## INTRA Reference Data Characteristics

The objective of this specification is to establish the means of communication to receive the reference data sent by the Mexican Stock Exchange (BMV).

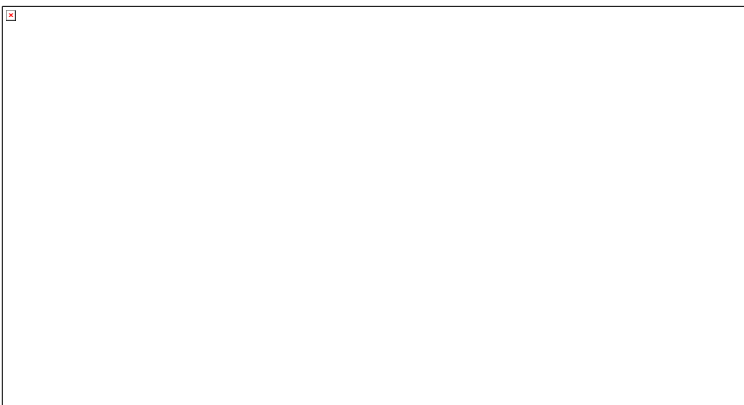

Two operations are necessary for the adequate communication between the BMV and the clients, an operation that sends the information from the BMV and another operation that serves as a mechanism for retrieving messages in case of information losses.

- [Transmission Service](#)
- [Retransmission Service](#)

### Transmission Service

The implementation of the REST architecture (Transfer of representational status) for the communication between the BMV and the clients has been taken as a basis. The diagram shows the operation of sending reference data of the BMV to customers through HTTP Post.

Clients need to expose a REST service that is capable of receiving the information sent by the BMV.

### Information Transmitted

The information that will be transmitted is the following:

- Reference Data: Will be sent as new information is generated.
- HeartBeat: Will be sent every 2 seconds in order to indicate normal operation or synchronize the current sequence.

### Authentication

In addition to the security implemented at the infrastructure level between the BMV and the clients, it has been considered to implement the authentication of the service through two parameters (userid and password), the client will decide whether or not to validate said credentials and if the latter is notified, timely to the BMV and sent the credentials required to integrate them when sending the reference data.

## Definition of services

### RD01 - Reception of Reference Data

- **HTTP Method:** POST
- **HTTP Schema:** HTTP
- **HTTP PATH:** /v1/referenceData/receive

#### Parameters

Name	Parameter Type	Content Type	Required?	Description
userid	query	string	Yes	The username assigned by the BMV to authenticate
password	query	string	Yes	md5 digest of the assigned password
referenceData	payload	application/json	Yes	Array of data that includes one or more reference data records. The structure is shown in the table: "Data model of the referenceData parameter".

#### Data model of the referenceData parameter

Name	Data Type	Lenght	Description
refDataId	integer	int64	Sequence number of this record
refDataType	string	2	Type of reference data
refData	string	300	Reference data string. In case a heartbeat is sent this string will be empty

#### Responses

Code	Description
200	Successful operation
400	Invalid request, missing or invalid parameters
401	Unauthorized, authorization information is not found or is not valid
500	Unexpected error, internal error

## Examples

Url: <http://10.10.10.10:1234/v1/referenceData/receive>

	Correct Request	Invalid Password	referenceData missing
userid	bmv	bmv	bmv
password	c893bad68927b457dbed39460e6afd62	dummy	c893bad68927b457dbed39460e6afd62
referenceData	[ { "refDataId": 1, " refDataType": "Zx", "refData": "2018XXXXXXXXXX" } ]	[ { "refDataId": 1, " refDataType": "Zx", "refData": "2018XXXXXXXXXX" }, { "refDataId": 2, " refDataType": "Zx", "refData": "2018XXXXXXXXXY" } ]	
Response Code	200	400	400
Response Description	Successful Operation	Invalid request, missing or invalid parameters	Invalid request, missing or invalid parameters

## RD02 - HeartBeat Reception Reference Data

- **HTTP Method:** POST
- **HTTP Schema:** HTTP
- **HTTP PATH:** /v1/referenceData/heartbeat

Heartbeat reception. This operation is used by the BMV every two seconds to send the last refDataId / sequence associated to the operation "RD01 - Reception of Reference Data".

### Parameters

Name	Parameter Type	Content Type	Required?	Description
userid	query	string	Yes	The username assigned by the BMV to authenticate
password	query	string	Yes	md5 digest of the assigned password
refDataId	query	integer (int64)	Yes	Last refDataId / sequence generated in the operation "RD01 - Reception of Reference Data".

### Responses

Code	Description
200	Successful operation
400	Invalid request, missing or invalid parameters
401	Unauthorized, authorization information is not found or is not valid
500	Unexpected error, internal error

Url: <http://10.10.10.10:1234/v1/referenceData/heartbeat>

	Correct Request	Invalid password	refDataId missing
userid	bmv	bmv	bmv
password	c893bad68927b457dbed39460e6afd62	dummy	c893bad68927b457dbed39460e6afd62
refDataId	10	5	
Response Code	200	400	400
Response Description	Successful operation	Invalid request, missing or invalid parameters	Invalid request, missing or invalid parameters

## Servers and Sample Clients

A client and an example server have been generated in Java language, this code is free and can be found in: <https://github.com/bmv-api/recepcionReferenceData>

### Retransmission Service

The implementation of the REST architecture (Transfer of representational status) for the communication between the BMV and the clients has been taken as a basis. Figure 1 shows the operation of requests for retransmission of customer reference data to the BMV using HTTP Post.

