technology.

Financial risks arise mainly from liquidity risk, risk of an increase in credit spreads, credit risk and interest rate risk.

###### *Liquidity Risk*

Liquidity risk refers to potential negative impacts on the operations of BMW Australia Finance as a result of the inability to generate sufficient funds to pay liabilities when due.

###### *Risk of an Increase in Credit Spreads*

###### *Interest Rate Risk*

In order to mitigate the impact of interest rate risk, BMW Australia Finance continually assesses and manages its exposure to this risk and hedges those liabilities through the use of derivative financial instruments, such as interest rate swaps.

###### *Credit Risk*

Credit risk results from the risk of default in retail and wholesale business. The credit risk from loan business, other retail business and wholesale business risks have been closely monitored and adequately provided for.

###### *Fair Market Value Risk*

IAS 39, *Financial Instruments Recognition and Measurement*, requires that all derivative instruments be recorded on the balance sheet at their respective fair values. With respect to fair value hedges, the results of the fair value measurement of the derivative financial instrument and of the related hedged item are recognised in the income statement. Furthermore, if, contrary to the normal case within BMW Australia Finance, hedge accounting cannot be applied, the gains and losses from the fair value measurement of derivative financial instruments are recognised immediately in the Income statement. This can lead to significant fluctuations in the Income Statement for BMW Australia Finance.

#### **(v) Summary of the Risk Factors relating to BMW UK Capital**

The risk exposure of BMW UK Capital can be broken down into two main categories: non-financial and financial risks.

##### **Non-financial Risks**

###### *Operating Risks*

Non-financial risks could arise from operating risks. Risks mainly result from the use of computer systems and modern Information technology. BMW UK Capital uses computer systems to monitor financial positions and daily cash flows and to process payments to Internal and external counterparties. System failures can, therefore, lead to delays in payment processes.

## **Financial Risks**

Financial risks arise mainly from liquidity risk, the risk of an increase in credit spreads, currency risk, interest rate risk and credit risk.

### *Liquidity Risk*

Liquidity risk refers to potential negative impacts on the operations of BMW UK Capital as a result of the inability to generate sufficient funds to pay liabilities when due and to finance BMW Group companies.

### *Risk of an increase in Credit Spreads*

Increases in credit spreads could negatively affect the cost of borrowing and, therefore, the operating results of BMW UK Capital. Increases in credit spreads could arise from changes in demand for term debt instruments on capital markets, the removal of the unconditional and irrevocable guarantees of BMW AG from the above-mentioned debt issuance programs in which BMW UK Capital participates and from a decreasing willingness of banks to provide credit lines and loans.

### *Currency Risk*

Currency risk or exchange rate risk refers to potential changes of value in financial assets, liabilities or derivatives in response to fluctuations in exchange rates of the GBP, EUR and other currencies. Changes in exchange rates can have adverse effects on the financial position and operating result of BMW UK Capital.

### *Interest Rate Risk*

Interest rate risk refers to potential changes of value in financial assets, liabilities or derivatives in response to fluctuations in interest rates. BMW UK Capital holds a substantial volume of interest rate sensitive financial assets, liabilities and derivatives for operational, financing and investment activities. Changes in interest rates can have adverse effects on the financial position and operating result of BMW UK Capital.

### *Credit Risk*

Credit risk results from the risk of default of internal or external counterparties. The amount recognized in the balance sheet of BMW UK Capital for financial assets is, ignoring any collateral received, the maximum credit risk in the case that counterparties are unable to fulfill their contractual obligations. In the case of derivative financial instruments, BMW UK Capital is also exposed to credit risk, which results from the non-fulfillment of contractual agreements on the part of the counterparty.

## **(vi) Summary of the Risk Factors relating to BMW Japan**

The risk exposure of BMW Japan can be broken down into two main categories: non-financial and financial risks.

### **Non-financial risks**

#### *Operating risks*

Non-financial risks could arise from operating risks. Risks mainly result from the use of computer systems and modern information technology.

### **Financial Risks**

Financial risks arise mainly from liquidity risk, risk of an increase in credit spreads, credit risk and interest rate risk.

#### *Liquidity Risk*

Liquidity risk refers to potential negative impacts on the operations of BMW Japan as a result of the inability to generate sufficient funds to pay liabilities when due.

#### *Risk of an Increase in Credit Spreads*

Increases in the credit spreads could negatively affect the cost of borrowing and, therefore, the operating results of BMW Japan. Increases in credit spreads could arise from changes in demand

from creditors, such as banks for short-term loans and institutional investors for long-term loans or bonds.

#### *Interest Rate Risk*

Interest rate risk refers to potential changes of value in financial assets, liabilities or derivatives in response to fluctuations in interest rates. BMW Japan holds a substantial volume of interest rate sensitive liabilities for financing activities. Changes in interest rates can have adverse effects on the financial position and operating result of BMW Japan.

#### *Credit Risk*

Credit risk results from the risk of default in retail and wholesale business. The credit risk from loan business is covered by a comprehensive agreement in place with a service provider while the other retail business and wholesale business risks have been closely monitored and adequately provided for.

### **(vii) Summary of the Risk Factors relating to BMW AG and BMW Group**

#### *Risk management in the BMW Group*

As a globally operating enterprise, the BMW Group is confronted with numerous risks. At the same time, opportunities can arise from changing circumstances, which the BMW Group endeavours to anticipate and exploit to improve its competitive position. Business risks are only consciously entered into when it is considered that the value of the business can be increased and the potential outcome can be controlled. The Board of Management and Supervisory Board are regularly informed about risks which could have a significant impact on business development.

#### **Risks relating to the general economic environment**

As a result of its global activities, the BMW Group is affected by global economic factors such as changes in currency parities and changes on the financial markets. The USD is particularly important for the development of group revenues and earnings and represents the main single source of risk within the BMW Group's foreign currency portfolio. Exchange rate fluctuations of the GBP and the Japanese Yen in relation to the Euro can also have a material impact on earnings. Based on group forecasts, these three currencies account for some 80 per cent. of the foreign currency exposure of the BMW Group.

#### **Specific industry risks**

Changes in fuel prices, which may be either market-induced or due to governmental tax policies, and the increasingly stringent requirements to reduce fleet fuel consumption as well as CO<sub>2</sub> and NO<sub>2</sub> emissions, all continue to place high demands on the BMW Group's engine and product development.

The statutory regulations for CO<sub>2</sub> emissions targeted by the European Commission could have a materially adverse effect on the business development of the automobiles segment and consequently on the group's earnings performance.

#### **Operating risks**

Risks arising from business interruption and loss of production are insured up to economically reasonable levels. The BMW Group's extremely flexible production network and working time models also help to reduce operating risks.

#### **Risks relating to the provision of financial services**

As a consequence of the growth of lease business, the BMW Group faces an increased residual value risk on the vehicles which are returned to the Group at the end of lease contracts. Changes in the residual values of BMW Group vehicles on the used car markets are therefore constantly monitored and forecasted. The overall risk position is measured each quarter by comparing forecasted market values and contractual values according to model and market.

#### **Legal risks**

The BMW Group is not involved in any court or arbitration proceedings which could have a significant impact on the economic position of the Group.

Like all enterprises, the BMW Group is exposed to the risk of warranty claims. Adequate provisions have been recognised in the balance sheet to cover such claims. Part of the risk, especially where the American market is concerned, has been insured externally up to economically acceptable levels. The high quality of BMW Group products, additionally ensured by regular quality audits and on-going improvement measures, helps to reduce this risk. In comparison with competitors, this can give rise to benefits and opportunities for the BMW Group.

Changes in the regulatory environment may impair the sales volume, revenues and earnings performance of the BMW Group in individual markets or economic regions.

### **Personnel risks**

As an attractive employer, the BMW Group has found itself in a favourable position for many years in the intense competition for qualified technical and managerial staff. Employee satisfaction and a low level of employee fluctuation also help to minimise the risk of know-how drift.

### **Information and IT risks**

The BMW Group protects data, business secrets and innovative developments against unauthorized access, damage and misuse using security measures appropriate to the risk involved. These measures encompass manual, process design and IT controls.

Group directives are in place requiring employees to handle information appropriately and ensure that information systems are properly used. Targeted communication measures increase employees' awareness of security requirements.

## **(viii) Summary of the Risk Factors relating to the Notes**

### **General Risks Relating to the Notes**

#### *Independent Review and Advice*

Each prospective investor of Notes must determine, based on its own independent review and such professional advice as it deems appropriate under the circumstances, that its acquisition of the Notes is fully consistent with its (or if it is acquiring the Notes in a fiduciary capacity, the beneficiary's) financial needs, objectives and condition, complies and is fully consistent with all investment policies, guidelines and restrictions applicable to it (whether acquiring the Notes as principal or in a fiduciary capacity) and is a fit, proper and suitable investment for it (or if it is acquiring the Notes in a fiduciary capacity, for the beneficiary), notwithstanding the clear and substantial risks inherent in investing in or holding the Notes.

#### *There is no active Secondary/Trading Market for the Notes*

Notes issued under the Programme will be new securities which may not be widely distributed and for which there is currently no active trading market (unless in the case of any particular Tranche, such Tranche is to be consolidated with and form a single series with a Tranche of Notes which is already issued). If the Notes are traded after their initial issuance, they may trade at a discount to their initial offering price, depending upon prevailing interest rates, the market for similar securities, general economic conditions and the financial condition of the relevant Issuer and the Guarantor.

*Because Global Notes representing the Notes are held by or on behalf of Clearstream Luxembourg or Euroclear, investors will have to rely on their procedures for transfer, payment and communication with the relevant Issuer and/or the Guarantor*

Notes issued under the Programme may be represented by one or more Global Notes. Such Global Notes will be deposited with a Common Depositary for Clearstream Luxembourg and/or Euroclear or with a Common Safekeeper, as the case may be. Investors will not be entitled to receive definitive Notes. Clearstream Luxembourg and Euroclear will maintain records of the co-ownership participations in the Global Notes. While the Notes are represented by one or more Global Notes, investors will be able to trade their coownership participations only through Clearstream Luxembourg and/or Euroclear.

#### *Provision of Information*

None of the Issuers, the Guarantor, the Dealer(s) or any of their respective affiliates makes any representation as to an index. Any of such persons may have acquired, or during the term of the Notes may acquire, non-public information with respect to an index that is or may be material in the context of Index-Linked Notes.

#### *Potential Conflicts of Interest*

Each of the Issuers, the Guarantor, the Dealer(s) or their respective affiliates may deal with and engage generally in any kind of commercial or investment banking or other business with any issuer of the securities taken up in an index, their respective affiliates or any guarantor or any other person or entities having obligations relating to any issuer of the securities taken up in an index or their respective affiliates or any guarantor in the same manner as if any Index-Linked Notes issued under the Programme did not exist, regardless of whether any such action might have an adverse effect on an issuer of the securities taken up in the index, any of their respective affiliates or any guarantor.

#### *Exchange Rates*

Prospective investors of the Notes should be aware that an investment in the Notes may involve exchange rate risks. The reference assets or the Notes may be denominated in a currency other than the currency of the purchaser's home jurisdiction; and/or the reference assets or the Notes may be denominated in a currency other than the currency in which a purchaser wishes to receive funds. Exchange rates between currencies are determined by factors of supply and demand in the international currency markets which are influenced by macro economic factors, speculation and central bank and government intervention (including the imposition of currency controls and restrictions). Fluctuations in exchange rates may affect the value of the Notes or the reference assets.

#### *Legality of Purchase*

Neither the Issuers, the Guarantor, the Dealer(s) nor any of their respective affiliates has or assumes responsibility for the lawfulness of the acquisition of the Notes by a prospective investor of the Notes, whether under the laws of the jurisdiction of its incorporation or the jurisdiction in which it operates (if different), or for compliance by that prospective investor with any law, regulation or regulatory policy applicable to it.

#### *Taxation*

Potential purchasers and sellers of the Notes should be aware that they may be required to pay taxes or other documentary charges or duties in accordance with the laws and practices of the country where the Notes are transferred or other jurisdictions. In some jurisdictions, no official statements of the tax authorities or court decisions may be available for innovative financial Notes such as the Notes.

#### *Market Value of the Notes*

The market value of the Notes will be affected by the creditworthiness of the relevant Issuer and the Guarantor and a number of additional factors, including the value of the reference assets or an index, including, but not limited to, the volatility of the reference assets or an index, or the dividend on the securities taken up in the index, market interest and yield rates and the time remaining to the maturity date.

#### *Change of Law*

The Terms and Conditions of the Notes are based on German law in effect as of the date of this Prospectus. No assurance can be given as to the impact of any possible judicial decision or change to German law or administrative practice after the date of this Prospectus.

#### **Risks relating to specific types of Notes**

The Programme allows for different types of Notes to be issued. Accordingly, each Tranche of Notes may carry varying risks for potential investors depending on the specific features of such Notes such as, *inter alia*, the provisions for computation of periodic interest payments, if any, redemption and issue price.

#### *The Notes may be redeemed prior to Maturity*

Unless in the case of any particular Tranche of Notes the relevant Final Terms specifies otherwise, in the event that the Issuer or the Guarantor would be obliged to increase the amounts payable in respect of any Notes due to any withholding or deduction for or on account of, any present or future taxes, duties, assessments or governmental charges of whatever nature imposed, levied, collected, withheld or assessed by the country of domicile (or residence for tax purposes) by the

relevant Issuer, or on behalf of the Federal Republic of Germany, or any political subdivision thereof or any authority therein or thereof having power to tax, the Issuer may redeem all outstanding Notes in accordance with the Terms and Conditions.

#### *Fixed Rate Notes*

Investment in Notes which bear interest at a fixed rate involves the risk that subsequent changes in market interest rates may adversely affect the value of the relevant Tranche of Notes.

#### *Floating Rate Notes*

Investment in Notes which bear interest at a floating rate comprise (i) a reference rate (such as EURIBOR or LIBOR) and (ii) a margin to be added or subtracted, as the case may be, from such base rate. Typically, the relevant margin will not change throughout the life of the Notes but there will be a periodic adjustment (as specified in the relevant Final Terms) of the reference rate (e.g., every three months or six months) which itself in accordance with general market conditions. Accordingly, the market value of Floating Rate Notes may be volatile if changes, particularly shortterm changes, to market interest rates evidenced by the relevant reference rate can only be reflected in the interest rate of these Notes upon the next periodic adjustment of the relevant reference rate.

#### *Inverse Floating Rate Notes*

Investment in Notes which bear interest at an inverse floating rate comprise (i) a fixed base rate minus (ii) a reference rate (such as EURIBOR or LIBOR). The market value of such Notes typically is more volatile than the market value of Floating Rate Notes based on the same reference rate (and with otherwise comparable terms). Inverse Floating Rate Notes are more volatile because an increase in the reference rate not only decreases the interest rate of the Notes, but may also reflect an increase in prevailing interest rates, which further adversely affects the market value of these Notes.

#### *Fixed to Floating Rate Notes*

Fixed to Floating Rate Notes may bear interest at a rate that the Issuer may elect to convert from a fixed rate to a floating rate, or from a floating rate to a fixed rate. The Issuer's ability to convert the interest rate will affect the secondary market and the market value of the Notes since the Issuer may be expected to convert the rate when it is likely to produce a lower overall cost of borrowing. If the Issuer converts from a fixed rate to a floating rate, the spread on the Fixed to Floating Rate Notes may be less favourable than then prevailing spreads on comparable Floating Rate Notes tied to the same reference rate.

#### *Notes issued at a substantial discount or premium*

The market values of securities issued at a substantial discount or premium from their principal amount tend to fluctuate more in relation to general changes in interest rates than do prices for conventional interest-bearing securities. Generally, the longer the remaining term of the securities, the greater the price volatility as compared to conventional interest-bearing securities with comparable maturities.

#### *Index-Linked Notes*

Index-Linked Notes are debt securities which do not provide for predetermined redemption amounts (in the case of Index-Linked Redemption Notes) and/or interest payments (in the case of Index-Linked Interest Notes) but amounts due in respect of principal and/or interest will be dependent upon the performance of an index, which itself may contain substantial credit, interest rate or other risks. The amount of principal and/or interest, if any, payable by the Issuer might be substantially less than the issue price or, as the case may be, the purchase price invested by the Noteholder and may even be zero in which case the Noteholder may lose his entire investment.

### **1. Risks relating to the Issuing Subsidiaries**

#### **(i) BMW Finance**

The risk exposure of BMW Finance can be broken down into two main categories: non-financial and financial risks.

#### **Non-financial Risks**

##### *Operating Risks*

Non-financial risks could arise from operating risks. Risks mainly result from the use of computer systems and information technology. BMW Finance uses computer systems to monitor financial positions and daily cash flows and to process payments to internal and external counterparties. System failures can, therefore, lead to delays in payment processes. Further operating risks can arise in connection with the settlement of financial transactions. The management of daily cash flows at BMW Finance depends on the timely receipt of funds from external institutions who act as counterparties to financial transactions, such as bonds, swaps or other derivative financial instruments.

#### **Financial Risks**

The formal procedures and policies operated by BMW Finance to cover banking, foreign exchange and other treasury matters are consistent with objectives and policies for financial risk management within the BMW Group. BMW Finance’s policy is not to trade or speculate in financial instruments.

Financial risks arise mainly from liquidity risk, the risk of an increase in credit spreads, currency risk, interest rate risk, credit risk and fair market value risk.

### *Liquidity Risk*

Liquidity risk refers to potential negative impacts on the operations of BMW Finance as a result of the inability to generate sufficient funds to pay liabilities when due and to finance BMW Group companies and participations.

To manage the liquidity, BMW Finance depends mainly on the issuance of term debt, principally in the European capital markets. Therefore, BMW Finance depends on broad access to these capital markets and investors. Changes in demand for term debt instruments on capital markets could limit the ability of BMW Finance to fund operations. The participation of BMW Finance in the EUR 20.0 billion Euro Medium Term Note Programme established by BMW AG, BMW Finance, BMW Coordination Center, BMW US Capital, BMW Australia Finance, BMW UK Capital and BMW Japan, as well as the participation in the EUR 5.0 billion Multi-Currency Commercial Paper Programme established by BMW AG, BMW Finance, BMW UK Capital and BMW Coordination Center support flexible and broad access to capital markets. Since May 2006, BMW Finance acts as an issuer under the EUR 2.0 billion French Commercial Paper (*Billets de Trésorerie*) Programme established by BMW Finance. Debt issuances under these programs have unconditional and irrevocable guarantees from BMW AG. The removal of the guarantees from these programs could limit access to certain investors and investor groups.

Furthermore, BMW Finance uses committed and uncommitted credit lines with banks and bank loans to cover liquidity needs. In this context BMW Finance depends on the willingness of banks to provide credit lines or loans. Due to structural changes in the banking business, the willingness of banks, to provide credit lines and loans, has declined over past years. In order to reduce and minimize the dependence on banks, BMW Finance has improved and taken measures to maintain access to capital markets. Besides local committed and uncommitted credit lines BMW Finance can draw under a USD 8.0 billion Multi-Currency Revolving Credit Facility (including a USD 3.0 billion Swingline Option).

### *Risk of an Increase in Credit Spreads*

Increases in the credit spreads could negatively affect the cost of borrowing and, therefore, the operating results of BMW Finance. Increases in credit spreads could arise from changes in demand for term debt instruments on capital markets, the removal of the unconditional and irrevocable guarantees of BMW AG from the above-mentioned debt issuance programs in which BMW Finance participates, a weakening credit profile of the BMW Group and a decreasing willingness of banks to provide credit lines and loans.

### *Currency Risk*

Currency risk or exchange rate risk refers to potential changes of value in financial assets, liabilities or derivatives in response to fluctuations in exchange rates. Changes in exchange rates can have adverse effects on the financial position and operating result of BMW Finance. In order to mitigate the impact of currency risk arising from operational, financing and investment activities, BMW Finance continually assesses its exposure to this risk. Currency risk is managed and hedged through the use of derivative financial instruments, such as forward contracts, options and cross currency swaps. When deemed appropriate, there might be unhedged positions.

### *Interest Rate Risk*

Interest rate risk refers to potential changes of value in financial assets, liabilities or derivatives in response to fluctuations in interest rates. BMW Finance holds a substantial volume of interest rate sensitive financial assets, liabilities and derivatives for operational, financing and investment activities. Changes in interest rates can have adverse effects on the financial position and operating result of BMW Finance. In order to mitigate the impact of interest rate risk, BMW Finance continually assesses its exposure to this risk. Interest rate risk is managed and hedged through the use of derivative financial instruments, such as interest rate swaps and forward rate agreements. When deemed appropriate, there might be unhedged positions.

### *Credit Risk*

Credit risk results from the risk of default of internal or external counterparties. The amount recognised in the balance sheet of BMW Finance for financial assets is, ignoring any collateral received, the maximum credit risk in the case that counterparties are unable to fulfill their

contractual obligations. In the case of derivative financial instruments, BMW Finance is also exposed to credit risk, which results from the non-performance of contractual agreements on the part of the counterparty. This credit risk is mitigated by entering into such contracts only with parties of first-class credit standing. Furthermore, BMW Finance participates in a Group wide limit system that continually assesses and limits the credit exposure to any single external counterparty.

#### *Fair Market Value Risk*

IAS 39, *Financial Instruments Recognition and Measurement*, requires that all derivative instruments be recorded on the balance sheet at their respective fair values. In the case that hedge accounting is applied and that a hedge is a fair value hedge, the results of the fair value measurement of the derivative financial instrument and of the related hedged item are recognised in the income statement. Furthermore, if, contrary to the normal case within BMW Finance, hedge accounting cannot be applied, the gains and losses from the fair value measurement of derivative financial instruments are recognised immediately in the income statement. This can lead to significant fluctuations in the position "Net balance of fair value measurement of financial instruments" on the income statement.

### **(ii) BMW US Capital**

The risk exposure of BMW US Capital can be broken down into two main categories: non-financial risks and financial risks.

#### **Non-financial Risks**

##### *Operating Risks*

Non-financial risks could arise from operating risks. Risks mainly result from the use of computer systems and information technology. BMW US Capital uses computer systems to monitor financial positions and daily cash flows and to process payments to internal and external counterparties. System failures can therefore lead to delays in payment processes or the evaluation or settlement of financial transactions.

#### **Financial Risks**

The formal procedures and policies operated by BMW US Capital to cover banking, foreign exchange and other treasury matters are consistent with the objectives and policies for financial risk management within BMW Group. BMW US Capital's policy is not to trade or speculate in financial instruments.

Financial risks arise mainly from volatility relating to liquidity, credit spreads, interest rates, currency, credit and fair market value evaluations of derivative instruments.

##### *Liquidity Risk*

Liquidity risk refers to potential negative impacts on the operations of BMW US Capital resulting from the inability to generate sufficient funds to pay liabilities when due and to extend short- and long-term advances to support the financing activities of the companies of the BMW Group and its affiliates.

To manage liquidity, BMW US Capital depends mainly on the issuance of overnight and term debt, principally in the European and US capital markets. Changes in demand for term debt instruments on capital markets could limit the ability of BMW US Capital to fund operations. The participation of BMW US Capital in the EUR 20.0 billion Euro Medium Term Note Programme established by BMW AG, BMW Finance, BMW Coordination Center, BMW US Capital, BMW Australia Finance, BMW UK Capital and BMW Japan, as well as the participation in the USD 7.0 billion US Commercial Paper Programme established by BMW US Capital support flexible and broad access to capital markets. Debt issuances under both programs have unconditional and irrevocable guarantees from BMW AG. The removal of the guarantees from these programs could limit access to certain investors and investor groups.

Furthermore, BMW US Capital uses committed and uncommitted credit lines with banks and bank loans to cover liquidity needs. In this context BMW US Capital depends on the willingness of banks to provide credit lines or loans. Due to structural changes in the banking business, the willingness of banks to provide credit lines and loans has declined over past years. The

dependence of BMW US Capital on banks, however, has been minimised over the past few years due to the broad and broadening access to capital markets of BMW US Capital. Besides local committed and uncommitted credit lines BMW US Capital can draw under a USD 8.0 billion Multi-Currency Revolving Credit Facility (including a USD 3.0 billion Swingline Option).

#### *Risk of an Increase in Credit Spreads*

Increases in credit spreads could negatively affect the cost of borrowing and, therefore, the operating results of BMW US Capital. Increases in credit spreads could arise from changes in demand for term debt instruments on capital markets, the removal of the unconditional and irrevocable guarantee of BMW AG from the above-mentioned debt issuance programs in which BMW US Capital participates, a weakening credit profile of the BMW Group and a decreasing willingness of banks to provide credit lines and loans.

#### *Currency Risk*

Currency risk or exchange risk refers to potential changes of value in financial assets, liabilities or derivatives in response to fluctuations in exchange rates. Changes in exchange rates can have adverse effects on the financial position and operating result of BMW US Capital. In order to mitigate the impact of foreign exchange risk arising from operational, financing and investment activities, BMW US Capital continually assesses its exposure to this risk. Currency exchange risk is managed through the use of derivative financial instruments, such as forward contracts, options and cross currency swaps. When deemed appropriate, there might be unhedged positions.

#### *Interest Rate Risk*

Interest rate risk refers to potential changes of value in financial assets, liabilities or derivatives in response to fluctuations in interest rates. BMW US Capital holds a substantial volume of interest rate sensitive financial assets, liabilities and derivatives from operational, financing and investment activities. Changes in interest rates can have adverse effects on the financial position and operating result of BMW US Capital. In order to mitigate the impact of interest rate risk, BMW US Capital continually assesses its exposure to this risk. Interest rate risk is managed by matching maturities and through the use of derivative financial instruments, such as interest rate swaps and forward rate agreements. When deemed appropriate, there might be unhedged positions.

#### *Credit Risk*

Credit risk results from the risk of default of internal or external counterparties. The amount recognised in the balance sheet of BMW US Capital for financial assets is, ignoring any collateral received, the maximum credit risk in the case that counterparties are unable to fulfill their contractual obligations. In the case of derivative financial instruments, BMW US Capital is also exposed to credit risk, which results from the non-fulfillment of contractual agreements on the part of the counterparty. This credit risk is mitigated by entering into such contracts only with parties of investment grade credit standing. Furthermore, BMW US Capital participates in a Group wide limit system that continually assesses and limits the credit exposure to any single external counterparty.

#### *Fair Market Value Risk*

IAS 39, *Financial Instruments Recognition and Measurement*, requires that all derivative instruments be recorded on the balance sheet at their respective fair values. With respect to fair value hedges, the results of the fair value measurement of the derivative financial instrument and of the related hedged item are recognised in the income statement. Furthermore, if, contrary to the normal case within BMW US Capital, hedge accounting cannot be applied, the gains and losses from the fair value measurement of derivative financial instruments are recognised immediately in the income statement. This can lead to significant fluctuations in the positions "Gain/Loss on financial instruments" on the Statements of Income for BMW US Capital.

### **(iii) BMW Coordination Center**

The risk exposure of BMW Coordination Center can be broken down into two main categories: non-financial and financial risks.

## **Non-financial Risks**

Non-financial risks could arise from operating risks. In addition, there are legal risks involved for BMW Coordination Center in connection with its coordination center status according to Belgium law.

### *Operating Risks*

Operating risks mainly result from the use of computer systems and modern information technology. BMW Coordination Center uses computer systems to monitor financial positions and daily cash flows and to process payments to internal and external counterparties. System failures can, therefore, lead to delays in payment processes. Further operating risks can arise in connection with the settlement of financial transactions. The management of daily cash flows at BMW Coordination Center depends on the timely receipt of funds from external institutions who act as counterparties to financial transactions, such as bonds, swaps or other derivative financial instruments.

### *Risks in connection with the coordination center status of BMW Coordination Center*

BMW Coordination Center has obtained a 10-year extension of its coordination center status in 1997 and, therefore, the privileged tax status as a coordination center should remain in effect until the end of its fiscal year closing in 2007. In 2007, the BMW Coordination Center will apply for a further prolongation of its coordination center status until the end of its fiscal year 2010. A coordination center could forfeit its tax privileges before expiration of the 10-year term if it ceased to fulfill certain conditions of eligibility for coordination center status or engaged in activities not specifically authorised by the Royal Decree certifying it as a coordination center. However, at present nothing has been identified which could lead to the revocation of the coordination center status.

## **Financial Risks**

The formal procedures and policies operated by BMW Coordination Center to cover banking, foreign exchange and other treasury matters are consistent with objectives and policies for financial risk management within the BMW Group. BMW Coordination Center's policy is not to trade or speculate in financial instruments.

Financial risks arise mainly from liquidity risk, the risk of an increase in credit spreads, currency risk, interest rate risk and credit risk.

### *Liquidity Risk*

Liquidity risk refers to potential negative impacts on the operations of BMW Coordination Center as a result of the inability to generate sufficient funds to pay liabilities when due, to do factoring and intra-group financing.

To manage the liquidity, BMW Coordination Center depends mainly on the issuance of term debt, principally in the European capital markets. Therefore, BMW Coordination Center depends on a broad access to these capital markets and investors. Changes in demand for term debt instruments on capital markets could limit the ability of BMW Coordination Center to fund operations. The participation of BMW Coordination Center in the EUR 20.0 billion Euro Medium Term Note Programme established by BMW AG, BMW Finance, BMW Coordination Center, BMW Australia Finance, BMW US Capital, BMW UK Capital and BMW Japan, as well as the participation in the EUR 5.0 billion Multi-Currency Commercial Paper Programme established by BMW AG, BMW Finance, BMW UK Capital and BMW Coordination Center supports flexible and broad access to capital markets. Debt issuances under both programs have unconditional and irrevocable guarantees of BMW AG. The removal of the guarantees from these programs could limit access to certain investors and investor groups.

The access of BMW Coordination Center to capital markets could also be limited by the introduction of an amendment to Royal Decree No. 187 of 24 December 2002. If the Law of 24 December 2002 becomes effective, interest paid by coordination centers on debts owed by them will attract Belgian withholding tax also when paid to foreign individuals and foreign legal entities subject to nonresident legal entity tax.

Furthermore, BMW Coordination Center uses committed and uncommitted credit lines with banks and bank loans to cover liquidity needs. In this context BMW Coordination Center depends on the willingness of banks to provide credit lines or loans. Due to structural changes in the banking business, the willingness of banks, to provide credit lines and loans, has declined over past years. In order to reduce and minimize the dependence on banks, BMW Coordination Center has improved and taken measures to maintain access to capital markets. Besides local committed and uncommitted credit lines BMW Coordination Center can draw under a USD 8.0 billion Multi-Currency Revolving Credit Facility (including a USD 3.0 billion Swingline Option).

#### *Risk of an Increase in Credit Spreads*

Increases in credit spreads could negatively affect the cost of borrowing and, therefore, the operating results of BMW Coordination Center. Increases in credit spreads could arise from changes in demand for term debt instruments on capital markets, the removal of the unconditional and irrevocable guarantees from BMW AG from the above mentioned debt issuance programs in which BMW Coordination Center participates, a weakening credit profile of the BMW Group and a decreasing willingness of banks to provide credit lines and loans.

#### *Currency Risk*

Currency risk or exchange rate risk refers to potential changes of value in financial assets, liabilities or derivatives in response to fluctuations in exchange rates. Changes in exchange rates can have adverse effects on the financial position and operating result of BMW Coordination Center. In order to mitigate the impact of currency risk arising from operational, financing and investment activities, BMW Coordination Center continually assesses its exposure to this risk. Currency risk is managed and hedged through the use of derivative financial instruments, such as forward contracts, options and cross currency swaps. When deemed appropriate, there might be unhedged positions.

#### *Interest Rate Risk*

Interest rate risk refers to potential changes of value in financial assets, liabilities or derivatives in response to fluctuations in interest rates. BMW Coordination Center holds a substantial volume of interest rate sensitive financial assets, liabilities and derivatives for operational, financing and investment activities. Changes in interest rates can have adverse effects on the financial position and operating result of BMW Coordination Center. In order to mitigate the impact of interest rate risk, BMW Coordination Center continually assesses its exposure to this risk. Interest rate risk is managed and hedged through the use of derivative financial instruments, such as interest rate swaps and forward rate agreements. When deemed appropriate, there might be unhedged positions.

#### *Credit Risk*

Credit risk results from the risk of default of internal or external counterparties. The amount recognised in the balance sheet of BMW Coordination Center for financial assets is, ignoring any collateral received, the maximum credit risk in the case that counterparties are unable to fulfill their contractual obligations. In the case of derivative financial instruments, BMW Coordination Center is also exposed to credit risk, which results from the non-fulfillment of contractual agreements on the part of the counterparty. This credit risk is mitigated by entering into such contracts only with parties of first-class credit standing. Furthermore, BMW Coordination Center participates in a Group wide limit system that continually assesses and limits the credit exposure to any single external counterparty.

### **(iv) BMW Australia Finance**

The risk exposure of BMW Australia Finance can be broken down into two main categories: non-financial and financial risks.

#### **Non-financial risks**

##### *Operating risks*

Non-financial risks could arise from operating risks. Risks mainly result from the use of computer systems and information technology. BMW Australia Finance uses computer systems to monitor

financial positions and daily cash flows and to process payments to external counterparties. System failures can, therefore, lead to delays in payment processes, further operating risks can arise in connection with the settlement of financial transactions. The management of daily cash flows at BMW Australia Finance depends on the timely receipt of funds from external parties for retail and wholesale business as well as financial transactions, such as loans, bonds and swaps. Operating risks are mitigated through constant monitoring and improving of operational processes, development of backup scenarios and assuring of adequate IT resources.

## **Financial Risks**

The formal procedures and policies operated by BMW Australia Finance to cover banking and other treasury matters are consistent with objectives and policies for financial risk management within the BMW Group. BMW Australia Finance's policy is not to trade or speculate in financial instruments.

Financial risks arise mainly from liquidity risk, risk of an increase in credit spreads, credit risk and interest rate risk.

### *Liquidity Risk*

Liquidity risk refers to potential negative impacts on the operations of BMW Australia Finance as a result of the inability to generate sufficient funds to pay liabilities when due.

For sound and diversified funding, BMW Australia Finance is engaged in long-term sources, such as loans, bonds, private placements and ABS. The participation of BMW Australia Finance in the EUR 20.0 billion Euro Medium Term Note Programme established by BMW AG, BMW Coordination Center, BMW UK Capital, BMW US Capital, BMW Australia Finance, BMW Japan and BMW Finance supports flexible and broad access to capital markets. Debt issuance under this program have unconditional and irrevocable guarantees of BMW AG. The removal of the guarantees from these programs could limit access to certain investors and investor groups.

### *Risk of an Increase in Credit Spreads*

Increase in the credit spreads could negatively affect the cost of borrowing and, therefore, the operating results of BMW Australia Finance, increase in credit spreads could arise from changes in demand from creditors, such as banks for short-term loans and institutional investors for long-term loans or bonds and from a weakening credit profile of the BMW Group.

### *Interest Rate Risk*

Interest rate risk refers to potential changes in value of financial assets, liabilities or derivatives in response to fluctuations in interest rates. BMW Australia Finance holds a substantial volume of interest rate sensitive liabilities for financing activities. Changes in interest rates can have adverse effects on the financial position and operating result of BMW Australia Finance, In order to mitigate the impact of interest rate risk, BMW Australia Finance continually assesses and manages its exposure to this risk and hedges those liabilities through the use of derivative financial instruments, such as interest rate swaps.

### *Credit Risk*

Credit risk results from the risk of default in retail and wholesale business. The credit risk from loan business, other retail business and wholesale business risks have been closely monitored and adequately provided for.

In the case of derivative financial instruments, BMW Australia Finance is also exposed to credit risk, which results from the non-performance of contractual agreements on the part of the counterparty. This credit risk is mitigated by entering into such contracts only with parties of first-class credit standing. Furthermore, BMW Australia Finance is participating in a Group wide limit system that continually assesses and limits the credit exposure to any single external counterparty.

Residual value risks resulting out of a small portion of BMW Australia Finance's portfolio are controlled through conservative settings and timely monitoring of market residual values and adequately provided for.

#### *Fair Market Value Risk*

IAS 39, *Financial Instruments Recognition and Measurement*, requires that all derivative instruments be recorded on the balance sheet at their respective fair values. With respect to fair value hedges, the results of the fair value measurement of the derivative financial instrument and of the related hedged item are recognised in the income statement. Furthermore, if, contrary to the normal case within BMW Australia Finance, hedge accounting cannot be applied, the gains and losses from the fair value measurement of derivative financial instruments are recognised immediately in the Income statement. This can lead to significant fluctuations in the Income Statement for BMW Australia Finance.

### **(v) BMW UK Capital**

The risk exposure of BMW UK Capital can be broken down into two main categories: non-financial and financial risks.

#### **Non-financial Risks**

##### *Operating Risks*

Non-financial risks could arise from operating risks. Risks mainly result from the use of computer systems and modern information technology. BMW UK Capital uses computer systems to monitor financial positions and daily cash flows and to process payments to internal and external counterparties. System failures can, therefore, lead to delays in payment processes. Further operating risks can arise in connection with the settlement of financial transactions. The management of daily cash flows at BMW UK Capital depends on the timely receipt of funds from external institutions who act as counterparties to financial transactions, such as bonds, swaps or other derivative financial Instruments.

#### **Financial Risks**

The formal procedures and policies operated by BMW UK Capital to cover banking, foreign exchange and other treasury matters are consistent with objectives and policies for financial risk management within the BMW Group. BMW UK Capital's policy is not to trade or speculate in financial instruments.

Financial risks arise mainly from liquidity risk, the risk of an increase in credit spreads, currency risk, interest rate risk and credit risk.

##### *Liquidity Risk*

Liquidity risk refers to potential negative impacts on the operations of BMW UK Capital as a result the inability to generate sufficient funds to pay liabilities when due and to finance BMW Group companies.

To manage the liquidity, BMW UK Capital depends mainly on the issuance of term debt, principally in the European capital markets. Therefore, BMW UK Capital depends on broad access to these capital markets and investors. Changes in demand for term debt instruments on capital markets could limit the ability of BMW UK Capital to fund operations. The participation of BMW UK Capital in the EUR 20.0 billion Euro Medium Term Note Programme established by BMW AG, BMW Finance, BMW Coordination Center, BMW US Capital, BMW Australia Finance, BMW Japan and BMW UK Capital, as well as the participation in the EUR 5.0 billion Multi-Currency Commercial Paper Programme established by BMW AG, BMW Finance, BMW UK Capital and BMW Coordination Center support flexible and broad access to capital markets. The removal of the guarantees from these programs could limit access to certain investors and investor groups.

Furthermore, BMW UK Capital uses uncommitted credit lines with banks and bank loans to cover liquidity needs. In this context BMW UK Capital depends on the willingness of banks to provide credit lines or loans. Due to structural changes in the banking business, the willingness of banks to provide credit lines and loans has declined over past years. In order to reduce and minimize the dependence on banks, BMW UK Capital has improved and taken measures to maintain access to capital markets. Besides local committed and uncommitted credit lines BMW UK Capital can draw under a USD 8.0 billion Multi-Currency Revolving Credit Facility (including a USD 3.0 billion Swinger's Option).

#### *Risk of an increase in Credit Spreads*

Increases in credit spreads could negatively affect the cost of borrowing and, therefore, the operating results of BMW UK Capital. Increases in credit spreads could arise from changes in demand for term debt instruments on capital markets, the removal of the unconditional and irrevocable guarantees of BMW AG from the above-mentioned debt issuance programs in which BMW UK Capital participates and from a decreasing willingness of banks to provide credit lines and loans.

#### *Currency Risk*

Currency risk or exchange rate risk refers to potential changes of value in financial assets, liabilities or derivatives in response to fluctuations in exchange rates of the GBP, EUR and other currencies. Changes in exchange rates can have adverse effects on the financial position and operating result of BMW UK Capital. In order to mitigate the impact of currency risk arising from operational, financing and investment activities, BMW UK Capital continually assesses its exposure to this risk. Currency risk is managed and hedged through the use of derivative financial instruments, such as forward contracts, options and cross currency swaps. When deemed appropriate, there might be unhedged positions.

#### *Interest Rate Risk*

Interest rate risk refers to potential changes of value in financial assets, liabilities or derivatives in response to fluctuations in interest rates. BMW UK Capital holds a substantial volume of interest rate sensitive financial assets, liabilities and derivatives for operational, financing and investment activities. Changes in interest rates can have adverse effects on the financial position and operating result of BMW UK Capital. In order to mitigate the impact of interest rate risk, BMW UK Capital continually assesses its exposure to this risk. Interest rate risk is managed and hedged through the use of derivative financial instruments, primarily interest rate swaps. When deemed appropriate, there might be unhedged positions.

#### *Credit Risk*

Credit risk results from the risk of default of internal or external counterparties. The amount recognized in the balance sheet of BMW UK Capital for financial assets is, ignoring any collateral received, the maximum credit risk in the case that counterparties are unable to fulfill their contractual obligations. In the case of derivative financial instruments, BMW UK Capital is also exposed to credit risk, which results from the non-fulfillment of contractual agreements on the part of the counterparty. This credit risk is mitigated by entering into such contracts only with parties of first-class credit standing. Furthermore, BMW UK Capital participates in a Group wide limit system that continually assesses and limits the credit exposure to any single external counterparty.

### **(vi) BMW Japan**

The risk exposure of BMW Japan can be broken down into two main categories: non-financial and financial risks.

#### **Non-financial risks**

##### *Operating risks*

Non-financial risks could arise from operating risks. Risks mainly result from the use of computer systems and modern information technology. BMW Japan uses computer systems to monitor financial positions and daily cash flows and to process payments to external counterparties. System failures can, therefore, lead to delays in payment processes. Further operating risks can arise in connection with the settlement of financial transactions. The management of daily cash

flows at BMW Japan depends on the timely receipt of funds from external parties for retail and wholesale business as well as financial transactions, such as loans, bonds and swaps. Operating risks are mitigated through constant monitoring and improving of operational processes, development of back-up scenarios and assuring of adequate IT resources.

## **Financial Risks**

Financial risks arise mainly from liquidity risk, risk of an increase in credit spreads, credit risk and interest rate risk.

### *Liquidity Risk*

Liquidity risk refers to potential negative impacts on the operations of BMW Japan as a result of the inability to generate sufficient funds to pay liabilities when due.

BMW Japan uses bank loans and uncommitted credit lines with banks to cover short-term liquidity needs. In this context, BMW Japan depends on the willingness of banks to provide credit lines or loans. These settings are based on the sound profitability of BMW Japan and BMW Group.

In order to reduce and minimize possible risk of decrease in credit line availability, BMW Japan makes regular contacts to the banks to be always updated of their recent credit stances in addition to development of financial, especially lending markets. Furthermore BMW Group Capital Markets Division is involved in a broad range of banking activities of BMW subsidiaries.

For sound and diversified funding, BMW Japan is engaged in long-term sources, such as loans, bonds and ABS. The participation of BMW Japan in the EUR 20.0 billion Euro Medium Term Note Programme established by BMW AG, BMW Finance, BMW US Capital, BMW Coordination Center, BMW Australia Finance, BMW UK Capital and BMW Japan supports flexible and broad access to capital markets. Debt issuance under this program have unconditional and irrevocable guarantees of BMW AG. The removal of the guarantees from these programs could limit access to certain investors and investor groups.

### *Risk of an Increase in Credit Spreads*

Increases in the credit spreads could negatively affect the cost of borrowing and, therefore, the operating results of BMW Japan. Increases in credit spreads could arise from changes in demand from creditors, such as banks for short-term loans and institutional investors for long-term loans or bonds.

### *Interest Rate Risk*

Interest rate risk refers to potential changes of value in financial assets, liabilities or derivatives in response to fluctuations in interest rates. BMW Japan holds a substantial volume of interest rate sensitive liabilities for financing activities. Changes in interest rates can have adverse effects on the financial position and operating result of BMW Japan. In order to mitigate the impact of interest rate risk, BMW Japan continually assesses and manages its exposure to this risk and hedges those liabilities through the use of derivative financial instruments, such as interest rate swaps.

### *Credit Risk*

Credit risk results from the risk of default in retail and wholesale business. The credit risk from loan business is covered by a comprehensive agreement in place with a service provider while the other retail business and wholesale business risks have been closely monitored and adequately provided for.

In the case of derivative financial instruments, BMW Japan is also exposed to credit risk, which results from the non-performance of contractual agreements on the part of the counterparty. This credit risk is mitigated by entering into such contracts only with parties of first-class credit standing. Furthermore, BMW Japan is participating in a Group wide limit system that continually assesses and limits the credit exposure to any single external counterparty.

Residual value risks resulting out of a small portion of BMW Japan's portfolio are controlled through conservative settings and timely monitoring of market residual values.

## **2. Risks relating to BMW AG and BMW Group**

### *Risk management in the BMW Group*

As a globally operating enterprise, the BMW Group is confronted with numerous risks. At the same time, opportunities can arise from changing circumstances, which the BMW Group endeavours to anticipate and exploit to improve its competitive position. Business risks are only consciously entered into when it is considered that the value of the business can be increased and the potential outcome can be controlled. The Board of Management and Supervisory Board are regularly informed about risks which could have a significant impact on business development.

In order to identify, evaluate and document the main risks, the BMW Group uses a comprehensive risk management system which involves the following processes:

- Business decisions are reached after in-depth project analyses, including detailed information concerning potential risks and opportunities, have been taken into consideration. In addition, as part of the long-term planning strategy and short-term forecasting procedures, the risks and opportunities attached to specific business activities are evaluated and used as the basis for setting targets and implementing appropriate risk-mitigation measures.
- The Group reporting system keeps all decisionmakers fully informed and up-to-date about performance against targets and highlights changes affecting the market and competitors. By continuous monitoring of critical success factors, variances are identified at an early stage, thus allowing appropriate counter-measures to be implemented.
- Overall risk management is supervised by the corporate controlling department and is reviewed for its appropriateness and effectiveness by external auditors and by the Group's internal audit department. Throughout the BMW Group, a network of risk managers is in place, regularly carrying out risk reviews to identify and analyse significant risks. The results of the reviews are summarised in a separate risk report which is then presented to the Board of Management.
- By regularly sharing experiences with other companies, the BMW Group ensures that innovative ideas and approaches flow into the risk management system and that operational risk management is subjected to continual improvement. At present, no risks have been identified which could threaten the existence of the Group or which could have a materially adverse impact on the net assets, financial position or results of operations of the Group. However, risks can never be entirely ruled out. In the course of its business activities, the BMW Group is exposed to various types of risk:

### **Risks relating to the general economic environment**

- As a result of its global activities, the BMW Group is affected by global economic factors such as changes in currency parities and changes on the financial markets. The USD is particularly important for the development of group revenues and earnings and represents the main single source of risk within the BMW Group's foreign currency portfolio. Exchange rate fluctuations of the GBP and the Japanese Yen in relation to the Euro can also have a material impact on earnings. Based on group forecasts, these three currencies account for some 80 per cent. of the foreign currency exposure of the BMW Group.

The BMW Group manages currency risks at both a strategic and an operating level.

From a strategic point of view, i.e. in the medium and long-term, the BMW Group endeavours to manage foreign exchange risks by "natural hedging", in other words by increasing the volume of purchases denominated in foreign currency or increasing the volume of local production. Currency risks are hedged in the short and medium term on the financial markets. Hedging transactions are entered into only with financial partners of first-class credit standing. The nature and scope of such measures are set out in guidelines applicable throughout the BMW Group. A cashflow-at-risk model and scenario analyses are used to measure exchange rate risks. These instruments are also used as part of the process of currency management for the purpose of taking business decisions.

- Changes in the international commodity markets also have an impact on the business development of the BMW Group. In order to safeguard the supply of production materials and to minimise the cost risk, the commodity markets relevant for the BMW Group are closely monitored.
- The market price trend of precious metals such as platinum, palladium and rhodium, for which appropriate hedging strategies are decided upon by the Raw Materials Committee, is also important in this context.
- Changes in the price of crude oil, which is an important basic material in the manufacture of components, have an indirect impact on production costs. As a manufacturing enterprise, the BMW Group is also affected by changes in energy prices, caused by both market factors and tax legislation.
- Cyclical economic volatility also entails an element of risk for future business development. Unforeseeable interventionist economic policies can also impair the BMW Group's performance in specific markets. The BMW Group anticipates these risks by monitoring the markets in detail and using early warning indicators. Risk is also spread due to the worldwide nature of the BMW Group's activities. At the same time, determined engagement in new markets and segments with both existing and new products creates significant opportunities for the BMW Group to strengthen its competitive position.
- An escalation of political tensions, terrorist activities or possible pandemics could have a negative impact on the economic situation, the international capital markets and hence the business development of the BMW Group.

### **Specific industry risks**

- Changes in fuel prices, which may be either market-induced or due to governmental tax policies, and the increasingly stringent requirements to reduce fleet fuel consumption as well as CO<sub>2</sub> and NO<sub>2</sub> emissions, all continue to place high demands on the BMW Group's engine and product development.
- The statutory regulations for CO<sub>2</sub> emissions targeted by the European Commission could have a materially adverse effect on the business development of the automobiles segment and consequently on the group's earnings performance.

### **Operating risks**

- Risks arising from business interruption and loss of production are insured up to economically reasonable levels. The BMW Group's extremely flexible production network and working time models also help to reduce operating risks.
- Close cooperation between manufacturers and suppliers is usual in the automotive sector, and although this provides economic benefits, it also creates a certain degree of mutual dependence. Some suppliers have become very important for the production activities of the BMW Group. Delivery delays, cancellations, strikes or poor quality can lead to production stoppages and thus have a negative impact on profitability. The Group mitigates these risks by employing extensive procedures for selecting, monitoring and handling suppliers. Before selection, for example, both the technical competence and the financial strength of potential suppliers are appraised. A comprehensive Supplier Relationship Management system, which also takes account of social and ecological aspects, helps to reduce risk exposure.

### **Risks relating to the provision of financial services**

- As a consequence of the growth of lease business, the BMW Group faces an increased residual value risk on the vehicles which are returned to the Group at the end of lease contracts. Changes in the residual values of BMW Group vehicles on the used car markets are therefore constantly monitored and forecasted. The overall risk position is measured each quarter by comparing forecasted market values and contractual values according to model and market.

Provisions and write-downs on leased-out cars are recognised in the balance sheet to cover all identified risks. This risk is also reduced by measures such as active life-cycle

management and management of used car markets at an international level, both of which have a stabilising effect on the residual values of BMW Group vehicles.

- Operating risks relating to the provision of financial services are managed by the BMW Group by means of a process which records and measures risks and incorporates specific measures to avoid risk. In this way, the BMW Group minimises the risk of losses which could arise as a result of inappropriate or failed internal procedures and systems, human error or external factors. This includes measures to ensure that operations can be continued at an appropriate level in the event of impairment caused by external factors.
- The BMW Group mitigates liquidity and interest rate change risks by matching maturities and employing derivative financial instruments. The liquidity situation is monitored continually by means of a rolling cash flow forecast. As part of a value-based interest rate management system, interest rate risks are measured and limited using a value-at-risk approach. The risk-return ratio is tested continuously using simulated computations. In addition, sensitivity analyses are prepared to measure the potential impact of interest rate changes on earnings.
- In order to avoid currency risks, financing and lease business is refinanced, as a general rule, in the currency of the relevant market.
- A major part of financing and lease business within the financial services segment is refinanced on the capital markets. As a result of its good credit standing, reflected in the long-standing first-class short-term ratings issued by Moody's (P-1) and Standard & Poor's (A-1), the BMW Group is able to obtain competitive conditions. The long-term ratings for the BMW Group published by Standard & Poor's and Moody's in September 2005 remain valid, enabling the BMW Group to obtain competitive conditions. Moody's issued an A1 rating and Standard & Poor's an A+ rating, both with stable outlook.
- Various methods and systems such as credit rating and scoring are in place to manage credit risk, partly in the light of Basle II requirements. Depending on the credit volume applied for and the credit risk rating of the party involved, financing applications for international dealers, importers and fleet customers are presented to the local, regional or corporate credit committees for approval. A two-step credit application process helps to reduce the risk of default affecting the Group's worldwide financial services operations. This process, which is based on clear and binding credit risk rules applicable throughout the group, also specifies the maximum amounts of unsecured credit volumes permitted ("unsecured risks"). The dual control principle applies worldwide and is rigorously implemented. In another measure to reduce risk, the BMW Group is continuously making efforts to standardise its credit decision processes and the quality of those processes on a worldwide basis, and to ensure that uniform rating systems are in place. Close contact to borrowers, a thorough knowledge of the vehicle products sold, local credit checks and on-going measurement of collateral all make a vital contribution towards avoiding losses, particularly in the case of lower rating categories. On top of this, the dynamic global credit markets will continue to supply highly flexible instruments to mitigate risk (e.g. securitisation, coverage using credit derivatives, credit syndication).

For retail customer financing purposes, the BMW Group uses validated scorecards in order to reach credit decisions more quickly and to monitor risk. Criteria such as arrears and bad debt ratios are analysed monthly and used to actively manage the credit portfolio and to improve portfolio quality.

### **Legal risks**

- The BMW Group is not involved in any court or arbitration proceedings which could have a significant impact on the economic position of the Group.
- Like all enterprises, the BMW Group is exposed to the risk of warranty claims. Adequate provisions have been recognised in the balance sheet to cover such claims. Part of the risk, especially where the American market is concerned, has been insured externally up to economically acceptable levels. The high quality of BMW Group products, additionally ensured by regular quality audits and on-going improvement measures, helps to reduce this risk. In comparison with competitors, this can give rise to benefits and opportunities for the BMW Group.

- Changes in the regulatory environment may impair the sales volume, revenues and earnings performance of the BMW Group in individual markets or economic regions.

### **Personnel risks**

- As an attractive employer, the BMW Group has found itself in a favourable position for many years in the intense competition for qualified technical and managerial staff. Employee satisfaction and a low level of employee fluctuation also help to minimise the risk of know-how drift.
- An ageing and shrinking population in Germany will have a lasting impact on the conditions prevailing in the labour, product, services and financial markets. Demographic changes will give rise to risks and opportunities which enterprises will be increasingly faced with in coming years. The BMW Group carefully reviews the effects of demographic change on operations, focusing in particular on the following issues:
  - the creation of a working environment for the future
  - promotion and maintenance of the workforce's ability to perform with the appropriate set of skills
  - training
  - increasing employees' awareness of their responsibility to make personal provisions for their future
  - individual employee working life-time models.
- The BMW Group's pension obligations to its employees resulting from defined benefit plans are measured on the basis of actuarial reports. In accordance with IAS 19, future pension payments are discounted by reference to market yields on high quality corporate bonds. These yields are subject to market fluctuation and influence the level of pension obligations. Furthermore, changes in other factors, such as longer life expectancies, can also have an impact on pension obligations.
- In the United Kingdom, the USA and a number of other countries, funds intended to cover pension entitlements are held separately from corporate assets and are mainly invested in fixed-income securities with a high level of creditworthiness, and in equities. In Germany, by contrast, the funds remain part of the enterprise's assets.

### **Information and IT risks**

The BMW Group protects data, business secrets and innovative developments against unauthorized access, damage and misuse using security measures appropriate to the risk involved. These measures encompass manual, process design and IT controls.

Group directives are in place requiring employees to handle information appropriately and ensure that information systems are properly used. Targeted communication measures increase employees' awareness of security requirements.

The protection of information and data is an integral component of business processes and is achieved within the BMW Group by applying international security standards. Together with the related IT infrastructure, the group's core process "Product development" has been audited and certified to international security standard (ISO 27001/17799). Certification had already been received back in 2003 and was again achieved in 2006.

The technical data protection procedures used by the BMW Group include process-specific security measures as well as standard activities such as virus scanners, firewall systems and access controls at operating system and application level.

Protecting BMW Group-specific know-how is also treated as a major issue as far as cooperation arrangements and relationships with partner companies are concerned. The BMW Group protects its intellectual property by ensuring that the relevant departments have clear instructions regarding data protection and the use of information technology. Information underlying key areas of expertise is especially protected. In addition, staff members working in IT functions are increasingly receiving specific training in the area of data protection.

### **3. Risks relating to the Notes**

#### **General Risks Relating to the Notes**

##### *Independent Review and Advice*

Each prospective investor of Notes must determine, based on its own independent review and such professional advice as it deems appropriate under the circumstances, that its acquisition of the Notes is fully consistent with its (or if it is acquiring the Notes in a fiduciary capacity, the beneficiary's) financial needs, objectives and condition, complies and is fully consistent with all investment policies, guidelines and restrictions applicable to it (whether acquiring the Notes as principal or in a fiduciary capacity) and is a fit, proper and suitable investment for it (or if it is acquiring the Notes in a fiduciary capacity, for the beneficiary), notwithstanding the clear and substantial risks inherent in investing in or holding the Notes.

A prospective investor may not rely on the Issuers, the Guarantor or the Dealer(s) or any of their respective affiliates in connection with its determination as to the legality of its acquisition of the Notes or as to the other matters referred to above.

##### *There is no active Secondary/Trading Market for the Notes*

Notes issued under the Programme will be new securities which may not be widely distributed and for which there is currently no active trading market (unless in the case of any particular Tranche, such Tranche is to be consolidated with and form a single series with a Tranche of Notes which is already issued). If the Notes are traded after their initial issuance, they may trade at a discount to their initial offering price, depending upon prevailing interest rates, the market for similar securities, general economic conditions and the financial condition of the relevant Issuer and the Guarantor. Although, in relation to Notes issued under this Programme application may be made to the Luxembourg Stock Exchange for such Notes to be admitted to trading on the regulated market of the Luxembourg Stock Exchange, or to other or further stock exchanges as may be, agreed between the relevant Issuer and the relevant Dealer(s) in relation to each Tranche, as specified in the relevant Final Terms, there is no assurance that such applications will be accepted, that any particular Tranche of Notes will be so admitted or that an active trading market will develop. Accordingly, there is no assurance as to the development or liquidity of any trading market for any particular Tranche of Notes.

*Because Global Notes representing the Notes are held by or on behalf of Clearstream Luxembourg or Euroclear, investors will have to rely on their procedures for transfer, payment and communication with the relevant Issuer and/or the Guarantor*

Notes issued under the Programme may be represented by one or more Global Notes. Such Global Notes will be deposited with a Common Depositary for Clearstream Luxembourg and/or Euroclear or with a Common Safekeeper, as the case may be. Investors will not be entitled to receive definitive Notes. Clearstream Luxembourg and Euroclear will maintain records of the co-ownership participations in the Global Notes. While the Notes are represented by one or more Global Notes, investors will be able to trade their coownership participations only through Clearstream Luxembourg and/or Euroclear.

While the Notes are represented by one or more Global Notes the Issuer and the Guarantor will discharge their payment obligations under the Notes by making payments to the Common Depositary for Clearstream Luxembourg and Euroclear or to the Common Safekeeper, as the case may be, for distribution to their account holders. A holder of a co-ownership participation in a Global Note must rely on the procedures of Clearstream Luxembourg and Euroclear to receive payments under the relevant Notes. The Issuer and the Guarantor have no responsibility or liability for the records relating to, or payments made in respect of, the co-ownership participations in the Global Notes.

Holders of co-ownership participations in the Global Notes will not have a direct right to vote in respect of the relevant Notes. Instead, such holders will be permitted to act only to the extent that they are enabled by Clearstream Luxembourg and Euroclear to appoint appropriate proxies.

##### *Provision of Information*

None of the Issuers, the Guarantor, the Dealer(s) or any of their respective affiliates makes any representation as to an index. Any of such persons may have acquired, or during the term of the

Notes may acquire, non-public information with respect to an index that is or may be material in the context of Index-Linked Notes. The issue of Index-Linked Notes will not create any obligation on the part of any such persons to disclose to the Noteholders or any other party such information (whether or not confidential).

#### *Potential Conflicts of Interest*

Each of the Issuers, the Guarantor, the Dealer(s) or their respective affiliates may deal with and engage generally in any kind of commercial or investment banking or other business with any issuer of the securities taken up in an index, their respective affiliates or any guarantor or any other person or entities having obligations relating to any issuer of the securities taken up in an index or their respective affiliates or any guarantor in the same manner as if any Index-Linked Notes issued under the Programme did not exist, regardless of whether any such action might have an adverse effect on an issuer of the securities taken up in the index, any of their respective affiliates or any guarantor.

The Issuer may from time to time be engaged in transactions involving an index or related derivatives which may affect the market price, liquidity or value of the Notes and which could be deemed to be adverse to the interests of the Noteholders.

Potential conflicts of interest may arise between the calculation agent, if any, for a Tranche of Notes and the Noteholders, including with respect to certain discretionary determinations and judgements that such calculation agent may make pursuant to the Terms and Conditions that may influence the amount receivable upon redemption of the Notes.

#### *Exchange Rates*

Prospective investors of the Notes should be aware that an investment in the Notes may involve exchange rate risks. The reference assets or the Notes may be denominated in a currency other than the currency of the purchaser's home jurisdiction; and/or the reference assets or the Notes may be denominated in a currency other than the currency in which a purchaser wishes to receive funds. Exchange rates between currencies are determined by factors of supply and demand in the international currency markets which are influenced by macro economic factors, speculation and central bank and government intervention (including the imposition of currency controls and restrictions). Fluctuations in exchange rates may affect the value of the Notes or the reference assets.

#### *Legality of Purchase*

Neither the Issuers, the Guarantor, the Dealer(s) nor any of their respective affiliates has or assumes responsibility for the lawfulness of the acquisition of the Notes by a prospective investor of the Notes, whether under the laws of the jurisdiction of its incorporation or the jurisdiction in which it operates (if different), or for compliance by that prospective investor with any law, regulation or regulatory policy applicable to it.

#### *Taxation*

Potential purchasers and sellers of the Notes should be aware that they may be required to pay taxes or other documentary charges or duties in accordance with the laws and practices of the country where the Notes are transferred or other jurisdictions. In some jurisdictions, no official statements of the tax authorities or court decisions may be available for innovative financial Notes such as the Notes. Potential investors are advised not to rely upon the tax summary contained in this document and/or in the Final Terms but to ask for their own tax adviser's advice on their individual taxation with respect to the acquisition, sale and redemption of the Notes. Only these advisors are in a position to duly consider the specific situation of the potential investor. This investment consideration has to be read in connection with Part D ("Taxation") of this Prospectus and the additional tax sections, if any, contained in the relevant Final Terms.

#### *Market Value of the Notes*

The market value of the Notes will be affected by the creditworthiness of the relevant Issuer and the Guarantor and a number of additional factors, including the value of the reference assets or an index, including, but not limited to, the volatility of the reference assets or an index, or the dividend

on the securities taken up in the index, market interest and yield rates and the time remaining to the maturity date.

The value of the Notes, the reference assets or the index depends on a number of interrelated factors, including economic, financial and political events in the Federal Republic of Germany or elsewhere, including factors affecting capital markets generally and the stock exchanges on which the Notes, the reference assets, the securities taken up in the index, or the index are traded. The price at which a Noteholder will be able to sell the Notes prior to maturity may be at a discount, which could be substantial, from the issue price or the purchase price paid by such purchaser. The historical market prices of the reference assets or an index should not be taken as an indication of the reference assets' or an index's future performance during the term of any Note.

#### *Change of Law*

The Terms and Conditions of the Notes are based on German law in effect as of the date of this Prospectus. No assurance can be given as to the impact of any possible judicial decision or change to German law or administrative practice after the date of this Prospectus.

#### **Risks relating to specific types of Notes**

The Programme allows for different types of Notes to be issued. Accordingly, each Tranche of Notes may carry varying risks for potential investors depending on the specific features of such Notes such as, *inter alia*, the provisions for computation of periodic interest payments, if any, redemption and issue price.

#### *The Notes may be redeemed prior to Maturity*

Unless in the case of any particular Tranche of Notes the relevant Final Terms specifies otherwise, in the event that the Issuer or the Guarantor would be obliged to increase the amounts payable in respect of any Notes due to any withholding or deduction for or on account of, any present or future taxes, duties, assessments or governmental charges of whatever nature imposed, levied, collected, withheld or assessed by the country of domicile (or residence for tax purposes) by the relevant Issuer, or on behalf of the Federal Republic of Germany, or any political subdivision thereof or any authority therein or thereof having power to tax, the Issuer may redeem all outstanding Notes in accordance with the Terms and Conditions.

In addition, if in the case of any particular Tranche of Notes the relevant Final Terms specifies that the Notes are redeemable at the Issuer's option in certain other circumstances the Issuer may choose to redeem the Notes at times when prevailing interest rates may be relatively low. During a period when the Issuer may elect, or has elected, to redeem Notes, such Notes may feature a market value not substantially above the price at which they can be redeemed. In such circumstances an investor may not be able to reinvest the redemption proceeds in a comparable security at an effective interest rate as high as that of the relevant Notes.

#### *Fixed Rate Notes*

Investment in Notes which bear interest at a fixed rate involves the risk that subsequent changes in market interest rates may adversely affect the value of the relevant Tranche of Notes.

#### *Floating Rate Notes*

Investment in Notes which bear interest at a floating rate comprise (i) a reference rate (such as EURIBOR or LIBOR) and (ii) a margin to be added or subtracted, as the case may be, from such base rate. Typically, the relevant margin will not change throughout the life of the Notes but there will be a periodic adjustment (as specified in the relevant Final Terms) of the reference rate (e.g., every three months or six months) which itself in accordance with general market conditions. Accordingly, the market value of floating rate Notes may be volatile if changes, particularly shortterm changes, to market interest rates evidenced by the relevant reference rate can only be reflected in the interest rate of these Notes upon the next periodic adjustment of the relevant reference rate.

#### *Inverse Floating Rate Notes*

Investment in Notes which bear interest at an inverse floating rate comprise (i) a fixed base rate minus (ii) a reference rate (such as EURIBOR or LIBOR). The market value of such Notes typically

is more volatile than the market value of Floating Rate Notes based on the same reference rate (and with otherwise comparable terms). Inverse Floating Rate Notes are more volatile because an increase in the reference rate not only decreases the interest rate of the Notes, but may also reflect an increase in prevailing interest rates, which further adversely affects the market value of these Notes.

#### *Fixed to Floating Rate Notes*

Fixed to Floating Rate Notes may bear interest at a rate that the Issuer may elect to convert from a fixed rate to a floating rate, or from a floating rate to a fixed rate. The Issuer's ability to convert the interest rate will affect the secondary market and the market value of the Notes since the Issuer may be expected to convert the rate when it is likely to produce a lower overall cost of borrowing. If the Issuer converts from a fixed rate to a floating rate, the spread on the Fixed to Floating Rate Notes may be less favourable than then prevailing spreads on comparable Floating Rate Notes tied to the same reference rate. In addition, the new floating rate at any time may be lower than the rates on other Notes. If the Issuer converts from a floating rate to a fixed rate, the fixed rate may be lower than then prevailing rates on its Notes.

#### *Notes issued at a substantial discount or premium*

The market values of securities issued at a substantial discount or premium from their principal amount tend to fluctuate more in relation to general changes in interest rates than do prices for conventional interest-bearing securities. Generally, the longer the remaining term of the securities, the greater the price volatility as compared to conventional interest-bearing securities with comparable maturities.

#### *Index-Linked Notes*

Index-Linked Notes are debt securities which do not provide for predetermined redemption amounts (in the case of Index-Linked Redemption Notes) and/or interest payments (in the case of Index-Linked Interest Notes) but amounts due in respect of principal and/or interest will be dependent upon the performance of an index, which itself may contain substantial credit, interest rate or other risks. The amount of principal and/or interest, if any, payable by the Issuer might be substantially less than the issue price or, as the case may be, the purchase price invested by the Noteholder and may even be zero in which case the Noteholder may lose his entire investment.

Index-Linked Notes are not in any way sponsored, endorsed, sold or promoted by the index sponsor or the respective licensor of the index and such index sponsor or licensor makes no warranty or representation whatsoever, express or implied, either as to the results to be obtained from the use of the index and/or the figure at which the index stands at any particular time. Each index is determined, composed and calculated by its respective index sponsor or licensor, without regard to the Issuer or the Notes. None of the index sponsors or licensors is responsible for or has participated in the determination of the timing of, prices at, or quantities of the Notes to be issued or in determination or calculation of the equation by which the Notes settle into cash. None of the index sponsors or licensors has any obligation or liability in connection with the administration, marketing or trading of the Notes. The index sponsor or licensor of an index has no responsibility for any calculation agency adjustment made for the index.

## **ISSUE PROCEDURES**

The relevant Issuer and (in case of an issue of Notes by BMW Finance, BMW US Capital, BMW Coordination Center, BMW Australia Finance, BMW UK Capital or BMW Japan) BMW AG (in its capacity as Guarantor) and the relevant Dealer(s) will agree on the terms and conditions applicable to each particular Tranche of Notes (the "Conditions"). The Conditions will be constituted by the terms and conditions of the relevant Notes set out below (the "Terms and Conditions") as completed, modified or replaced by the provisions of the Final Terms (the "Final Terms"). The Final Terms relating to each Tranche of Notes will specify whether the Conditions are to be Long-Form Conditions or Integrated Conditions (each as described below).

As to whether Long-Form Conditions or Integrated Conditions will apply, the relevant Issuer and (in case of an issue of Notes by BMW Finance, BMW US Capital, BMW Coordination Center, BMW Australia Finance, BMW UK Capital or BMW Japan) BMW AG (in its capacity as Guarantor) anticipate that:

- Long-Form Conditions will generally be used for Notes sold on a non-syndicated basis and which are not publicly offered.
- Integrated Conditions will generally be used for Notes sold and distributed on a syndicated basis. Integrated Conditions will be required where the Notes are to be publicly offered, in whole or in part, or are to be distributed, in whole or in part, to non-professional investors.

The Final Terms for each Tranche of Notes will specify whether the German language or the English language version of the Terms and Conditions for such Notes will be the binding version.

As to the binding language of the respective Conditions, the relevant Issuer anticipates that, in general, subject to any stock exchange or legal requirements applicable from time to time, and unless otherwise agreed between the relevant Issuer and the relevant Dealer(s):

- in the case of Notes which are publicly offered and sold and distributed on a syndicated basis, German will be the binding language;
- in the case of Notes which are publicly offered, in whole or in part, in Germany, or distributed, in whole or in part, to non-professional investors in Germany, German will be the binding language. If, in the event of such public offer or distribution to non-professional investors, however, English is chosen as the binding language, a German language translation of the Conditions will be provided.

### *Long-Form Conditions*

If the Final Terms specify that Long-Form Conditions are to apply to the Notes, the provisions of the applicable Final Terms and the Terms and Conditions, taken together, shall constitute the Conditions. Such Conditions will be constituted as follows:

- the blanks in the provisions of the Terms and Conditions which are applicable to the Notes will be deemed to be completed by the information contained in the Final Terms as if such information were inserted in the blanks of such provisions;
- the Terms and Conditions will be modified, completed or replaced by the text of any provisions of the Final Terms modifying, completing or replacing, in whole or in part, the provisions of the Terms and Conditions;
- alternative or optional provisions of the Terms and Conditions as to which the corresponding provisions of the Final Terms are not completed or are deleted will be deemed to be deleted from the Conditions; and
- all instructions and explanatory notes set out in square brackets in the Terms and Conditions and any footnotes and explanatory text in the Final Terms will be deemed to be deleted from the Conditions.

Where Long-Form Conditions apply, each Global Note representing the Notes of the relevant Tranche will have the Final Terms and the Terms and Conditions attached. Where Definitive Notes are delivered in respect of a Tranche of Notes, they will have endorsed thereon either (i) the Final Terms and the Terms and Conditions in full, (ii) the Final Terms and the Terms and Conditions in a form simplified by the deletion of non-applicable provisions, or (iii) Integrated Conditions, as the

relevant Issuer and (in case of an issue of Notes by BMW Finance, BMW US Capital, BMW Coordination Center, BMW Australia Finance, BMW UK Capital or BMW Japan) BMW AG (in its capacity as Guarantor) may determine.

#### *Integrated Conditions*

If the Final Terms specify that Integrated Conditions are to apply to the Notes, the Conditions in respect of such Notes will be constituted as follows:

- all of the blanks in all applicable provisions of the Terms and Conditions will be completed according to the information contained in the Final Terms and all non-applicable provisions of the Terms and Conditions (including the instructions and explanatory notes set out in square brackets) will be deleted; and/or
- the Terms and Conditions will be otherwise modified, completed or replaced, in whole or in part, according to the information set forth in the Final Terms.

Where Integrated Conditions apply, the Integrated Conditions alone will constitute the Terms and Conditions. The Integrated Conditions will be attached to each Global Note representing Notes of the relevant Tranche and will be endorsed on any Definitive Notes exchanged for any such Global Note.

#### *ISDA Definitions*

Index-Linked Notes will be governed by terms which may be extracted and have substantially the same meaning as set forth in the 2002 ISDA Equity Derivatives Definitions, published by the International Swaps and Derivatives Association, Inc. (the "ISDA Definitions").

Falls die Emittentin die Schuldverschreibungen bei Fälligkeit nicht einlöst, endet die Verzinsung des ausstehenden Nennbetrages der Schuldverschreibungen nicht an dem Tag, der dem Tag der Fälligkeit vorangeht, sondern erst an dem Tag, der dem Tag der tatsächlichen Rückzahlung der Schuldverschreibungen vorangeht. "Bildschirmseite" bedeutet **[Bildschirmseite einfügen]**.

Wenn im vorstehenden Fall (b) auf der maßgeblichen Bildschirmseite fünf oder mehr Angebotssätze angezeigt werden, werden der höchste (falls mehr als ein solcher Höchstsatz angezeigt wird, nur einer dieser Sätze) und der niedrigste (falls mehr als ein solcher Niedrigstsatz angezeigt wird, nur einer dieser Sätze) von der Berechnungsstelle für die Bestimmung des arithmetischen Mittels der Angebotssätze (das wie vorstehend beschrieben auf- oder abgerundet wird) außer Acht gelassen; diese Regel gilt entsprechend für diesen gesamten Absatz (2).

Der Zinsbetrag wird ermittelt, indem der Zinssatz und der Zinstagequotient (wie nachstehend definiert) auf jede festgelegte Stückelung angewendet werden, wobei der resultierende Betrag **[falls die festgelegte Währung Euro ist einfügen:** auf den nächsten Euro 0,01 auf oder abgerundet wird, wobei Euro 0,005 aufgerundet werden] **[falls die festgelegte Währung nicht Euro ist, einfügen:** auf die kleinste Einheit der festgelegten Währung auf- oder abgerundet wird, wobei 0,5 solcher Einheiten aufgerundet werden].

**[Bei Schuldverschreibungen der BMW US Capital, LLC einfügen:**

**[(3)]** *Vorzeitige Rückzahlung aufgrund von Meldepflichten.* Wenn die Emittentin feststellt, dass bei außerhalb der Vereinigten Staaten durch sie selbst oder eine Zahlstelle erfolgenden Zahlungen von Kapital (wobei dieser Begriff ein eventuelles Aufgeld beinhaltet: "Kapital") oder Zinsen aufgrund von Schuldverschreibungen die Leistung des vollen Betrages zum nächsten anstehenden Zahlungstermin aufgrund gegenwärtiger oder künftiger Gesetze oder Verordnungen der Vereinigten Staaten die Erfüllung einer Bescheinigungs-, Informations- oder sonstigen Berichtspflicht ("Meldepflicht") voraussetzt, und diese Meldepflicht dazu führt, dass der Emittentin, einer Zahlstelle oder einer Behörde die Nationalität, der Wohnsitz oder die Identität eines wirtschaftlichen Eigentümers dieser Schuldverschreibungen, der U.S.-Steuerausländer (wie nachstehend definiert) ist, offen zu legen ist, verpflichtet sich die Emittentin, diejenigen Schuldverschreibungen vorzeitig zurückzuzahlen, die von Personen gehalten werden, welche von der Meldepflicht betroffen sind, es sei denn, die Emittentin wählt das Verfahren nach Absatz **[6]** dieses § 5. Als Meldepflicht in diesem Sinn gilt nicht ein Erfordernis, das (i) auf Zahlungen an einen Verwahrer, Treuhänder oder sonstigen Beauftragten ("Beauftragter") des wirtschaftlichen Eigentümers keine Anwendung findet oder das dadurch erfüllt werden kann, dass der Beauftragte bestätigt, dass der wirtschaftliche Eigentümer ein U.S.-Steuerausländer ist (vorausgesetzt, dass in jedem Fall die Zahlung durch den Beauftragten des wirtschaftlichen Eigentümers nicht sonst Gegenstand von einer Meldepflicht ist), (ii) nur für Zahlungen eines Beauftragten des wirtschaftlichen Eigentümers an diesen letzteren gilt, (iii) bei Zahlungen durch eine andere Zahlstelle keine Anwendung finden würde oder (iv) auf Zahlungen an einen Beauftragten des wirtschaftlichen Eigentümers deshalb Anwendung findet, weil der Beauftragte seinerseits US-Person ist oder sonstige Verbindungen zu den Vereinigten Staaten hat. Die Tilgung der Schuldverschreibungen muss innerhalb eines Jahres nach Mitteilung der Feststellung der Emittentin gemäß Absatz **[4]** Satz 1 zum Nennbetrag zuzüglich aufgelaufener Zinsen erfolgen.

**[(4)]** *Bekanntmachung der Meldepflicht.* Wenn die Emittentin eine schriftliche Mitteilung einer Zahlstelle oder irgendeiner anderen Stelle erhält, dass eine Meldepflicht besteht, hat die Emittentin dies umgehend entsprechend § 12 bekannt zu machen, und zwar ohne eine selbständige Nachprüfung der Richtigkeit der Feststellung der Meldepflicht durch die Zahlstelle oder der anderen Stelle. Eine Tilgung gemäß Absatz **[3]** erfolgt nach Kündigung unter Einhaltung einer Frist von wenigstens 60 Tagen zum ersten Tag eines Kalendermonats. Die Kündigung erfolgt durch Bekanntmachung gemäß § 12. Sie muss den Tilgungstermin angeben und ist, vorbehaltlich Absatz **[5]**, unwiderruflich.

**[(5)]** *Bekanntmachung fehlender Meldepflicht.* Falls die Emittentin spätestens 30 Tage vor dem vorgesehenen Tilgungstermin feststellt, dass für die in Absatz 2 genannten Zahlungen eine Meldepflicht nicht gilt und somit eine Kündigung mangels eines Kündigungsgrundes nicht wirksam erfolgen konnte, wird die Emittentin eine solche Feststellung unverzüglich gemäß § 12 öffentlich mitteilen. In dieser Mitteilung ist seitens der Emittentin auf das Fortbestehen der Rechte und Pflichten aus den Schuldverschreibungen hinzuweisen. Die zuvor erfolgte Kündigung gilt mit der Bekanntmachung dieser Feststellung als widerrufen und wirkungslos.

**[(6)]** *Zahlung zusätzlicher Beträge.* Soweit und solange einer Meldepflicht in vollem Umfang durch Zahlung einer Quellensteuer oder ähnlichen Abgabe, ohne Offenlegung von Staatsangehörigkeit, Wohnsitz oder Identität des wirtschaftlichen Eigentümers von Schuldverschreibungen Genüge getan werden kann, ist die Emittentin nach ihrer Wahl berechtigt, sofern die Mitteilung der Feststellung gemäß Absatz **[4]** Satz 1 noch nicht erfolgt ist, von einer vorzeitigen Tilgung der Schuldverschreibungen abzusehen und stattdessen, vorbehaltlich nachstehendem Satz 2 dieses Absatzes **[6]**, die zusätzlichen Beträge zu zahlen, die dazu erforderlich sind, dass Zahlungen außerhalb der Vereinigten Stataten durch die Emittentin oder eine Zahlstelle an die Inhaber von Schuldverschreibungen, die U.S.-Steuerausländer sind, in der Höhe erfolgen, dass der nach Abzug einer solchen Quellensteuer oder ähnlichen Abgabe verbleibende Nettobetrag denjenigen Beträgen von Zinsen und Kapital, die auf den Schuldverschreibungen angegeben sind, entspricht. In einem solchen Fall ist die Emittentin nicht verpflichtet, Zahlungen auf oder wegen Quellensteuer oder ähnlicher Abgaben zu zahlen, die (i) analog der Regelung in Absatz **[3]** Satz 2 in einem der dort genannten Fälle nicht oder nur mit den dort bezeichneten Einschränkungen anfallen würden oder (ii) dann nicht angefallen wären, wenn der Inhaber von Schuldverschreibungen binnen 15 Tagen (a) nach Fälligkeit bzw., wenn dies später sein sollte, (b) nach dem Tag, an dem der Emissionsstelle alle dann fälligen Beträge zur Verfügung gestellt wurden und dies gemäß § 12 bekannt gemacht wurde, die Schuldverschreibungen zur Zahlung vorgelegt hätte oder (iii) die nur deshalb anfallen, weil Emittentin oder eine der Zahlstellen davon Kenntnis haben, dass der wirtschaftliche Eigentümer der Schuldverschreibung eine Person wie in § 7 Absatz (2) (a) oder (h) ist.

Falls die Emittentin gemäß diesem Absatz **[6]** irgendwelche zusätzlichen Beträge aufgrund von Quellensteuer oder ähnlichen Abgaben bezahlt, kann sie die Schuldverschreibungen dennoch gemäß Absatz **[4]** Satz 2 und 3 kündigen, wenn aufgrund einer Änderung von Gesetzen oder Verordnungen der Vereinigten Stataten diese Quellensteuer oder ähnliche Abgabe erhöht wird.

**[(7)]** *Definitionen.* Im Sinne dieser Emissionsbedingungen bezeichnet "Vereinigte Staaten" die Vereinigten Staaten von Amerika (einschließlich deren Bundesstaaten und des "District of Columbia") sowie deren Territorien und Besitzungen und sonstige ihrer Jurisdiktion unterliegenden Gebiete; "U.S.-Personen" alle Staatsangehörigen oder Gebietsansässigen der Vereinigten Staaten von Amerika, einschließlich Kapitalgesellschaften (oder anderen Rechtsgebilden, die im Sinne der Bundes-Einkommensteuer der Vereinigten Stataten als Kapitalgesellschaften behandelt werden) oder Personengesellschaften, die in den Vereinigten Stataten oder einer ihrer Gebietskörperschaften oder nach deren Recht gegründet oder organisiert sind, Erbmassen, deren Einkünfte unabhängig von der Quelle ihrer Einkünfte der Bundes-Einkommensteuer der Vereinigten Stataten unterliegen und Treuhandvermögen (Trust), wenn ein Gericht der Vereinigten Stataten imstande ist, die primäre Aufsicht über die Verwaltung des Treuhandvermögens auszuüben und eine oder mehrere U.S.-Personen die Befugnis haben, alle wesentlichen Entscheidungen des Treuhandvermögens zu kontrollieren; und "U.S.-Steuerausländern" sind alle Personen oder juristische Personen zu verstehen, die im Sinne der Bundes-Einkommensteuer der Vereinigten Staaten ausländische Kapitalgesellschaften, gebietsfremde ausländische natürliche Personen, ausländische Erbmassen oder Treuhandvermögen, die der Besteuerung gem. Section 1441 oder 1442 des Internal Revenue Code von 1986, in der jeweils gültigen Fassung, unterliegen, oder ausländische Personengesellschaften sind, letztere unter der Voraussetzung, dass einer oder mehrere Gesellschafter im Sinne der Bundes-Einkommensteuer der Vereinigten Stataten ausländische Kapitalgesellschaften, gebietsfremde ausländische natürliche Personen oder ausländische Erbmassen oder Treuhandvermögen sind, die der Besteuerung gem. Section 1441 oder 1442 des Internal Revenue Code von 1986, in der jeweils gültigen Fassung, unterliegen.]

Eine solche Kündigung hat gemäß § 12 zu erfolgen. Sie ist unwiderruflich, muss den für die Rückzahlung festgelegten Termin nennen und eine zusammenfassende Erklärung enthalten, welche die das Rückzahlungsrecht der Emittentin begründenden Umstände darlegt.]

Die Ausübung des Wahlrechts kann nicht widerrufen werden. Um das Recht, Rückzahlung verlangen zu können, auszuüben,

Any such notice shall be given in accordance with § 12. It shall be irrevocable, must specify the date fixed for redemption and must set forth a statement in summary form of the facts constituting the basis for the right of the Issuer so to redeem.

**[For Notes issued by BMW US Capital, LLC insert:**

**[(3)]** *Early Redemption due to Reporting Requirements.* If the Issuer determines that any payment made outside the United States of America by BMW US Capital or any of the Paying Agents of the full amount of the next scheduled payment of principal (which expressions shall include *agio*, if any, "Principal") or interest in respect of any Note would, under any present or future laws or regulations of the United States of America be subject to any certification, information or other reporting requirement of any kind ("Reporting Requirement"), the effect of which Reporting Requirement is the disclosure to the Issuer, a Paying Agent or any governmental authority of the nationality, residence or identity of a beneficial owner of such Note who is a U.S. Alien (as defined below), the Issuer shall be obliged to prematurely redeem only those Notes held by persons affected by the Reporting Requirements, unless the Issuer otherwise chooses to follow the procedure in paragraph **[(6)]** of this § 5. A Reporting Requirement within the meaning of these Terms and Conditions of the Notes is not such a requirement which (i) would not be applicable to a payment made to a custodian, nominee or other agent ("Agent") of the beneficial owner or which can be satisfied by such Agent certifying to the effect that such beneficial owner is a U.S. Alien (provided, however, that in each case the payment by an Agent of the beneficial owner is not otherwise subject to a Reporting Requirement), (ii) is applicable only to a payment by an Agent of such beneficial owner to the beneficial owner, (iii) would not be applicable to a payment made by any other Paying Agent, or, (iv) is applicable to a payment to an Agent of such beneficial owner because such Agent is a U.S. Person or otherwise related to the United States of America. The redemption of the Notes shall take place within one year after the publication of notice of the determination by the Issuer pursuant to paragraph **[(4)]**, sentence 1 at par plus accrued interest.

**[(4)]** *Notice of Reporting Requirement.* Upon receipt by the Issuer of an actual written notice from a Paying Agent or any other entity that a Reporting Requirement is applicable, then, and without any further verification of the correctness of the determination made by the Paying Agent or such entity, the Issuer shall give prompt notice thereof in accordance with § 12. A redemption pursuant to paragraph **[(3)]** shall be effective on the first day of a calendar month upon at least 60 days' notice. The notice of redemption shall be given by publication in accordance with § 12. It shall specify the date fixed for redemption and shall, subject to paragraph **[(5)]**, be irrevocable.

**[(5)]** *Notice of No Reporting Requirement.* If the Issuer shall not less than 30 days prior to the date fixed for redemption determine that no payment pursuant to paragraph **[(3)]** would be subject to a Reporting Requirement, and, therefore, a notice of redemption could not be validly given due to a lack of grounds, the Issuer shall give prompt notice of such determination pursuant to § 12. In this notice, the Issuer shall state explicitly the continuation of all rights and obligations arising under the Notes. The notice of redemption given previously shall with the publication of such determination be revoked and of no further effect.

**[(6)]** *Payment of Additional Amounts.* If and so long as a Reporting Requirement would be fully satisfied by payment of a withholding tax or similar Charge, without disclosure of the nationality, residence or identity of any beneficial owner of Notes, the Issuer may elect, prior to publication of the notice of determination referred to in the first sentence of paragraph **[(4)]**, not to redeem the Notes and, in lieu of such redemption of the Notes, to pay (subject to the provisions of the following sentence 2 of this paragraph **[(6)]**) such additional amounts as may be necessary in order that payments outside the USA by the Issuer or any Paying Agent to Noteholders who are U.S. Aliens shall be in such amount that the net amounts after such deduction of a withholding tax or similar Charge shall equal the respective amounts of interest and principal stated on the Notes. In such event, the Issuer shall not be obliged to effect any payment for or on account of any withholding tax or similar Charge which (i) by analogous application of the provisions of the second sentence of paragraph **[(3)]** above and under circumstances referred to in such sentence, would not be applicable or only be applicable with the restrictions referred to in such sentence, or (ii) would not be applicable if the Noteholder had made presentation of the Notes for payment within 15 days after (a) the date on which payment became due or (b) the date on which the relevant Paying Agent has been provided with all monies due on such date and a notice to that effect has been published in accordance with § 12, whichever occurs later, or (iii) is applicable because of the fact that the Issuer or any Paying Agent has actual knowledge that the beneficial owner of the Notes is a person described in sub paragraphs (a) or (h) of paragraph 2 of § 10.

If the Issuer is paying any additional amounts because of withholding tax or a similar Charge pursuant to this paragraph [(6)], it may nevertheless redeem the Notes in accordance with paragraph [(4)] sentences 2 and 3 if, following a change of laws or regulations of the USA, the amount of such withholding tax or similar Charge is increased.

## **SELLING RESTRICTIONS**

### **1. General**

Each Dealer acknowledges and each further Dealer will be required to acknowledge that no action has been or will be taken in any jurisdiction by any Issuer that would permit a public offering of Notes, or possession or distribution of any offering material in relation thereto, in any country or jurisdiction where action for that purpose is required. Each Dealer will comply, to the best of its knowledge and belief, with all applicable laws and regulations (including any amendments, changes or modifications thereto from time to time) in each country or jurisdiction in which it purchases, offers, sells or delivers Notes or has in its possession or distributes such offering material and will obtain any consent, approval or permission required by it for the purchase, offer, sale or delivery by it in each such country or jurisdiction, in all cases at its own expense, and neither the Issuer nor any other Dealer shall have responsibility therefor. Neither the Issuer nor any of the Dealers represents that Notes may at any time lawfully be sold in compliance with any applicable laws and regulations in any jurisdiction, or pursuant to any exemption thereunder, or assumes any responsibility for facilitating such sale.

### **2. European Economic Area**

In relation to each Member State of the European Economic Area which has implemented the Prospectus Directive (each, a “Relevant Member State”), each Dealer has represented and agreed, and each further Dealer appointed under the Programme will be required to represent and agree, that with effect from and including the date on which the Prospectus Directive is implemented in that Relevant Member State (the “Relevant Implementation Date”) it has not made and will not make an offer of Notes to the public in that Relevant Member State except that it may, with effect from and including the Relevant Implementation Date, make an offer of Notes to the public in that Relevant Member State:

- (i) in the period beginning on the date of publication of a prospectus in relation to those Notes which has been approved by the competent authority in that Relevant Member State in accordance with the Prospectus Directive or, where appropriate, published in another Member State and notified to the competent authority in that Relevant Member State, in accordance with Article 18 of the Prospectus Directive and ending on the date which is 12 months after the date of such publication;
- (ii) at any time to legal entities which are authorised or regulated to operate in the financial markets or, if not so authorised or regulated, whose corporate purpose is solely to invest in securities;
- (iii) at any time to any legal entity which has two or more of (1) an average of at least 250 employees during the last financial year; (2) a total balance sheet of more than €43,000,000 and (3) an annual net turnover of more than €50,000,000, as shown in its last annual or consolidated accounts; or
- (iv) at any time in any other circumstances which do not require the publication by the Issuer of a prospectus pursuant to Article 3 of the Prospectus Directive.

For the purposes of this provision, the expression an “offer of Notes to the public” in relation to any Notes in any Relevant Member State means the communication in any form and by any means of sufficient information on the terms of the offer and the Notes to be offered so as to enable an investor to decide to purchase or subscribe the Notes, as the same may be varied in that Member State by any measure implementing the Prospectus Directive in that Member State and the expression “Prospectus Directive” means Directive 2003/71/EC and includes any relevant implementing measure in each Relevant Member State.

### **3. United States of America**

The Notes have not been and will not be registered under the United States Securities Act of 1933, as amended (the “Securities Act”) and may not be offered or sold within the United States (the “United States” or the “U.S.”) or to or for the account or benefit of U.S. persons except pursuant to an exemption from the registration requirements of the Securities Act or in accordance with Regulation S under the Securities Act. Notes are subject to U.S. tax law requirements and may not be offered, sold or delivered within the United States or its possessions or to U.S.

persons, except in certain transactions permitted by U.S. tax law regulations. Each of the Dealers has represented that it, its affiliates and any person acting on its or their behalf (i) has not offered or sold, and will not offer or sell, any Notes constituting part of its allotment within the United States except in accordance with Rule 903 of Regulation S under the Securities Act and (ii) have offered or sold and will offer or sell any Notes only in an offshore transaction as defined in Regulation S. Accordingly, each of the Dealers has represented and agreed that neither it, its affiliates nor any other persons acting on its or their behalf have engaged or will engage in any directed selling efforts in the United States with respect to the Notes, and it and they have complied and will comply with the offering restrictions of Regulation S.

Each of the Dealers has agreed that, at or prior to confirmation of sale of Notes, it will have sent to each distributor, dealer or person receiving a selling concession, fee or other remuneration that purchases Notes from it during the distribution compliance period a confirmation or notice to substantially the following effect:

“The Notes covered hereby have not been registered under the U.S. Securities Act of 1933, as amended (the “Securities Act”) and may not be offered and sold within the United States or to, or for the account or benefit of, U.S. persons (i) as part of their distribution at any time or (ii) otherwise until 40 days after the completion of the distribution of the Tranche of Notes of which such Notes are a part except in either case in accordance with Regulation S under the Securities Act. Terms used above have the meaning given to them by Regulation S.”

Terms used in this paragraph have the meanings given to them by Regulation S.

- I. For Notes with maturities of 365 days or more the following shall apply where each of the Issuer and the paying agent is a non-U.S. payor or non-U.S. middleman as defined in U.S. Treas. Regulation § 1.6049-5(c)(5):

In addition, under U.S. Treas. Reg. § 1.163-5(c)(2)(i)(C) (the “C Rules”), the Notes with a maturity (at issue) of 365 days or more must be issued and delivered outside the United States and its possessions in connection with their original issuance. The Dealer has represented that it has not offered, sold or delivered, and has agreed that it will not offer, sell or deliver, directly or indirectly, the Notes within the United States or its possessions in connection with their original issuance. Further, in connection with the original issuance of the Notes, the Dealer represents that it has not communicated, and agrees that it will not communicate, directly or indirectly, with a prospective purchaser who is within the United States or its possessions, nor has it, directly or indirectly, through any of its U.S. offices communicated nor will it communicate with any prospective purchaser or otherwise involve a United States office in the offer or sale of the Notes. The Dealer has represented that it will not advertise or otherwise promote the Notes in the United States or its possessions.

- II. For (i) all Notes issued by an issuer other than BMW US Capital, LLC where the paying agent is a U.S. payor or a U.S. middleman as defined in U.S. Treas. Reg. § 1.6049-5(c)(5) and (ii) all Notes issued by BMW US Capital, LLC, the following shall apply:

In addition,

- (1) except to the extent permitted under U.S. Treas. Reg. § 1.163-5(c)(2)(i)(D) (the “D Rules”), each of the Dealers has represented and agreed that it (a) has not offered or sold, and during the restricted period will not offer or sell, Notes to a person who is within the United States of America or its possessions or to a United States person and (b) has not delivered and will not deliver within the United States of America or its possessions definitive Notes that are sold during the restricted period;
- (2) each of the Dealers has represented and agreed that it has and throughout the restricted period will have in effect procedures reasonably designed to ensure that its employees or agents who are directly engaged in selling Notes in bearer form are aware that such Notes may not be offered or sold during the restricted period to a person who is within the United States of America or its possessions or to a United States person, except as permitted by the D Rules;
- (3) if one of the Dealers is a United States person, it has represented and agreed that it is acquiring the Notes for purposes of resale in connection with their original issuance and

if one of the Dealers retains Notes for its own account, it will only do so in accordance with the requirements of U.S. Treas. Reg. § 1.163-5(c)(2)(i)(D)(6); and

- (4) with respect to each affiliate that acquires from a Dealer Notes for the purpose of offering or selling such Notes during the restricted period, such Dealer has represented and agreed that it either (a) repeats and confirms the representations and agreements contained in clauses (1), (2) and (3) on its behalf or (b) agrees that it will obtain from such affiliate for the Issuer's benefit the representations and agreements contained in clauses (1), (2) and (3).

Terms used in these paragraphs I. and II. have the meanings given to them by the U.S. Internal Revenue Code and regulations thereunder, including the C Rules and D Rules. The term "Dealers" used in these paragraphs I. and II. includes each further Dealer appointed under the Programme.

#### **4. United Kingdom**

Each Dealer has represented and agreed, and each further Dealer appointed under the Programme will be required to represent and agree, that:

- (a) in relation to any Notes which have a maturity of less than one year, (i) it is a person whose ordinary activities involve it in acquiring, holding, managing or disposing of investments (as principal or agent) for the purposes of its business and (ii) it has not offered or sold and will not offer or sell any Notes other than to persons whose ordinary activities involve them in acquiring, holding, managing or disposing of investments (as principal or as agent) for the purposes of their businesses or who it is reasonable to expect will acquire, hold, manage or dispose of investments (as principal or agent) for the purposes of their businesses where the issue of the Notes would otherwise constitute a contravention of Section 19 of the FSMA by the Issuer;
- (b) it has only communicated or caused to be communicated and will only communicate or cause to be communicated an invitation or inducement to engage in investment activity (within the meaning of Section 21 of the FSMA) received by it in connection with the issue or sale of any Notes in circumstances in which Section 21(1) of the FSMA does not apply to the Issuer or, in the case of the Guarantor, would not, if it was not an authorised person, apply to the Guarantor; and
- (c) it has complied and will comply with all applicable provisions of the FSMA with respect to anything done by it in relation to any Notes in, from or otherwise involving the United Kingdom.

#### **5. Japan**

Each Dealer has represented and agreed, and each further Dealer appointed under the Programme will be required to represent and agree, that the Notes have not been and will not be listed, registered or publicly offered in Japan under the Securities and Exchange Law of Japan (Law No. 25 of 1948 (as amended)). Accordingly, each Dealer has represented and agreed that it will not offer, sell or deliver any Notes, or any Interest thereon directly or indirectly, in Japan or to any Japanese Person or to others for reoffering or resale, directly or indirectly, in Japan or to, or for the account of any Japanese Person except under circumstances which will result in compliance with all applicable laws, regulations and guidelines promulgated by the relevant governmental and regulatory authorities in effect at the relevant time. For the purposes of this paragraph "Japanese Person" shall mean any person resident in Japan, including any corporation or other entity located in Japan. In addition, each Dealer has agreed and each further Dealer appointed under the Programme will be required to agree to provide necessary information relating to the issue of Notes to the Issuer (which shall not include the name of clients) so that the Issuer may make any required reports to the Japanese Minister of Finance through its designated agent.

#### **6. Republic of Italy**

The offering of the Notes has not been registered pursuant to Italian securities legislation and, accordingly, each Dealer has represented and agreed, and each further Dealer appointed under the Programme will be required to represent and agree, that it has not offered or sold, and will not offer or sell, any Notes in the Republic of Italy in a solicitation to the public, and that sales of the

Notes in the Republic of Italy shall be effected in accordance with all Italian securities, tax and exchange control and other applicable laws and regulation.

Each of the Dealers has represented and agreed, and each further Dealer appointed under the Programme will be required to represent and agree, that it will not offer, sell or deliver any Notes or distribute copies of any document relating to the Notes in the Republic of Italy except:

- (a) to “Professional Investors”, as defined in Article 31.2 of CONSOB Regulation No. 11522 of 1 July 1998, as amended (“CONSOB Regulation No. 11522”), pursuant to Article 30.2 and 100 of Legislative Decree No. 58 of 24 February 1998, as amended (the “Italian Financial Act”); or
- (b) in any other circumstances where an express exemption from compliance with the solicitation restrictions applies, as provided under the Italian Financial Act or Regulation No. 11971 of 14 May 1999, as amended.

Any such offer, sale or delivery of the Notes or any document relating to the Notes in the Republic of Italy must be:

- (i) made by investment firms, banks or financial intermediaries permitted to conduct such activities in the Republic of Italy in accordance with Legislative Decree No. 385 of 1 September 1993 as amended, the Italian Financial Act, CONSOB Regulation No. 11522 and any other applicable laws and regulations; and
- (ii) in compliance with any other applicable notification requirement or limitation which may be imposed by CONSOB or the Bank of Italy.

Investors should also note that, in any subsequent distribution of the Notes in the Republic of Italy, Article 100-bis of the Italian Financial Act may require compliance with the law relating to public offers of securities. Furthermore, where the Notes are placed solely with professional investors and are then systematically resold on the secondary market at any time in the 12 months following such placing, purchasers of Notes who are acting outside of the course of their business or profession may in certain circumstances be entitled to declare such purchase void and to claim damages from any authorised person at whose premises the Notes were purchased, unless an exemption provided for under the Italian Financial Act applies.

## **7. The Netherlands**

In relation to The Netherlands, each Dealer has represented and agreed, and each further Dealer appointed under the Programme will be required to represent and agree it has not made and will not make an offer of Notes to the public in The Netherlands except that it may make an offer of Notes to the public in The Netherlands:

- (i) in the period beginning on the date of publication of a prospectus in relation to those Notes which has been approved by the competent authority in The Netherlands or, where appropriate, approved in another Member State and notified to the competent authority in that Member State, all in accordance with the Prospectus Directive and ending on the date which is 12 months after the date of such publication;
- (ii) at any time in any other circumstances which do not require the publication by the Issuer of a prospectus pursuant to section 53 through 55 of the Exemption Regulation pursuant to the Act on the Financial Supervision (*Vrijstellingsregeling Wet het financieel toezicht*);
- (iii) at any time in any other circumstances which do not require the publication by the Issuer of a prospectus pursuant to section 5:3 of the Act on the Financial Supervision (*Wet op het financieel toezicht*) and if the Notes will only be offered to professional market parties within the meaning of section 1:1 Act on the Financial Supervision.

For the purposes of this provision, the expression an “offer of Notes to the public” in relation to any Notes in The Netherlands means the communication in any form and by any means of sufficient information on the terms of the offer and the Notes to be offered so as to enable an investor to decide to purchase or subscribe the Notes, as the same may be varied in that Member State by any measure implementing the Prospectus Directive in that Member State and the expression “Prospectus Directive” means Directive 2003/71/EC and includes any relevant implementing measure in each Member State.

In addition to the above, if the Issuer issues Zero Coupon Notes and these Zero Coupon Notes are offered in The Netherlands as part of their initial distribution or immediately thereafter:

- (a) transfer and acceptance of such Zero Coupon Notes may only take place either by and between individuals not acting in the course of their profession or business or through the mediation of either a permit holder (*Toegelaten Instelling*) of Euronext Amsterdam N.V. or the Issuer itself in accordance with the Savings Certificate Act of 21 May 1985 (*Wet inzake Spaarbewijzen*); and
- (b) certain identification requirements in relation to the issue and transfer of, and payment on the Zero Coupon Notes have to be complied with pursuant to section 3a of the Savings Certificate Act; and unless such Zero Coupon Notes qualify as commercial paper or certificates of deposit and the transaction is carried out between professional lenders and borrowers;
- (c) each transaction concerning such Zero Coupon Notes must be recorded in a transaction note, stating the name and address of the other party to the transaction, the nature of the transaction and details, including the number and serial number of the Zero Coupon Notes concerned; and
- (d) the obligations referred to under (c) above must be indicated on a legend printed on Zero Coupon Notes that are not listed on a stock market; and
- (e) any reference to the words “to bearer” in any documents or advertisements in which a forthcoming offering of Zero Coupon Notes is publicly announced is prohibited.

For purposes of this paragraph, “Zero Coupon Notes” are Notes to bearer in definitive form that constitute a claim for a fixed sum of money against the Issuer and on which interest does not become due prior to maturity or on which no interest is due whatsoever.

## **8. Commonwealth of Australia**

Each Dealer has understood that no prospectus or other disclosure document in relation to the Notes has been lodged with, or registered by, the Australian Securities and Investments Commission (“ASIC”) or the Australian Stock Exchange Limited. Each Dealer has represented and agreed and each further Dealer appointed under the Programme will be required to represent and agree that it:

- (a) has not offered or invited applications, and will not offer or invite applications, directly and indirectly, for the issue, sale or purchase of the Notes in Australia (and has not, and will not make an offer or invitation which is received by a person in Australia); and
- (b) has not advertised, distributed or published, and will not advertise, distribute or publish, any offer or invitation to apply for the Notes, or any statement that directly or indirectly refers to the offer or invitation or intended offer or invitation or is reasonably likely to induce people to apply for the Notes, the Prospectus or any other offering material or advertisement relating to the Notes in Australia,

unless (i) the minimum aggregate consideration payable by each offeree on acceptance of the offer is at least AUD 500,000 (disregarding any moneys lent by the offeror or its associates) or the offer or invitation otherwise does not require disclosure to investors under Part 6D.2 of the Corporations Act 2001 (Cth) (“Australian Corporations Act”) pursuant to one or more of the exemptions in section 708 of the Australian Corporations Act and (ii) such action complies with all applicable laws and regulations.

Each Dealer has acknowledged that any offers of Notes for sale to investors received in Australia within 12 months after their issue by the Issuer may need disclosure to investors under Part 6D.2 of the Australian Corporations Act, unless such offer for sale in Australia is conducted in reliance on an exemption under section 708 of the Australian Corporations Act.

In addition, each Dealer has agreed that it will not sell Notes to any persons if, at the time of such sale, the employees of the relevant Dealer(s) are aware of, or involved in the sale, knew or had reasonable grounds to suspect that, as a result of such sale, any Notes or any interest in any Notes were being, or would later be, acquired (directly or indirectly) by an offshore associate of

the Issuer (as referred to in the Australian Taxation section of this Prospectus) for the purposes of section 128F(5) of the Income Tax Assessment Act 1936 of Australia (the "Australian Tax Act").

Each Dealer has represented and agreed with the Issuer and each further Dealer appointed under the Programme will be required to represent and agree that:

- (i) it is and at the time of the issue of the Notes, will be acting in the course of carrying on a business of providing finance, or investing or dealing in securities, and in the course of operating in financial markets; and
- (ii) each Note acquired by it will be acquired on the basis of information contained in, and as a result of negotiations initiated following receipt of, this Prospectus; and
- (iii) it is not, an "associate" within the meaning of section 128F(9) of the Australian Tax Act.

Each Dealer has agreed with the Issuers to:

- (i) co-operate with the Issuer with a view to ensuring that Notes are offered for sale in a manner which will allow payments of interest (as defined in section 128A(1AB) of the Australian Tax Act) on the Notes to be exempt from withholding tax under section 128F of the Australian Tax Act. In particular, each Dealer has agreed to provide to the Issuers such confirmation and other evidence reasonably required by the Issuer in order to establish that payments of interest are exempt from withholding tax under section 128F of the Australian Tax Act upon receipt by the Issuer of a request from the Australian Tax Office ("ATO") for specific information (and in the latter case, the Issuer's request must be accompanied by satisfactory evidence of the ATO's request); and
- (ii) provide any information relating to the issuance and distribution of the Notes as may reasonably be required by the Issuer and in order to evidence that payments of interest (as defined in section 128A(1AB) of the Australian Tax Act) are exempt from withholding tax under section 128F of the Australian Tax Act, provided that the relevant Dealer(s) shall not be obliged to disclose the identity of the purchaser of any Note or any information from which such identity would be capable of being ascertained or any information, the disclosure of which could be contrary to, or prohibited by, any relevant law, regulation or directive binding on the relevant Dealer(s).

## **9. Other Jurisdictions**

Each of the Dealers has agreed that it will not offer, sell or deliver any Notes in any other country or jurisdiction except under circumstances that will, to the best of its knowledge and belief, result in compliance with any applicable laws and regulations in force in such jurisdiction in which it offers, sells or delivers the Notes.

## **TAXATION**

The following is a summary of the **withholding taxation** treatment of the Federal Republic of Germany, The Netherlands, Belgium, the United States of America, the Commonwealth of Australia, the United Kingdom, Japan and Luxembourg, respectively, at the date hereof in relation to the payments on the Fixed Rate Notes, Floating Rate Notes, Zero Coupon Notes and certain other Notes which may be issued under the Programme (the "Notes"). It is not exhaustive, and in particular, does not deal with the position of Noteholders other than in relation to withholding tax (for certain non-exhaustive exceptions, see below) in the jurisdictions referred to above, nor with the withholding tax treatment of payments on all forms of Notes which may be issued under the Programme. This summary is based upon the law as in effect on the date of this Prospectus and is subject to any change in law that may take effect after such date and may be retroactively applicable.

**Noteholders who are in any doubt as to their tax position are urged to satisfy themselves as to the overall tax consequences of purchasing, holding and/or selling Notes and/or Coupons/Talons.**

### **EU Savings Directive**

On 3 June 2003, the Council of the European Union ("ECOFIN") approved the Directive regarding the taxation of savings income (the "EU Savings Directive"). The EU Savings Directive entered into force on 1 July 2005. By provisions implementing the EU Savings Directive each of the 25 EU Member States must require paying agents (within the meaning of the EU Savings Directive) established within its territory to automatically provide to the competent authority of this state details of the payment of interest (or other similar income) made to any individual resident in another EU Member State as the beneficial owner. The competent authority of the EU Member State of the paying agent is then required to communicate this information to the competent authority of the EU Member State of which the beneficial owner of the interest is a resident.

For a transitional period, Austria, Belgium and Luxembourg may opt instead to withhold tax from interest payments within the meaning of the EU Savings Directive at a rate of 15 per cent. for the first three years from the date on which the EU Savings Directive comes into effect, of 20 per cent. for the next three years and 35 per cent. thereafter. The afore-mentioned transitional period will terminate at the end of the first fiscal year following the agreement by the non EU-countries and territories referred to below to the exchange of information relating to such payments and the levying of withholding tax on interest income.

The ECOFIN agreed that the provisions to be enacted for implementation of the EU Savings Directive shall be applied by the Member States as from 1 July 2005 subject to (i) Switzerland, Liechtenstein, San Mario, Monaco and Andorra applying from that same date measures equivalent to those contained in the EU Savings Directive, in accordance with agreements entered into by each of them with the European Community ("Third Countries") and (ii) all the relevant dependent or associated territories ("Dependent Territories", such as the Channel Islands, the Isle of Man and dependent or associated territories in the Caribbean) applying from that same date an automatic exchange of information or, during the transitional period mentioned above, apply a withholding tax in the described procedure.

On 26 January 2004, the German Interest Information Regulation (*Zinsinformationsverordnung*; the "Regulation") was published in order to create the appropriate framework for the implementation of the EU Savings Directive. The Regulation coming into effect is subject to the enactment of the EU Savings Directive. For detailed information concerning the correct treatment of the Regulation, please refer to the Tax Decrees published by the German Federal Ministry of Finance on 6 January 2005 and 27 January 2006.

The Regulation will enter into force at that point in time, from which the provisions of the EU Savings Directive have to be applied by the EU Member States according to a resolution of the Council of the European Union. In a meeting of 7 June 2005 the ECOFIN noted that all Third Countries concerned and all relevant Dependent Territories have agreed to apply from 1 July 2005 the measures which are a pre-condition to the application of the EU Savings Directive and that therefore the conditions have now been met to enable the rules on taxation of savings to enter into force on that same date.

Since the EU Savings Directive may have an impact on the taxation of savings income of the respective individual Noteholders in the future, such Noteholders are advised to consult with a tax advisor for further information in this context.

**Noteholders who are individuals should note that, pursuant to the EU Savings Directive, the Issuer will not pay additional amounts under § 7 of the Terms and Conditions of the Notes in respect of any withholding tax imposed as a result thereof.**

### **Federal Republic of Germany**

The following is a general discussion of certain German tax consequences of the acquisition and ownership of the Notes. It does not purport to be a comprehensive description of all tax considerations which may be relevant to a decision to purchase Notes, and, in particular, does not consider any specific facts or circumstances that may apply to a particular purchaser. This summary is based on the laws of Germany currently in force and as applied on the date of this Offering Circular, which are subject to change, possibly with retroactive or retrospective effect.

**Prospective purchasers of Notes are advised to consult their own tax advisors as to the tax consequences of the purchase, ownership and disposition of Notes, including the effect of any state or local taxes, under the tax laws of Germany and each country of which they are residents.**

#### *Tax Residents*

Payments of interest on the Notes, including interest having accrued up to the disposition of a Note and credited separately ("Accrued Interest"), if any, to persons who are tax residents of Germany (i.e., persons whose residence, habitual abode, statutory seat, or place of effective management and control is located in Germany) are subject to German personal or corporate income tax plus solidarity surcharge (*Solidaritätszuschlag*) at a rate of 5.5 per cent. thereon. Such interest may also be subject to trade tax if the Notes form part of the property of a German trade or business. Accrued Interest paid upon the acquisition of a Note may give rise to negative income if the Note is held as a non-business asset.

Upon the disposition, assignment or redemption of a Note a Noteholder holding the Note as a non-business asset will have to include in his taxable income further amounts if the Note can be classified as a financial innovation (*Finanzinnovation*) under German tax law (including, among other things, Floating Rate Notes, Zero Coupon Notes, Notes being traded "flat", i.e. without Accrued Interest being credited separately, or stripped bonds, i.e. bonds traded without coupons and coupons traded without bonds). In this case, generally the difference between the proceeds from the disposition, assignment or redemption and the issue or purchase price is deemed to constitute interest income subject to income tax (plus the solidarity surcharge) in the year of the disposition, assignment or maturity of the Note (*Differenzmethode*). Alternatively, the Noteholder may show that such difference exceeds the difference between the redemption and issue price of the Note to the extent attributable to the period over which he has held such Note, provided that the Note is based on an identifiable yield to maturity (*Emissionsrendite*). In this case only the lower pro-rated initial yield to maturity as determined as of the time of issue, minus interest, including Accrued Interest already taken into account, is taxed as interest income. Please note, that the German Supreme Tax Court decided recently that the Noteholder (in the case decided with respect to a note with a variable interest rate yield) is not entitled to elect for the pro-rated initial yield method in his or her discretion. Rather, the fiscal authorities, based on the information provided by the Noteholder, have to investigate the factual basis for determining the tax base according to the pro-rated initial yield method. Only if the fiscal authorities can not investigate the pro-rated initial yield they are entitled to calculate the tax base according to the *Differenzmethode*. Where a Note forms part of a German trade or business, in each year the part of the difference between the issue price of the Note and its redemption price attributable to such year as well as interest accrued must be taken into account as income and may be subject to trade tax.

In some cases (e.g. unknown purchase price or acquisition cost), the capital yield tax is calculated on the basis of 30 per cent. of the revenues derived from the sale or presentation of the Notes (*Pauschalmethode*). Capital gains from the disposition of Notes other than such recharacterised as interest income as described in the second paragraph above are only taxable to a German tax-resident individual if the Notes are disposed of within one year after their acquisition or at any time form part of the property of a German trade or business, in which case the capital gains may

also be subject to trade tax. Capital gains derived by German-resident corporate Noteholder will be subject to corporate income tax plus solidarity surcharge at a rate of 5.5 per cent. thereon and trade tax.

Revenues resulting from the re-sale or assignment of Notes or structured Notes in foreign currencies has to be determined in the foreign currency first and then calculated into Euro.

If Notes are held in a custodial account which the Noteholder maintains with a German branch of a German or non-German bank or financial services institution (the "Disbursing Agent") a 30 per cent. withholding tax on interest payments (*Zinsabschlag*), plus 5.5 per cent. solidarity surcharge (*Solidaritätszuschlag*) on such tax, will be levied, resulting in a total tax charge of 31.65 per cent. of the gross interest payment.

In addition, if Notes qualify as financial innovations, as explained in the second paragraph "*Tax Residents*" above, and are kept in a custodial account which the Noteholder maintains with a Disbursing Agent such custodian will generally withhold tax at a rate of 30 per cent. plus solidarity surcharge at a rate of 5.5 per cent. thereon from the positive difference between the redemption amount or proceeds from the disposition or assignment and the issue or purchase price of the Notes if the Notes have been kept in a custodial account with such Disbursing Agent since the time of issuance or acquisition, respectively. If the Notes have not been kept in a custodial account with a Disbursing Agent, withholding tax of 30 per cent. is applied to 30 per cent. of the amounts paid in partial of final redemption or the proceeds from the disposition or assignment of the Notes, respectively.

In computing the tax to be withheld the Disbursing Agent may deduct from the basis of the withholding tax any Accrued Interest previously paid by the Noteholder to the Disbursing Agent during the same calendar year. In general, no withholding tax will be levied if the Noteholder is an individual (i) whose Note does not form part of the property of a German trade or business nor gives rise to income from the letting and leasing of property; and (ii) who filed a withholding exemption certificate (*Freistellungsauftrag*) with the Disbursing Agent but only to the extent the interest income derived from the Note together with other investment income does not exceed the maximum exemption amount shown on the withholding exemption certificate. Similarly, no withholding tax will be deducted if the Noteholder has submitted to the Disbursing Agent a certificate of non-assessment (*Nichtveranlagungsbescheinigung*) issued by the relevant local tax office.

If Notes are not kept in a custodial account with a Disbursing Agent, withholding tax will apply at a rate of 35 per cent. of the gross amount of interest paid by a Disbursing Agent upon presentation of a coupon (whether or not presented with the Note to which it appertains) to a holder of such coupon (other than a non-German bank or financial services institution) (*Tafelgeschäft*). In this case proceeds from the disposition, assignment or redemption of a coupon will also be subject to withholding tax at a rate of 35 per cent. Where the 35 per cent. withholding tax applies Accrued Interest paid cannot be taken into account in determining the withholding tax base. Again a solidarity surcharge at a rate of 5.5 per cent. of the withholding tax applies so that the total tax burden to be withheld amounts to 36.925 per cent.

Withholding tax and the solidarity surcharge thereon are credited as prepayments against the German personal or corporate income tax and the solidarity surcharge liability of the German resident. Amounts overwithheld will entitle the Noteholder to a refund, based on an assessment to tax.

#### *Non-Residents*

Interest, including Accrued Interest, and capital gains are not subject to German taxation, unless (i) the Notes form part of the business property of a permanent establishment, including a permanent representative, or a fixed base maintained in Germany by the Noteholder; or (ii) the interest income otherwise constitutes German-source income (such as income from the letting and leasing of certain German-situs property). In the latter case a tax regime similar to that explained above under "*Tax Residents*" applies. Capital gains from the disposition of Notes other than proceeds from their sale or redemption re-characterised as interest income for German tax purposes (as explained above under "*Tax Residents*") are taxable in the case of (i) above and, subject to further conditions being met, could be taxable in the case of (ii) above.

Non-residents of Germany are, in general, exempt from German withholding tax on interest and the solidarity surcharge thereon. However, where the interest is subject to German taxation as set forth in the preceding paragraph and Notes are held in a custodial account with a Disbursing Agent, withholding tax is levied as explained above under "*Tax Residents*". The withholding tax may be refunded based upon an applicable tax treaty. Where Notes are not kept in a custodial account with a Disbursing Agent and interest or proceeds from the disposition or redemption of a Note are paid by a Disbursing Agent to a non-resident, withholding tax of 35 per cent. and solidarity surcharge thereon of 5.5 per cent. will apply as explained above under "*Tax Residents*".

#### *Grossed-up Notes and Special Exception in Germany*

According to the Terms and Conditions of the Notes, the Issuer or the Guarantor, as the case may be, undertakes in case of withholding of taxes at source or deduction of taxes at source for or on account of any present or future taxes, fees, duties, assessments or governmental charges of whatever nature which are imposed or levied by or on behalf of the country of domicile (or residence for tax purposes) of the Issuer or the Federal Republic of Germany or any political subdivision thereof or any authority or agency therein or thereof having power to tax (the "Withholding Tax" in this paragraph), unless Withholding Tax is required by law, to pay additional amounts as may be necessary, subject to certain exceptions as set forth in the Terms and the Conditions of the Notes, in order that the net amounts receivable by the Noteholder after the withholding or deduction of such Withholding Tax shall equal the respective amounts which would have been receivable by such Noteholders had no such Withholding Tax been required. In accordance with these exceptions the tax on interest payments (*Zinsabschlagsteuer*), the flat tax on investment income (*Abgeltungssteuer*) and the solidarity surcharge (*Solidaritätszuschlag*) imposed thereon do not constitute such a Withholding Tax on interest payments.

#### *Inheritance and Gift Tax*

No inheritance or gift taxes with respect to any Note will arise under the laws of Germany, if, in the case of inheritance tax, neither the decedent nor the beneficiary, or, in the case of gift tax, neither the donor nor the donee, is a resident of Germany and such Note is not attributable to a German trade or business for which a permanent establishment is maintained, or a permanent representative has been appointed, in Germany. Exceptions from this rule apply to certain German expatriates.

#### *Other Taxes*

No stamp, issue, registration or similar taxes or duties will be payable in Germany in connection with the issuance, delivery or execution of the Notes. Currently, net assets tax is not levied in Germany.

#### *Potential amendment of German tax law*

On 14 March 2007, the German Federal Government has resolved the draft bill with regard to the "Corporate Tax Reform 2008" providing, among others, for the introduction of a flat withholding tax (*Abgeltungssteuer*) as of 2009. Such flat withholding tax will cover income from capital investments like e.g. interest income, but also capital gains from the sales of securities (like the Notes), regardless how long the securities have been held. With respect to capital gains this change shall apply only for capital investments acquired after 31 December 2008. The contemplated rate for the final withholding tax is 25 per cent. (plus solidarity surcharge and church tax, if applicable). Taxable persons with a personal marginal tax rate of less than 25 per cent. may opt for a tax assessment under certain circumstances so that the capital investment income would only be subject to final tax at their personal marginal tax rate. The legislative procedure is expected to be finalised in summer/fall 2007.

### **The Netherlands**

This taxation summary solely addresses the principal Dutch tax consequences of the acquisition, the ownership and disposition of Notes. It does not discuss every aspect of taxation that may be relevant to a particular Noteholder under special circumstances or who is subject to special treatment under applicable law.

The laws upon which this summary is based are subject to change, perhaps with retroactive effect. A change to such laws may invalidate the contents of this summary, which will not be

updated to reflect changes in laws. This summary is based on the tax laws of The Netherlands as they are in force and in effect on the date of this Prospectus. It assumes that each transaction with respect to Notes is at arm's length.

**This is a general summary and the tax consequences as described here may not apply to a Noteholder. Any potential investor should consult his own tax adviser for more information about the tax consequences of acquiring, owning and disposing of Notes in his particular circumstances.**

#### *Withholding Tax*

All payments of principal and interest under the Notes may be made free of any Dutch withholding tax, except where Notes are issued under such terms and conditions that the Notes actually function as equity of BMW Finance N.V. as meant in article 10, paragraph 1, letter d, of the Dutch Corporate Income Tax Act 1969 (*Wet Vennootschapsbelasting 1969*).

#### *Taxes on Income and Capital Gains*

This section "Taxes on income and capital gains" applies to a Noteholder who is neither resident nor deemed to be resident in The Netherlands for Dutch tax purposes and, in the case of an individual, has not elected to be treated as a resident of The Netherlands for Dutch tax purposes (a "Non-Resident Noteholder").

#### *Individuals*

A Non-Resident Noteholder who is an individual will not be subject to any Dutch taxes on income or capital gains in respect of any benefit derived or deemed to be derived from Notes, including any payment under the Notes and any gain realised on the disposal of Notes, provided that both of the following conditions are satisfied:

1. If he derives profits from an enterprise, whether as an entrepreneur (*ondernemer*) or pursuant to a co-entitlement to the net worth of such enterprise, other than as an entrepreneur or a holder of securities, which enterprise is either managed in the Netherlands or, in whole or in part, carried on through a permanent establishment or a permanent representative in The Netherlands as the case may be, his Notes are not attributable to such enterprise.
2. He does not derive benefits from Notes that are taxable as benefits from miscellaneous activities in The Netherlands (*resultaat uit overige werkzaamheden in Nederland*); and

benefits derived from Notes by a Non-Resident Noteholder who is an individual and who meets condition 1 above will be taxable as benefits from miscellaneous activities in The Netherlands if he, or an individual who is a connected person in relation to him as meant in article 3.91, paragraph 2, letter b, of the Dutch Income Tax Act 2001 (*Wet inkomstenbelasting 2001*), has a substantial interest (*aanmerkelijk belang*) (as described below) in BMW Finance N.V.

A person has a substantial interest in BMW Finance N.V. if he alone or together with his partner (*partner*), if any, has, directly or indirectly, either the ownership of shares representing 5 per cent. or more of the total issued and outstanding capital (or the issued and outstanding capital of any class of shares) of BMW Finance N.V., or rights to acquire, directly or indirectly, shares, whether or not already issued, that represent 5 per cent. or more of the total issued and outstanding capital (or the issued and outstanding capital of any class of shares) of BMW Finance N.V. or the ownership of profit participating certificates (*winstbewijzen*) that relate to 5 per cent. or more of the annual profit of BMW Finance N.V. or to 5 per cent. or more of the liquidation proceeds of BMW Finance N.V.

For purposes of the above, a Noteholder who is only entitled to the benefits from shares or profit participating certificates (for instance a holder of a right of usufruct) is deemed to be a holder of shares or profit participating certificates, as the case may be, and his entitlement to such benefits is considered a share or profit participating certificate, as the case may be.

Furthermore, a Non-Resident Noteholder who is an individual and who meets condition 1 above may, *inter alia*, derive benefits from Notes that are taxable as benefits from miscellaneous activities

in the following circumstances, if such activities are performed or deemed to be performed in The Netherlands:

- if his investment activities go beyond the activities of an active portfolio investor, for instance in case of the use of insider knowledge (*voorkennis*) or comparable forms of special knowledge; or
- if he makes Notes available or is deemed to make Notes available, legally or in fact, directly or indirectly, to certain parties as meant in articles 3.91 and 3.92 of the Dutch Income Tax Act 2001 (*Wet inkomstenbelasting 2001*) under circumstances described there.

#### *Entities*

A Non-Resident Noteholder other than an individual will not be subject to any Dutch taxes on income or capital gains in respect of any payment under the Notes or in respect of any gain realised on the disposal of Notes, provided that (a) if such Non-Resident Noteholder derives profits from an enterprise that is either managed in The Netherlands or, in whole or in part, carried on through a permanent establishment or a permanent representative in The Netherlands, whether as an entrepreneur (*ondernemer*) or pursuant to a co-entitlement to the net worth of such enterprise (other than as an entrepreneur or as a holder of securities), the Notes are not attributable to such enterprise, and (b) such Non-Resident Noteholder does not have a substantial interest in BMW Finance N.V.

A person other than an individual has a substantial interest in BMW Finance N.V. (x) if it has a substantial interest in BMW Finance N.V. (as described above under *individuals*) or (y) if it has a deemed substantial interest in BMW Finance N.V. A deemed substantial interest is present if its shares, profit participating certificates or rights to acquire shares or profit participating certificates in BMW Finance N.V. have been acquired by such person or are deemed to be acquired by such person on a non-recognition basis.

#### *Gift and Inheritance Taxes*

A person who acquires Notes as a gift, in form or in substance, or who acquires or is deemed to acquire Notes on the death of an individual, will not be subject to Dutch gift tax or to Dutch inheritance tax, as the case may be, unless:

- (i) the donor or the deceased is resident or deemed to be resident in The Netherlands for purposes of gift or inheritance tax as the case may be; or
- (ii) the Notes are or were attributable to an enterprise or part of an enterprise that the donor or deceased carried on through a permanent establishment or a permanent representative in The Netherlands at the time of the gift or of the death of the deceased; or
- (iii) the donor makes a gift of Notes, then becomes a resident or deemed resident of The Netherlands, and dies as a resident or deemed resident of The Netherlands within 180 days after the date of the gift.

If the donor or the deceased is an individual who holds Dutch nationality, he will be deemed to be resident in The Netherlands for purposes of Dutch gift and inheritance taxes if he has been resident in The Netherlands at any time during the ten years preceding the date of the gift or his death. If the donor is an individual who does not hold Dutch nationality, or an entity, he or it will be deemed to be resident in The Netherlands for purposes of Dutch gift tax if he or it has been resident in The Netherlands at any time during the twelve months preceding the date of the gift. Furthermore, in exceptional circumstances, the donor or the deceased will be deemed to be resident in The Netherlands for purposes of Dutch gift and inheritance taxes if the beneficiary of the gift or all beneficiaries under the estate jointly, as the case may be, make an election to that effect.

#### *Other Taxes and Duties*

No Dutch registration tax, custom duty, transfer tax, stamp duty or any other similar documentary tax or duty, other than court fees, will be payable by a Noteholder in The Netherlands in respect of or in connection with the execution (*ondertekening*), delivery (*overhandiging*) and/or enforcement by legal proceedings (including the enforcement of any foreign judgment in the courts of The

Netherlands) of the Dealer Agreement and the Agency Agreement or the performance by BMW Finance N.V. of its obligations thereunder or under the Notes.

## Belgium

**The following is a summary of the principal Belgian tax consequences for investors in respect of the Notes. It is of general nature and it is based on the issuer's understanding of current law and practice. Persons considering the purchase, sale, repurchase, or redemption of Notes should consult their own tax advisors concerning the application of Belgian tax law to their particular situation.**

In Belgium, certain tax benefits are granted to companies qualifying as "coordination centres" ("*centres de coordination*"—"coördinatie centra") in the meaning of Royal Decree No. 187 of 30 December 1982, and in respect to transactions involving a coordination centre.

These benefits are in principle granted for a period of 10 years, i.e., from the beginning of the fiscal year in which the application for coordination centre status was submitted until the end of the fiscal year that is closed during the tenth calendar year following that of the submission of the application. A company may, however, apply for, and in principle obtain, an extension of its coordination centre status for another 10-year term. A coordination centre could forfeit its tax privileges before expiration of the 10-year term if it ceased to fulfill certain conditions of eligibility for coordination centre status or engaged in activities not specifically authorised by the Royal Decree certifying it as a coordination centre (or by a subsequent ruling from the Minister of Finance and the Minister of Economic Affairs).

However, under the pressure of the EU Commission, the Belgian government has decided to suspend the application procedure for recognition of companies as coordination centres and has severely limited the possibility to obtain the extension of the coordination centre status. Companies that were recognised as qualifying as coordination centres before 31 December 2000 and that obtained the extension of their status before 17 February 2003 may benefit from their status until the date provided in the Royal Decree stating the extension of their status, but not later than 31 December 2010.

The benefits granted by the coordination centre legislation include under Article 29, 2°, a of the Law of 11 April 1983, an exemption from Belgian withholding tax in respect of interest paid by coordination centres on debts owed by them to persons who can be identified as persons not subject to individual income tax ("*impôt des personnes physiques*") or legal entity tax ("*impôt des personnes morales*") in Belgium.

Royal Decree No. 187 was amended by the Law of 24 December 2002, with effect as from the date that would have been determined by a royal decree. Provided the Law of 24 December 2002 became effective, interest paid by coordination centres on debts owed by them would have attracted Belgian withholding tax also when paid to foreign individuals and foreign legal entities subject to nonresident legal entity tax.

However, the Law of 27 December 2006 has withdrawn the intended changes referred to in the previous paragraph to the Royal Decree No. 187 by the Law of 24 December 2002.

BMW Coordination Center V.O.F. has been certified as a coordination centre by Royal Decree of 9 November 1987, on the basis of an application submitted in August 1987. As BMW Coordination Center V.O.F. has applied in 1996 for an extension of its coordination centre status for another 10-year term and has obtained this extension in 1997, the privileged tax status as a coordination centre should remain in effect until the end of its fiscal year closing in 2007. Provided that article 297 of the abovementioned Law of 27 December 2006 will enter into force by means of a royal decree, the tax regime of the Royal Decree No 187 shall have effect until 31 December 2010. Under the same condition, all coordination centres which are certified as per 17 February 2003 could receive a renewal of their certification until 31 December 2010.

All payments by BMW Coordination Center V.O.F. on the Notes can be made free of Belgian withholding tax to beneficiaries who can be identified as persons other than individuals subject to individual income tax ("*impôt des personnes physiques*") in Belgium and other legal entities subject to legal entity tax ("*impôt des personnes morales*"). Payments made to individuals subject to individual income tax ("*impôt des personnes physiques*") in Belgium and other legal entities subject to legal entity tax ("*impôt des personnes morales*") in Belgium will, as a rule, attract

Belgian withholding tax at a rate of 15 per cent., subject to such relief as may be available under applicable domestic provisions.

If and when BMW Coordination Center V.O.F. should cease to qualify as a coordination centre, the interest component of payments on Notes issued by BMW Coordination Center V.O.F. would, as a rule, attract Belgian withholding tax at the rate of 15 per cent., subject to such relief as may be available under applicable domestic or tax treaty provisions.

In Belgium, the Law of 17 May 2004 implements the Council Directive 2003/48/EC of 3 June 2003 on taxation of savings income of interest payments. It is effective as from 1 July 2005. Under Article 4, § 1 of the Law of 17 May 2004 interest paid by a paying agent within the meaning of Article 3, § 1, 6° of the Law of 17 May 2004 and established in Belgium to individuals Noteholders who are beneficial owners of the Notes and resident in an EU member state other than Belgium, will be subject to a withholding tax for the benefit of the residence state. For the purpose of this measure, interest includes any interest paid or attributed on any debt as well as interest accrued or capitalised paid upon the transfer, reimbursement or redemption of the debt. The withholding tax for the benefit of the residence state applies before the ordinary withholding tax, if any, at the rate of 15 per cent. during the first 3-year period (in principle until 30 June 2007), 20 per cent. during the second 3-year period (in principle from 1 July 2007 through 30 June 2010) and 35 per cent. thereafter (in principle from 1 July 2010). If the beneficial owner provides the paying agent with an affidavit delivered by the competent authorities of his residence State identifying him, the paying agent and the bank account on which the interest is paid, Article 4 does not apply.

In broad outline, capital gains realised with respect to the Notes are subject to Belgian tax only if the Notes are held as part of a taxable business activity in Belgium. However, any amount paid on zero-bonds in excess over the issue price is taxed as interest in the hands of any individual who held the debt instrument rateably over his holding period, even if the instrument was not invested in a business activity in Belgium.

A stamp tax may be levied at the rate of 0.7 per cent. on the sale and on the purchase of Notes in Belgium, provided that such transactions are carried out through intermediation of a professional intermediary in Belgium. Such tax will, however, be limited to a maximum amount of EUR 500 per taxable person and per taxable transaction. The tax does not apply to the issue of Notes. Moreover, an exemption is available under Article 126/1, 2° of the Code on Various Rights and Taxes as regards parties to securities trades acting on their own account who are intermediaries within the meaning of Article 2, 9° and 10° of the law of 2 August 2002 on the supervision of financial institutions and financial services, insurance undertakings within the meaning of Article 2, § 1 of the Law of 9 July 1975 on supervision of insurance companies, institutions for professional pension within the meaning of Article 2, 1° of the Law of 27 October 2006 on supervision of institutions for professional pension, an investment fund or nonresidents provided they can deliver an affidavit of their nonresident status.

A stamp duty may be levied at the rate of 0.60 per cent. upon the delivery of the Notes in bearer form in the following circumstances:

- on the occasion of the acquisition of the Notes in return for a consideration, provided the transaction is carried out through a professional intermediary;
- on the occasion of the withdrawal of the Notes given in open consignment with a financial intermediary.

## **United States of America**

The following is a general discussion of the anticipated United States Federal income tax consequences under current law of holding Notes issued by BMW US Capital, LLC under the Terms and Conditions of the Notes, is limited to the United States tax consequences for United States Aliens (as defined below) and does not consider any possible United States Federal estate tax consequences. Noteholders are urged to consult their own tax advisers with respect to the particular consequences of holding Notes in light of their own particular circumstances and as to whether an Index-Linked Note will be treated as debt for United States Federal income tax purposes. This discussion does not address the treatment of Index-Linked Notes.

**Persons considering the purchase of Notes should consult their own tax advisors concerning the application of United States Federal income tax laws, as well as the law of any state, local or foreign tax jurisdiction, to their particular situations.**

#### **Internal Revenue Service Circular 230 Disclosure**

**Pursuant to Internal Revenue Service Circular 230, attention is drawn to the fact that the description set forth herein with respect to U.S. federal tax issues was not intended or written to be used, and such description cannot be used, by any taxpayer for the purpose of avoiding any penalties that may be imposed on the taxpayer under the U.S. Internal Revenue Code. Such description was written in connection with the marketing of the Notes. Such description is limited to the U.S. federal tax issues described herein. It is possible that additional issues may exist that could affect the U.S. federal tax treatment of the Notes, or the matter that is the subject of the description noted herein, and such description does not consider or provide any conclusions with respect to any such additional issues. Taxpayers should seek advice based on the taxpayer's particular circumstances from an independent tax advisor.**

For United States Federal income tax purposes, Notes issued by BMW US Capital, LLC will be treated as issued by BMW (US) Holding Corp. In addition, this discussion does not address any Notes issued by any other issuer which may be substituted for BMW US Capital, LLC or BMW (US) Holding Corp. For purposes of this discussion, it is assumed that BMW US Capital, LLC remains an entity disregarded for United States Federal income tax purposes and it is assumed that the Notes are treated as debt for United States Federal income tax purposes; however, the Index-Linked notes may not be treated as debt if they have certain terms such as lack of principal protection.

Provided that the Notes and interest coupons, talons and receipts appertaining thereto are offered, sold and delivered, and principal, premium, if any, and interest thereon are paid in accordance with the terms of the Dealer Agreement dated 10 May 2007, the Agency Agreement dated 10 May 2007 and the Terms and Conditions of the Notes pertaining to the Notes, under present United States Federal income tax law, assuming the Notes are treated as debt for United States Federal income tax purposes and excluding instruments described in Section 871(h)(4)(A) of the Internal Revenue Code (relating to a limited class of obligations providing for certain kinds of contingent payments) and assuming the United States Alien does not have a connection or former connection with the United States other than holding the Notes:

1. Subject to the discussion of backup withholding below, payments of principal, premium, if any, and interest (including original issue discount) on the Notes having a maturity of 184 days or more from its Issue Date or any coupon, talon or receipt appertaining thereto made outside the United States by BMW US Capital, LLC or any of its paying agents to any United States Alien will not be subject to United States Federal withholding tax, provided that, in the case of interest (including original issue discount), (a) the United States Alien does not actually or constructively own 10 per cent. or more of the total combined voting power of all classes of stock of BMW (US) Holding Corp. entitled to vote, (b) the United States Alien is not a controlled foreign corporation as to the United States that is related to BMW (US) Holding Corp. through stock ownership, (c) the United States Alien is not a bank that acquired a Note in consideration of an extension of credit made pursuant to a loan agreement entered into in the ordinary course of business and (d) if the Notes are in registered form for United States tax purposes, the United States Alien has provided a properly completed Form W-8BEN (or successor form). Notes issued nominally in bearer form would be considered in registered form for United States Federal tax purposes if transfer of the Notes can only be effected (i) by surrender of the old instrument and either the reissuance by the issuer of the old instrument to the new holder or the issuance by the issuer of a new instrument to the new holder, (ii) through a book entry system maintained by the issuer (or its agent) or (iii) through both of the methods described in (i) or (ii).
2. Subject to the discussion of backup withholding below, payment of principal, premium, if any, and original issue discount on the Notes having a maturity of 183 days or less to any United States Alien will not be subject to United States Federal withholding tax.

3. Subject to the discussion of backup withholding below, no United States Federal income tax will be imposed with respect to any gain or income realised by a United States Alien on the sale, exchange or redemption of the Notes unless such gain is effectively connected with such United States Alien's conduct of a trade or business in the United States or, in the case of an individual United States Alien, such United States Alien is present in the United States for 183 or more in the taxable year of the sale, exchange or redemption and certain other conditions are met.
4. Except with respect to obligations in bearer form payable 183 days or less from the date of original issue that have a face amount of less than USD 500,000 (determined if the Note is in a currency other than the USD by translating the foreign currency face amount to the spot rate at the date of issuance), information reporting and backup withholding will not apply to payments of principal, premium, if any, or interest (including original issue discount) with respect to obligations in bearer form made outside the United States by BMW US Capital, LLC or any of its paying agents on the Note or coupon or talon or receipt unless BMW US Capital, LLC or its paying agent has actual knowledge, or reason to know, that the payee is a United States person and in the case of Notes that are in registered form for United States tax purposes information reporting will apply, but backup withholding will not apply if the United States Alien has provided a properly completed Form W-8BEN (or successor form).

Payments of the proceeds of the sale of a Note to or through a foreign office of a "broker" (as defined in applicable United States Treasury Regulations) will not be subject to backup withholding (absent actual knowledge, or reason to know, that the payee is a U.S. person) but will be subject to information reporting if a broker is a United States Middleman, unless the broker has in its records documentary evidence that the Noteholder is not a U.S. person and has no actual knowledge, or reason to know, to the contrary or the Noteholder otherwise establishes an exemption. Payment of the proceeds of a sale of a Note to or through the United States office of a broker is subject to backup withholding and information reporting unless the Noteholder certifies its non-United States status under penalties of perjury or otherwise establishes an exemption.

For purposes of this discussion, a "United States Alien" is a Noteholder that is a beneficial owner of that Note and that is an individual, corporation, estate or trust that is not a "United States Person". In addition, for purposes of this discussion, a "United States Person" is a beneficial owner of a Note that is (i) a citizen or resident of the United States, (ii) a corporation (or entity treated as a corporation for United States Federal tax purposes) created or organised under the laws of the United States or any political subdivision thereof, (iii) an estate the income of which is subject to United States income tax without regard to the source, or (iv) a trust if a court within the United States is able to exercise primary supervision over the administration of the trust and one or more U.S. persons have the authority to control all substantial decisions of the trust. For this purpose, a "United States Middleman" is (i) a U.S. person, (ii) a controlled foreign corporation for United States tax purposes, (iii) a foreign person 50 per cent. or more of whose gross income is derived from the conduct of a United States trade or business for a specified three year period, (iv) a foreign partnership engaged in a United States trade or business or in which U.S. persons hold more than 50 per cent. of the income or capital interest, or (v) certain United States branches of foreign banks or insurance companies.

### **Commonwealth of Australia**

The comments below are a summary of a general nature and are based on current law and practice. They relate only to the position of persons who are the absolute beneficial owners of Notes and may not apply to certain classes of persons such as dealers.

**As the taxation consequences of holding any Notes will depend on the terms and conditions of those Notes (and in certain circumstances, on the terms and conditions of Notes subsequently issued), Noteholders should consult their professional advisers as to their taxation position.**

The Income Tax Assessment Act 1997 contains rules for characterising debt and equity for Australian tax purposes. The commentary that follows assumes that the issue of the Notes is characterised as debt and any returns arising from their issue will be characterised as interest for the purposes of section 128F.

Section 126 of the Income Tax Assessment Act 1936 of the Commonwealth of Australia (as amended) ("Tax Act") requires an issuer which is a resident of, or has a permanent establishment in, Australia to pay tax on interest paid or credited on bearer Notes held by:

- (i) an Australian resident including a resident carrying on business at or through a permanent establishment outside Australia; and
- (ii) non-residents of Australia engaged in carrying on a business in Australia at or through a permanent establishment in Australia;

where that issuer does not supply the Australian Taxation Office with the name and address of the Noteholder. In those circumstances, that issuer will have a right to deduct the tax payable from the interest paid or credited.

Under section 128F of the Tax Act, a person who is not a resident of Australia or an Australian resident who carries on business at or through an overseas permanent establishment within the meaning of the Tax Act who has acquired or acquires any of the Notes and who does not derive interest payable on the Notes in carrying on business at or through a permanent establishment in Australia ("Non-Resident") will not incur or become liable for any Australian income tax on interest paid by the issuer in respect of the Notes, so long as the requirements of section 128F of the Tax Act for an exemption from interest withholding tax are satisfied in respect of payments of interest on the Notes ("Section 128F Requirements").

The Section 128F Requirements in relation to the issue of a debenture (which term would include a Note) include the following:

1.
  - (i) the issuer must be a resident of Australia within the meaning of the Tax Act at the time the debenture is issued and at the time when interest on the debenture is paid; or
  - (ii) the issuer is a non-resident of Australia within the meaning of the Tax Act at the time the debenture is issued and at the time when interest on the debenture is paid and the debenture was issued and the interest is paid by the issuer in carrying on business at or through a permanent establishment in Australia; and
2. the issue of the debenture must satisfy one of the public offer tests described below.

There are five public offer tests. The Issuer will need to satisfy one of the tests in order for interest on the Notes to qualify for the section 128F exemption. The five tests in relation to the issue of a debenture are as follows:

1. The first public offer test will be satisfied if the debentures were offered for issue to at least 10 persons who carry on the business of providing finance, or investing or dealing with securities, in the course of operating in financial markets;  
  
None of the 10 persons can be persons who are known, or suspected, by the Issuer (or, in the case of a debenture issued in global form, a dealer, manager or underwriter) to be an "offshore associate" (as defined in sections 128F(5) and 128F(9) of the Tax Act) of any of the others;
2. The second public offer test will be satisfied if the debentures are offered for issue to at least 100 persons whom it was reasonable for the issuer (or, in the case of a debenture issued in global form, a dealer, manager or underwriter) to have regarded as either having acquired debentures in the past or being likely to be interested in acquiring debentures;
3. The third public offer test will be satisfied if the debentures are offered for issue as a result of the debentures being listed on a stock exchange, where the issuer had previously entered into an agreement with a dealer, manager or underwriter, in relation to the placement of the debentures, requiring the issuer to seek such a listing;
4. The fourth public offer test will be satisfied if the debenture was offered for issue as a result of negotiations being initiated publicly in electronic form, or in another form, that was used by financial markets for dealing in debentures; and
5. The fifth public offer test will be satisfied if the debenture was offered for issue to a dealer, manager or underwriter, in relation to the placement of debentures, who, under an agreement with the issuer, offered the debenture for sale within 30 days in a way covered by 1 to 4 above.

The issue of a Global Bond (as defined in the Tax Act and which would cover Global Notes) by one of these methods will also satisfy the public offer test.

The public offer test will not be satisfied if, at the time of the issue of the Notes, the issuer knew, or had reasonable grounds to suspect that the Notes, or an interest in the Notes, was being, or would later be, acquired either directly or indirectly by an “offshore associate” of the issuer (other than in the capacity of a dealer, manager or underwriter in relation to the placement of the debenture or in the capacity of a clearing house, custodian, funds manager or responsible entity of a registered scheme).

The exemption will not be available for interest which the issuer pays to an “associate” (as defined in section 128F(9) of the Tax Act) of the issuer where the issuer, at the time of payment, knew or had reasonable grounds to suspect that the person was an “offshore associate” of the issuer (other than a payment received by such payee in the capacity of a clearing house, paying agent, custodian, funds manager or responsible entity of a registered scheme).

The words “associate”, “responsible entity” and “registered scheme” referred to above are defined in section 128F(9) of the Tax Act. The term “offshore associate” referred to in the paragraphs above means:

- (a) a non-resident associate that does not acquire the Notes in carrying on business at or through a permanent establishment in Australia; or
- (b) a resident associate that acquires the instruments in carrying on a business at or through a permanent establishment in a country outside Australia.

An issuer which is a resident of, or has a permanent establishment in, Australia may be required to withhold moneys on account of tax in relation to interest payable on the Notes to a resident of Australia (including a resident acting through a permanent establishment outside Australia) if the Noteholder is subject to the requirements of Part VA of the Tax Act and does not quote its TFN, Australian Business Number (as appropriate) or provide its exemption details, in relation to the Notes. Although on the face of the legislation it is not entirely clear whether Part VA of the Tax Act applies to interest paid on a bearer Note, in the opinion of the legal adviser to the Issuers the better view is that Part VA of the Tax Act does not apply to bearer Notes. If such withholdings are made, the issuer will not be required to make additional payments under Condition 9 of the Notes.

In December 2006, a bill was introduced into the Commonwealth Parliament which included amendments to section 128F of the Tax Act to narrow the range of debt instruments eligible for exemption under that section. These amendments have now been withdrawn but it is understood that the section may be amended in the future. If an amendment is made to section 128F, this may affect the position stated above.

### **United Kingdom**

- 1. Any return on a Note in the form of a discount or premium which does not constitute interest should not be subject to withholding for or on account of United Kingdom tax.
- 2. Under current United Kingdom law, interest bearing Notes will constitute “quoted Eurobonds” provided they are and continue to be listed on a recognised stock exchange within the meaning of section 841 of the Income and Corporation Taxes Act 1988, whether they are in bearer or registered form. Payments of interest on quoted Eurobonds may be made without withholding or deduction for or on account of United Kingdom income tax without any further conditions being satisfied.
- 3. Noteholders who are individuals may wish to note that HM Revenue and Customs has power to obtain information (including the name and the address of the beneficial owner of the interest) from any person in the United Kingdom who either pays interest to, or receives interest for, the benefit of an individual. Information so obtained may, in certain circumstances, be exchanged by HM Revenue and Customs with the tax authorities of the jurisdiction in which the Noteholders are resident for tax purposes.

**Prospective Noteholders who are in any doubt as to their tax position or may be subject to tax in a jurisdiction other than the United Kingdom should seek independent advice.**

## **Grand-Duchy of Luxembourg**

### *Luxembourg residents*

Under the Luxembourg law of 23 December 2005 (the “Law”), payments of interest or similar income made since 1 January 2006 (but accrued since 1 July 2005) by a paying agent established in Luxembourg to or for the immediate benefit of an individual beneficial owner who is resident of Luxembourg may be subject to a withholding tax of 10 per cent. Such withholding tax will be in full discharge of income tax if the beneficial owner is an individual acting in the course of the management or his/her private wealth.

### *Luxembourg non-residents*

Under Luxembourg tax law currently in effect and subject to the application of the Luxembourg laws dated 21 June 2005 (the “Laws”) implementing the EU Savings Directive and several agreements concluded between Luxembourg and certain dependant territories of the European Union, there is no withholding tax on payments of interest (including accrued but unpaid interest) made to Luxembourg non-resident Noteholders. There is also no Luxembourg withholding tax, upon repayment of the principal or, subject to the application of the Laws, upon redemption or exchange of the Notes.

Under the Laws, a Luxembourg based paying agent (within the meaning of the EU Directive) is required since 1 July 2005 to withhold tax on interest and other similar income (including reimbursement premium received at maturity) paid by it to (or under certain circumstances, to the benefit of) an individual resident in another Member State or a residual entity in the sense of article 4.2. of the EU Directive (“Residual Entities”) (i.e. an entity without legal personality and whose profits are not taxed under the general arrangements for the business taxation and that is not, or has not opted to be considered as, a UCITS recognised in accordance with Council Directive 85/611/EEC), established in one Member State of the European Union unless the beneficiary of the interest payments elects for an exchange of information. The same regime applies to payments to individuals or Residual Entities resident in any of the following territories: Aruba, British Virgin Islands, Guernsey, Isle of Man, Jersey, Montserrat and Netherlands Antille.

The withholding tax rate is initially 15 per cent. until 30 June 2008, 20 per cent. until 30 June 2010, 35 per cent. as from 1 July 2011. The withholding tax system will only apply during a transitional period, the ending of which depends on the conclusion of certain agreements relating to information exchange with certain third countries.

In each case described here-above, responsibility for the withholding of such tax will be assumed by the Luxembourg paying agent.

Noteholders who are individuals should note that the relevant Issuer will not pay additional amounts under Condition 7 (1) of the Terms and Conditions of the Notes in respect of any withholding tax imposed as a result of the EU Savings Tax Directive.

This short summary of the tax situation in Luxembourg is not intended to be an exhaustive presentation of the fiscal environment in Luxembourg.

## **Japan**

Under Japanese tax laws currently in effect the payment of interest in respect of the Notes to a non-resident of Japan or to a non-Japanese corporation in accordance with the terms and conditions of Notes will not be subject to any Japanese income or corporation taxes payable by withholding. Furthermore, such payment will not be subject to any other Japanese income or corporation taxes other than by way of withholding unless such non-resident or non-Japanese corporation has a permanent establishment in Japan and payment of the interest is attributable to the business of the non-resident or non-Japanese corporation carried on in Japan through such permanent establishment.

Gains derived from the sale outside Japan of any Notes by a non-resident of Japan or a non-Japanese corporation, or from sale within Japan of any Notes by a non-resident of Japan or a non-Japanese corporation not having a permanent establishment in Japan are in general not subject to Japanese income or corporate taxes. Japanese inheritance and gift taxes at progressive rates may be payable by an individual, wherever resident, who has acquired Notes as legatee, heir or donee from an individual.

No stamp, issue, registration or similar taxes or duties will, under present Japanese law, be payable in Japan by Noteholders in connection with the issue of the Notes.

**The following description of Japanese taxation (limited to national taxes) (subject always to the relevant tax treaty between Japan and the relevant country) applies exclusively to interest with respect to the Notes as far as they are issued outside Japan and payable outside Japan. It is not intended to be exhaustive and Noteholders are recommended to consult their tax advisers as to their exact tax position.**

Interest payments on Notes to be issued to an individual resident of Japan or a Japanese corporation (except for a designated Japanese financial institution which has complied with the requirements under the Special Taxation Measures Law, as defined below) will be subject to Japanese income tax on the amount specified in sub-paragraph (a) or (b) below, as applicable:

- (a) if interest is paid to an individual resident of Japan or to a Japanese corporation (except as provided in sub-paragraph (b) below), the amount of such interest; or
- (b) if interest is paid to a public corporation, a financial institution or a securities company (which has complied with Japanese tax exemption requirements) through its payment handling agent in Japan as provided in Article 3-3, Paragraph 6 of the Special Taxation Measure Law (as defined below), the amount of such interest minus the amount accrued during the period held, without any cessation, by such entities.

Under the Special Taxation Measures Law of Japan (including the cabinet orders and ministerial ordinance thereunder, the "Special Taxation Measure Law") effective as of the date of this Prospectus, with respect to Notes issued or to be issued during the period from and including 1 April 1998 to but excluding 1 April 2008, payments of interest thereon outside Japan by BMW Japan to the beneficial Noteholders which are non-residents of Japan or foreign corporations for Japanese tax purposes will not be subject to withholding by BMW Japan of Japanese income tax, on the condition that such beneficial Noteholders establish that they are non-residents of Japan or foreign corporations in compliance with the requirements under the Special Taxation Measures Law as summarised below:

- (1) If Notes certificates are deposited with a financial institution which handles the interest payments on Notes as defined in the Special Taxation Measures Law (the "payment handling agent"), (A) (a) such payment handling agent which holds Notes certificates in its custody (the "financial intermediary") notifies BMW Japan of "Interest Recipient Information" (including, *inter alia*, (i) whether all beneficial Noteholders who have deposited Note certificates with the financial intermediary are nonresidents of Japan or foreign corporations (if applicable); or (ii) the amount of interest payments on Notes by BMW Japan for non-residents of Japan or foreign corporations) to be made by such financial intermediary based on the information provided by the beneficial Noteholder if there is any individual resident of Japan or Japanese corporation amongst the beneficial Noteholders, or (b) (if Note certificates are further sub-deposited with another payment handling agent including a clearing organisation ("sub-depositary") by the financial intermediary) the financial intermediary notifies BMW Japan of Interest Recipient Information through such sub-depositary, at the latest, one day prior to the interest payment date; and (B) BMW Japan prepares "Interest Recipient Confirmation" based upon Interest Recipient Information and submits it to the competent Japanese tax authority at the place of registered head office of BMW Japan (the "tax authority"); or
- (2) If Note certificates are held otherwise than through a financial intermediary, upon each payment of the interest on Notes, the Noteholder files a "Claims for Exemption from Taxation" (providing, *inter alia*, the name and address of the beneficial Noteholder) with the tax authority through BMW Japan or (if payment of interest is made through the payment handling agent) through the payment handling agent and BMW Japan.

The above exemption from the withholding of income tax on the interest payments of Notes is also applied to Japanese financial institutions designated in Article 6 of the Special Taxation Measures Law. Article 6 of the Special Taxation Measures Law currently provides that the above exemption from the withholding of income tax on the interest payments of Notes is available with respect to Notes to be issued on or prior to 31 March 2008.

#### 4. Risk Factors

##### *Risk Factors and Risk Management in the BMW Group*

As a globally operating enterprise, the BMW Group is confronted with numerous risks. At the same time, opportunities can arise from changing circumstances, which the BMW Group endeavours to anticipate and exploit to improve its competitive position. Business risks are only consciously entered into when it is considered that the value of the business can be increased and the potential outcome can be controlled. The Board of Management and Supervisory Board are regularly informed about risks which could have a significant impact on business development.

In order to identify, evaluate and document the main risks, the BMW Group uses a comprehensive risk management system which involves the following processes:

- Business decisions are reached after in-depth project analyses, including detailed information concerning potential risks and opportunities, have been taken into consideration. In addition, as part of the long-term planning strategy and shortterm forecasting procedures, the risks and opportunities attached to specific business activities are evaluated and used as the basis for setting targets and implementing appropriate risk-mitigation measures.
- The Group reporting system keeps all decisionmakers fully informed and up-to-date about performance against targets and highlights changes affecting the market and competitors. By continuous monitoring of critical success factors, variances are identified at an early stage, thus allowing appropriate counter-measures to be implemented.
- Overall risk management is supervised by the corporate controlling department and is reviewed for its appropriateness and effectiveness by external auditors and by the Group's

internal audit department. Throughout the BMW Group, a network of risk managers is in place, regularly carrying out risk reviews to identify and analyse significant risks. The results of the reviews are summarised in a separate risk report which is then presented to the Board of Management.

- By regularly sharing experiences with other companies, the BMW Group ensures that innovative ideas and approaches flow into the risk management system and that operational risk management is subjected to continual improvement. At present, no risks have been identified which could threaten the existence of the Group or which could have a materially adverse impact on the net assets, financial position or results of operations of the Group. However, risks can never be entirely ruled out.

In the course of its business activities, the BMW Group is exposed to various types of risk:

### **Risks relating to the general economic environment**

- As a result of its global activities, the BMW Group is affected by global economic factors such as changes in currency parities and changes on the financial markets. The USD is particularly important for the development of group revenues and earnings and represents the main single source of risk within the BMW Group's foreign currency portfolio. Exchange rate fluctuations of the British pound and the Japanese Yen in relation to the Euro can also have a material impact on earnings. Based on group forecasts, these three currencies account for some 80 per cent. of the foreign currency exposure of the BMW Group.

The BMW Group manages currency risks at both a strategic and an operating level.

From a strategic point of view, i.e. in the medium- and long-term, the BMW Group endeavours to manage foreign exchange risks by "natural hedging", in other words by increasing the volume of purchases denominated in foreign currency or increasing the volume of local production. Currency risks are hedged in the short and medium term on the financial markets. Hedging transactions are entered into only with financial partners of first-class credit standing. The nature and scope of such measures are set out in guidelines applicable throughout the BMW Group. A cashflow-at-risk model and scenario analyses are used to measure exchange rate risks. These instruments are also used as part of the process of currency management for the purpose of taking business decisions.

- Changes in the international commodity markets also have an impact on the business development of the BMW Group. In order to safeguard the supply of production materials and to minimise the cost risk, the commodity markets relevant for the BMW Group are closely monitored. The market price trend of precious metals such as platinum, palladium and rhodium, for which appropriate hedging strategies are decided upon by the Raw Materials Committee, is also important in this context.
- Changes in the price of crude oil, which is an important basic material in the manufacture of components, have an indirect impact on production costs. As a manufacturing enterprise, the BMW Group is also affected by changes in energy prices, caused by both market factors and tax legislation.
- Cyclical economic volatility also entails an element of risk for future business development. Unforeseeable interventionist economic policies can also impair the BMW Group's performance in specific markets. The BMW Group anticipates these risks by monitoring the markets in detail and using early warning indicators. Risk is also spread due to the worldwide nature of the BMW Group's activities. At the same time, determined engagement in new markets and segments with both existing and new products creates significant opportunities for the BMW Group to strengthen its competitive position.
- An escalation of political tensions, terrorist activities or possible pandemics could have a negative impact on the economic situation, the international capital markets and hence the business development of the BMW Group.

### **Specific industry risks**

- Changes in fuel prices, which may be either market- induced or due to governmental tax policies, and the increasingly stringent requirements to reduce fleet fuel consumption as well

as CO<sub>2</sub> and NOX emissions, all continue to place high demands on the BMW Group's engine and product development.

- The statutory regulations for CO<sub>2</sub> emissions targeted by the European Commission could have a materially adverse effect on the business development of the Automobiles segment and consequently on the Group's earnings performance.

### **Operating risks**

- Risks arising from business interruption and loss of production are insured up to economically reasonable levels. The BMW Group's extremely flexible production network and working time models also help to reduce operating risks.
- Close cooperation between manufacturers and suppliers is usual in the automotive sector, and although this provides economic benefits, it also creates a certain degree of mutual dependence. Some suppliers have become very important for the production activities of the BMW Group. Delivery delays, cancellations, strikes or poor quality can lead to production stoppages and thus have a negative impact on profitability. The Group mitigates these risks by employing extensive procedures for selecting, monitoring and handling suppliers. Before selection, for example, both the technical competence and the financial strength of potential suppliers are appraised. A comprehensive Supplier Relationship Management system, which also takes account of social and ecological aspects, helps to reduce risk exposure.

### **Risks relating to the provision of financial services**

- As a consequence of the growth of lease business, the BMW Group faces an increased residual value risk on the vehicles which are returned to the Group at the end of lease contracts. Changes in the residual values of BMW Group vehicles on the used car markets are therefore constantly monitored and forecasted. The overall risk position is measured each quarter by comparing forecasted market values and contractual values according to model and market.

Provisions and write-downs on leased-out cars are recognised in the balance sheet to cover all identified risks. This risk is also reduced by measures such as active life-cycle management and management of used car markets at an international level, both of which have a stabilising effect on the residual values of BMW Group vehicles.

- Operating risks relating to the provision of financial services are managed by the BMW Group by means of a process which records and measures risks and incorporates specific measures to avoid risk. In this way, the BMW Group minimises the risk of losses which could arise as a result of inappropriate or failed internal procedures and systems, human error or external factors. This includes measures to ensure that operations can be continued at an appropriate level in the event of impairment caused by external factors.
- The BMW Group mitigates liquidity and interest rate change risks by matching maturities and employing derivative financial instruments. The liquidity situation is monitored continually by means of a rolling cash flow forecast. As part of a value-based interest rate management system, interest rate risks are measured and limited using a value-at-risk approach. The risk-return ratio is tested continuously using simulated computations. In addition, sensitivity analyses are prepared to measure the potential impact of interest rate changes on earnings.
- In order to avoid currency risks, financing and lease business is refinanced, as a general rule, in the currency of the relevant market.
- A major part of financing and lease business within the Financial Services segment is refinanced on the capital markets. As a result of its good credit standing, reflected in the long-standing first-class short-term ratings issued by Moody's (P-1) and Standard & Poor's (A-1), the BMW Group is able to obtain competitive conditions. The long-term ratings for the BMW Group published by Standard & Poor's and Moody's in September 2005 remain valid, enabling the BMW Group to obtain competitive conditions. Moody's issued an A1 rating and Standard & Poor's an A+ rating, both with stable outlook.
- Various methods and systems such as creditrating and scoring are in place to manage credit risk, partly in the light of Basle II requirements. Depending on the credit volume applied for

and the credit risk rating of the party involved, financing applications for international dealers, importers and fleet customers are presented to the local, regional or corporate credit committees for approval. A two-step credit application process helps to reduce the risk of default affecting the Group's worldwide financial services operations. This process, which is based on clear and binding credit risk rules applicable throughout the Group, also specifies the maximum amounts of unsecured credit volumes permitted ("unsecured risks"). The dual control principle applies worldwide and is rigorously implemented. In another measure to reduce risk, the BMW Group is continuously making efforts to standardise its credit decision processes and the quality of those processes on a worldwide basis, and to ensure that uniform rating systems are in place. Close contact to borrowers, a thorough knowledge of the vehicle products sold, local credit checks and on-going measurement of collateral all make a vital contribution towards avoiding losses, particularly in the case of lower rating categories. On top of this, the dynamic global credit markets will continue to supply highly flexible instruments to mitigate risk (e.g. securitisation, coverage using credit derivatives, credit syndication).

For retail customer financing purposes, the BMW Group uses validated scorecards in order to reach credit decisions more quickly and to monitor risk. Criteria such as arrears and bad debt ratios are analysed monthly and used to actively manage the credit portfolio and to improve portfolio quality.

### **Legal risks**

- The BMW Group is not involved in any court or arbitration proceedings which could have a significant impact on the economic position of the Group.
- Like all enterprises, the BMW Group is exposed to the risk of warranty claims. Adequate provisions have been recognised in the balance sheet to cover such claims. Part of the risk, especially where the American market is concerned, has been insured externally up to economically acceptable levels. The high quality of BMW Group products, additionally ensured by regular quality audits and on-going improvement measures, helps to reduce this risk. In comparison with competitors, this can give rise to benefits and opportunities for the BMW Group.
- Changes in the regulatory environment may impair the sales volume, revenues and earnings performance of the BMW Group in individual markets or economic regions.

### **Personnel risks**

- As an attractive employer, the BMW Group has found itself in a favourable position for many years in the intense competition for qualified technical and managerial staff. Employee satisfaction and a low level of employee fluctuation also help to minimise the risk of know-how drift.
- An ageing and shrinking population in Germany will have a lasting impact on the conditions prevailing in the labour, product, services and financial markets. Demographic changes will give rise to risks and opportunities which enterprises will be increasingly faced with in coming years. The BMW Group carefully reviews the effects of demographic change on operations, focusing in particular on the following issues:
  - the creation of a working environment for the future
  - promotion and maintenance of the workforce's ability to perform with the appropriate set of skills
  - training
  - increasing employees' awareness of their responsibility to make personal provisions for their future
  - individual employee working life-time models.
- The BMW Group's pension obligations to its employees resulting from defined benefit plans are measured on the basis of actuarial reports. In accordance with IAS 19, future pension payments are discounted by reference to market yields on high quality corporate bonds.

These yields are subject to market fluctuation and influence the level of pension obligations. Furthermore, changes in other factors, such as longer life expectancies, can also have an impact on pension obligations.

In the United Kingdom, the USA and a number of other countries, funds intended to cover pension entitlements are held separately from corporate assets and are mainly invested in fixed-income securities with a high level of creditworthiness, and in equities. In Germany, by contrast, the funds remain part of the enterprise's assets.

### **Information and IT risks**

The BMW Group protects data, business secrets and innovative developments against unauthorized access, damage and misuse using security measures appropriate to the risk involved. These measures encompass manual, process design and IT controls.

Group directives are in place requiring employees to handle information appropriately and ensure that information systems are properly used. Targeted communication measures increase employees' awareness of security requirements.

The protection of information and data is an integral component of business processes and is achieved within the BMW Group by applying international security standards. Together with the related IT infrastructure, the Group's core process "Product development" has been audited and certified to international security standard (ISO 27001/17799).

Certification had already been received back in 2003 and was again achieved in 2006.

The technical data protection procedures used by the BMW Group include process-specific security measures as well as standard activities such as virus scanners, firewall systems and access controls at operating system and application level.

Protecting BMW Group-specific know-how is also treated as a major issue as far as cooperation arrangements and relationships with partner companies are concerned. The BMW Group protects its intellectual property by ensuring that the relevant departments have clear instructions regarding data protection and the use of information technology. Information underlying key areas of expertise is especially protected. In addition, staff members working in IT functions are increasingly receiving specific training in the area of data protection.

The BMW Group sold 337,354 BMW, MINI and Rolls-Royce automobiles in North America in 2006, 2.6 per cent. above the previous year's figure. 313,921 vehicles were sold in the USA, the BMW Group's largest single market, representing an increase of 2.1 per cent. compared to the previous year.

In Europe, where a sales volume of 816,829 units was recorded, the BMW Group sold 1.7 per cent. more cars than in 2005. In the two largest markets in Europe (Germany and the United Kingdom), model life-cycle factors relating to the BMW brand and restricted availability of the MINI both had a major impact on sales volumes. In Germany, the sales volume recorded by the BMW Group fell by 2.8 per cent. to 287,715 units. In the United Kingdom, it edged down by 1.4 per cent. to 154,069 units. The number of cars sold on the remaining major European markets either remained at, or surpassed, the previous year's level. In Italy, the BMW Group sold 96,462 units, 6.8 per cent. more than in the previous year. The total number of cars sold in Spain (63,043 units), increased by 12.6 per cent. At 52,884 units, the sales volume in France remained at a similar level to the previous year (–0.1 per cent.).

The BMW Group achieved its highest growth rates in 2006 on the Asian markets. With 142,084 vehicles sold, the total sales volume was 13.0 per cent. higher than one year earlier. In Japan, the BMW Group's largest single market in Asia, the increase was 5.6 per cent., with 62,115 units handed over to customers. The Chinese markets (China, Hong Kong, Taiwan) recorded the highest growth rate. 44,766 units were sold here, up by 35.4 per cent. against the previous year's figure.

In 2006, the key motorcycles markets for the BMW Group were as follows:

| BMW Group – key motorcycle markets 2006 | Percentage of total sales volume |
|---|----------------------------------|
| Germany .....                           | 23.6                             |

The BMW Group sold 100,064 motorcycles in 2006 which represents an increase of 2.7 per cent. compared to 2005.

As in previous years, the BMW Group's motorcycle business reflects diverging market developments.

In Europe, sales of BMW motorcycles totalled 73,850 units, a 2.7 per cent. increase over the previous year. Within this total, increased sales volumes were registered in particular for the markets of Southern Europe. A sharp increase was registered in Spain, where, with 10,002 motorcycles sold in 2006, the BMW Group achieved a new sales volume record, surpassing the previous year's figure by 25.0 per cent. 13,651 motorcycles were sold in Italy, 7.5 per cent. more than one year earlier. Sales volumes in Greece (1,338 units, +10.2 per cent.) and Portugal (535 units, + 32.1 per cent.) developed positively, even though each of these markets contracted as a whole.

By and large, the sales volume recorded for the remaining European countries failed to reach the previous year's level. With a sales volume of 23,617 units, the BMW Group sold 1.9 per cent. fewer motorcycles in Germany than in the previous year, even though some products were purchased during the final months of 2006 to avoid the forthcoming increase in value added tax. With a market share of 18.5 per cent., the BMW Group was nevertheless able to defend its position as market leader in Germany, where the market has now been in decline for seven consecutive years. In France, the sales volume of 7,701 units meant that 2.5 per cent. fewer customers took delivery of motorcycles than in the previous year. In the United Kingdom, where the number of motorcycles sold decreased by 3.9 per cent.\* to 5,213 units, the performance should be seen against the background of an overall contracting market.

In the USA, the Motorcycles segment was able to repeat its previous year's performance. With 12,825 units sold, the sales volume here was marginally higher than in the previous year (+ 0.2 per cent.). Overall, the American motorcycles market developed positively in 2006. However, the Cruiser and Supersport segments, in which the BMW Group is not currently represented, showed the best performance. The increase in the number of BMW motorcycles sold in Central and South America was very encouraging; the sales volume for these markets was 2,740 units, up by 24.7 per cent. on the previous year.

In Japan, the BMW Group recorded sales volume growth in 2006 following three years of declining figures. 2,644 BMW motorcycles were sold there, 10.1 per cent. more than in the previous year.

The sale of BMW motorcycles also developed positively in South Africa, with 21.4 per cent. more units sold than one year earlier (2,682 units).

\*Previous year's figure adjusted: 5,425 units (excluding Ireland)

### Earnings Performance

The BMW Group recorded a net profit of Euro 2,874 million (2005: Euro 2,239 million) for the financial year 2006. The post-tax return on sales was 5.9 per cent. (2005: 4.8 per cent.). The Group therefore generated earnings per share of common stock of euro 4.38 and earnings per share of preferred stock of Euro 4.40.

Group revenues rose by 5.0 per cent. compared to the previous year. Adjusted for exchange rate factors, Group revenues would have increased by 5.5 per cent. or Euro 2,574 million. Revenues from the sale of BMW, MINI and Rolls-Royce brand cars went up by 1.9 per cent. Revenues from motorcycles business grew by 3.1 per cent. Revenues from financial services business climbed by 19.0 per cent. due to higher business volumes. Revenues from other activities of the Group totalled euro 193 million and related mainly to the softlab Group. The comparable figure for the previous year was euro 119 million.

Revenue trends varied from region to region. Whereas Group revenues decreased in Germany by 3.6 per cent., they increased in the rest of Europe by 6.8 per cent. Revenues generated in the Americas region rose by 6.7 per cent. For the Africa, Asia and Oceania regions, they grew in total by 11.6 per cent., mainly on the back of marked sales volumes increases in specific Asian markets.

Group cost of sales increased at a slightly lower rate than revenues. The impact of additional costs anticipated by the BMW Group since the beginning of 2006 – namely the effect of unfavourable exchange rates and higher raw material prices – were offset by efficiency improvements and an improved product mix. Despite the adverse factors stated above, gross profit increased in absolute terms by 6.3 per cent., giving a gross profit percentage of 23.1 per

cent. (2005: 22.9 per cent.). The gross profit percentage for both Industrial operations and Financial operations was 0.6 percentage points lower than in the previous year.

Sales and administrative costs increased by 4.4 per cent. due to the higher business volume; the increase was, however, lower than the increase in revenues. They represented 10.1 per cent. of revenues, 0.1 percentage points lower on a year-to-year comparison.

Research and development costs were 3.2 per cent. higher than in 2005, and represented 5.2 per cent. of revenues (2005: 5.3 per cent.). Research and development costs include amortisation of capitalised development costs amounting to Euro 872 million (2005: Euro 745 million). Total research and development costs amounted to Euro 3,208 million (2005: Euro 3,115 million). This figure comprises research costs, development costs not recognised as assets and capitalised development costs. The research and development expenditure ratio for 2006 was 6.5 per cent. (2005: 6.7 per cent.).

Depreciation and amortisation of property, plant and equipment and intangible assets included in cost of sales, sales and administrative costs and research and development costs totalled Euro 3,272 million (2005: Euro 3,025 million).

The positive net amount from other operating income and expenses went down by 36.1 per cent. compared to the previous year. Other operating income decreased primarily as a result of lower income from the reversal of provisions. In the previous year, a provision relating to the Rover disengagement had been reversed. Other operating expenses increased by Euro 28 million or 5.7 per cent.

The profit before financial result was up by Euro 257 million or 6.8 per cent. against the previous year, therefore reaching a new high level.

The financial result improved by Euro 580 million. This includes the one-off gain of Euro 386 million arising on the partial settlement of the exchangeable bond on Rolls-Royce plc, London shares. This gain is reported mostly in "Sundry other financial result" and the remainder in "Net interest result". A fair value loss of Euro 14 million was recognised on the remaining exchangeable bond option obligation relating to the BMW Group's investment in Rolls-Royce plc, London, and is also included in the line item "Sundry other financial result". In the previous year, fair value measurement had resulted in a loss of Euro 356 million.

Fair value losses on other derivative financial instruments had a negative impact on "Sundry other financial result". The net result from using the equity method decreased by Euro 39 million, primarily as a result of an impairment loss recognised on TRITEC Motors Ltda., Campo Largo. The net positive result from investments was up by Euro 4 million. Net interest expense decreased by Euro 41 million. The net negative amount resulting from unwinding the discounting on pension obligations and recognising income for the expected return on pension plan assets decreased by 6.5 per cent. on a year-on-year basis.

In the light of the financial result performance described above, the group profit before tax improved by 25.5 per cent. compared to the previous year.

The pre-tax return on sales was 8.4 per cent. (2005: 7.0 per cent.). Excluding the impact of the gain arising on the partial settlement of the exchangeable bond on shares in Rolls-Royce plc, London, and the fair market loss arising on the option obligation, the profit before tax improved by 3.0 per cent. to Euro 3,752 million.

The Group net profit was up by Euro 635 million or 28.4 per cent. against the previous year. The marginally lower effective tax rate was attributable to the fact that the gain recognised on the partial settlement of the exchangeable bond on shares in Rolls-Royce plc, London, was tax-exempt. In accordance with the provisions of § 37 (5) of the German Corporation Tax Act, tax reimbursement receivables of Euro 123 million have been recognised as an asset on the basis of their present value.

The Automobiles segment recorded a 3.5 per cent. increase in sales volume and a 4.2 per cent. increase in revenues, with product mix shifts having a positive impact on revenues. Segment profit increased by only 1.2 per cent. to Euro 3,012 million due to the effect of adverse external factors.

Motorcycles segment revenues increased by 3.4 per cent., whilst segment profit improved by 10.0 per cent. Efficiency improvement programmes in particular contributed to improved profitability in this segment.

## **Asset position**

### **Change in presentation of the Group balance sheet**

#### **Net assets position**

The group balance sheet total increased by Euro 4,491 million or 6.0 per cent. to Euro 79,057 million. Currency effects, largely attributable to a weaker US dollar, held down the increase in the balance sheet total in 2006. Adjusted for changes in exchange rates, the balance sheet total would have increased by 10.0 per cent. or Euro 7,162 million. The main factors behind the increase on the assets side were the increased level of leased products (+19.9 per cent.), financial assets (+19.8 per cent.), intangible assets (+15.7 per cent.) and receivables from sales financing (+4.5 per cent.). On the equity and liabilities side of the balance sheet, the main increases related to equity (+12.7 per cent.) and financial liabilities (+5.2 per cent.).

Intangible assets increased by 15.7 per cent. to Euro 5,312 million. Within intangible assets, capitalised development costs went up by 16.0 per cent. to Euro 4,810 million. Development costs recognised as assets during the year under report amounted to Euro 1,536 million (+10.0 per cent.), equivalent to a capitalisation ratio of 47.9 per cent. (2005: 44.8 per cent.). As in the previous year, increased capitalised development costs resulted from the higher number of projects in the series development phase. Amortisation on intangible assets totalled Euro 872 million (+17.0 per cent.).

The carrying amount of property, plant and equipment increased by 1.8 per cent. to Euro 11,285 million. The bulk of capital expenditure related to further expansion of the worldwide production and sales networks. Capital expenditure on property, plant and equipment was Euro 2,656 million, 10.3 per cent. more than in the previous year. Important areas of capital expenditure included expansion of the Oxford and Spartanburg plants. Depreciation on property, plant and equipment totalled Euro 2,313 million (+4.6 per cent.).

Balances brought forward for subsidiaries being consolidated for the first time amounted to Euro 22 million. Capital expenditure on intangible assets and property, plant and equipment totalled Euro 4,313 million (+8.0 per cent.), which, as in the previous year, was financed fully out of cash flow. Capital expenditure as a percentage of revenues was 8.8 per cent. (2005: 8.6 per cent.).

As a result of the growth of business, the total carrying amount of leased products increased sharply by 19.9 per cent. to Euro 13,642 million. Adjusted for changes in exchange rates, leased products would have risen by 29.9 per cent.

The carrying amount of other investments decreased by 66.0 per cent. to Euro 401 million, mainly as a result of the partial settlement of the exchangeable bond on shares in Rolls-Royce plc, London. The market value of the remaining investment is now Euro 99 million above its historical cost. Fair value gains or losses on the shares are recognised directly in other accumulated equity.

Receivables from sales financing were up by 4.5 per cent. to Euro 30,368 million due to the higher business volume. Of this amount, customer and dealer financing accounted for Euro 23,038 million (+3.3 per cent.) and finance leases accounted for Euro 7,330 million (+8.6 per cent.).

Inventories increased by Euro 267 million (+4.1 per cent.) to Euro 6,794 million, mainly as a result of the inclusion of new sales companies in the group reporting entity. Trade receivables went up by 5.8 per cent. compared to 31 December 2005.

Financial assets increased by 19.8 per cent. to Euro 3,950 million, mainly as a result of higher fair values of derivative financial instruments.

Liquid funds fell by 8.8 per cent. to Euro 3,370 million. Whereas marketable securities were roughly at the previous year's level, cash and cash equivalents decreased by Euro 285 million compared to one year earlier.

On the equity and liabilities side of the balance sheet, equity grew by 12.7 per cent. to Euro 19,130 million. The profit for the year attributable to shareholders of BMW AG increased equity by Euro 2,868 million. Fair value changes recognised directly in other accumulated equity reduced equity by Euro 43 million (2005: reduction of Euro 875 million). This was the result of translation differences and the fair value measurement of financial instruments and available-for-sale securities. In addition, the increase in discount factors applied in Germany and the United Kingdom in 2006 gave rise to actuarial gains totalling Euro 515 million. In the previous year, actuarial losses of Euro 736 million had been recognised as a result of lower interest rates. The

dividend payment for the financial year 2005 and the buy-back of shares in the first quarter 2006 reduced equity by a further Euro 672 million. Minority interest amounted to Euro 4 million. Overall, the equity ratio of the BMW Group improved by 1.4 percentage points to 24.2 per cent.

The equity ratio for Industrial operations was 40.6 per cent. compared to 39.1 per cent. at the end of the previous year. The equity ratio for Financial operations remained at 10.4 per cent.

The amount recognised in the balance sheet for pension obligations decreased by 4.5 per cent. to Euro 5,017 million. Following the change in accounting policy for pension obligations in the previous year, the amount reported under pension provisions corresponds to the full defined benefit obligation (DBO).

In the case of pension plans with fund assets, the fair value of fund assets is offset against the defined benefit obligation. The decrease in pension obligations was attributable principally to the fact that higher discount factors were applied in Germany and the United Kingdom.

Other provisions decreased by 6.3 per cent. to Euro 5,536 million, mainly due to lower obligations for on-going operational expenses. The main factor here was the reduction in warranty provisions. Provisions for other obligations were also lower. By contrast, personnel-related obligations increased by Euro 138 million.

Deferred tax liabilities increased by 9.4 per cent. to Euro 2,758 million, primarily as a result of the higher level of capitalised development costs.

Financial liabilities increased by 5.2 per cent. to Euro 36,456 million. Within financial liabilities, bonds increased by 8.3 per cent. to Euro 16,420 million, mainly as a result of the higher volume of the medium term note programme. Liabilities to banks and obligations under asset-backed financing transactions were also up, whereas liabilities from customer deposits (banking) were down by 9.6 per cent.

Trade payables amounted to Euro 3,737 million and were thus 5.4 per cent. higher than one year earlier.

Other liabilities totalling Euro 5,856 million were up by 11.8 per cent. This was mainly attributable to the increase in other taxes and in deferred income relating to service and repair agreements.

## Financial position

The group cash flow statement shows the sources and applications of cash flows for the financial years 2006 and 2005, classified into cash flows from operating, investing and financing activities.

Cash flows from operating activities are determined indirectly starting with the group net profit. By contrast, cash flows from investing and financial activities are based on actual payments and receipts. Cash and cash equivalents in the cash flow statement correspond to the amount disclosed in the balance sheet.

Operating activities of the BMW Group generated a positive cash flow of Euro 9,980 million in 2006, down by Euro 711 million or 6.7 per cent. compared to one year earlier. Changes in net current assets during 2006 resulted in a net cash outflow of Euro 49 million (2005: net inflow of Euro 923 million). The net cash outflow was due to the higher level of inventories.

The cash outflow for investing activities amounted to Euro 13,670 million and was therefore Euro 1,707 million higher than in 2005. The marked increase in cash outflow for investing activities was due, on the one hand, to increased capital expenditure in 2006 and, on the other, to the receipt, in 2005, of the final sales price instalment of Euro 1,000 million from the sale of Land Rover. Capital expenditure on intangible assets and property, plant and equipment resulted in the cash outflow for investing activities increasing by Euro 438 million compared to the previous year. The cash outflow for net investments in financial services activities also rose steeply and was Euro 505 million higher than in the previous year.

Financing activities in 2006 generated a positive cash flow of Euro 3,323 million (2005: Euro 699 million). Cash inflows from the issue of bonds totalled Euro 6,876 million (2005: Euro 5,819 million), whilst cash outflows to repay bonds totalled Euro 4,491 million (2005: Euro 3,432 million). The dividend payment made during the financial year 2006 was Euro 419 million. The share buy-back programme involved a cash outflow in 2006 of Euro 253 million.

73.0 per cent. (2005: 89.4 per cent.) of the cash outflow for investing activities was covered by the cash inflow from operating activities.

The cash flow statement for Industrial operations shows that the cash inflow from operating activities exceeded the cash outflow for investing activities by 21.6 per cent. (2005: 150.7 per cent.). By contrast, the cash flow statement for Financial operations shows that, due to the high level of capital expenditure on leased products and receivables from sales financing, the cash inflow from operating activities did not cover the cash outflow for investing activities. The short fall was 50.2 per cent. (2005: 52.5 per cent.).

After adjustment for the effects of exchangerate fluctuations and changes in the composition of the BMW Group which resulted in a positive amount of Euro 82 million (2005: Euro 66 million), the various cash flows resulted in a decrease in cash and cash equivalents of Euro 285 million (2005: decrease of Euro 507 million).

Net interest-bearing assets relating to Industrial operations (including receivables from the financial operations sub-group) amounted to Euro 5,385 million at 31 December 2006, an increase of Euro 508 million compared to one year earlier. Net interestbearing assets relating to Industrial operations comprise cash and cash equivalents (Euro 1,235 million), marketable securities relating to Industrial operations (Euro 1,993 million) and receivables from Financial operations (Euro 4,276 million) less financial liabilities relating to Industrial operations. Excluding interest and currency derivatives, the latter amounted to Euro 2,119 million.