The BMV must exhibit a REST service that is capable of responding to requests for data retransmission by customers.

## Information Transmitted

**Reference Data:** The information that will be retransmitted is the following:

- Reference Data: Information that has been stopped from receiving for various reasons, for example start reception late, transmission error, etc.

## Authentication

In addition to the security implemented at the infrastructure level between the BMV and the clients, it has been considered to implement the authentication of the service through two parameters (userid and password).

## Definition of services

### RD01 - Retransmission of Reference Data

- **HTTP Method:** GET
- **HTTP Schema:** HTTP
- **HTTP PATH:** /v1/referenceData/retransmit

## Parameters

Name	Parameter Type	Content Type	Required?	Description
userid	query	string	Yes	The username assigned to the Client to authenticate
password	query	string	Yes	md5 digest of the assigned password
startId	query	integer (int64)	Yes	Id / Initial Sequence (inclusive) of the retransmission data request.
endId	query	integer (int64)	Yes	Id / Final (inclusive) sequence of the retransmission data request.

## Responses

Code	Description
200	Successful operation includes as response an object of content type application / json data array that includes one or more records of reference data. The structure is shown in the following table: "Data model of the referenceData parameter".
401	Unauthorized, authorization information is not found or is not valid
402	Invalid startId. Verify if the value is greater than endId or is a valid number
403	endId invalid. Verify if the value is less than startId or is a valid number
404	Invalid range startId and endId are not valid numbers
405	The range includes non-existent elements
500	Unexpected error, internal error.

## Data model of the referenceData parameter

Name	Data Type	Lenght	Description
refDataId	integer	int64	Sequence number of this record
refDataType	string	2	Type of reference data
refData	string	300	Reference data string. In case a heartbeat is sent this string will be empty

## Examples

Url: <http://10.10.10.10:1234/v1/referenceData/receive>

userid	bmv	bmv	bmv
password	c893bad68927b457dbed39460e6afd62	dummy	c893bad68927b457dbed39460e6afd62
startId	1	1	4
endId	2	2	2
Response Code	200	400	402
Response	[ { "refDataId": 1, " refDataType": "Zx", "refData": "2018XXXXXXXXXY" }, { "refDataId": 2, " refDataType": "Zx", "refData": "2018XXXXXXXXXX" } ]	Without response. Invalid request, missing or invalid parameters	Without response. startId invalid

## Servers and Sample Clients

A client and an example server have been generated in Java language, this code is free and can be found in:

With Offer	conOferta	Num	1	Yes	1 – Con Oferta 1 - With Offer
Additional Titles	titulosAdicionales	Num	1	Yes	1 – Son títulos adicionales 1 – They are additional titles
Message ID	id	Alpha	3	Yes	PRE – Preliminary Message sent upon receipt of the Public Offer or Listing Notice DEF – Definitive Message sent in the Authorization by Issuers of the Public Offer or Listing
Company Name	razonSocialEmisora	Alpha	200	Yes	Company Name of the Issuer
Value Type	tipoValor	Alpha	2	Yes	Only considering
Quote	claveCotizacion	Alpha	7	Yes	Issuer Quote
Placement Issuer Quote	claveEmisoraColocadora	Alpha	7	No	It will only be mandatory for Warrant Value Types
Sector	sector	Num	2	No	Sector ID
Subsector	subsector	Num	2	No	Subsector ID
Branch	ramo	Num	2	No	Branch ID
Sub-Branch	subramo	Num	2	No	Sub-Branch ID
Common Representative	representanteComun	Alpha	200	No	Company Name of the Common Representative. Only mandatory for Types of Value of Obligations, REIT, Tracs, CKD or Warrants
Promoter	promovente	Alpha	200	No	Company Name of the Sponsor or responsible for the SIC procedure.
Country	codigoPaisOrigen	Alpha	2	No	Code corresponding to the Country of Origin according to the ISO 3166 Alpha-2. It will only be mandatory for SIC Value Types

Main Listing Market	codigoMercadoCotizacion	Alpha	4	No	Code corresponding to the Main Listing Market according to the ISO 3166 Alpha-2. It will only be mandatory for SIC Value Type
Yield Rate	tasaRendimiento	Num	2.2	No	
Issue Currency	codigoMonedaEmision	Alpha	3	No	Issue Currency according to the ISO 4217 Alphabetic Code. For the SIC Equities, a blank space will be sent.
Nominal Value	valorNominal	Num	9.3	No	It will only be mandatory for the Types of Value of REIT, CKD or Obligations
Issuance Term	plazoEmision	Num	6	No	
Date of Issue	fechaEmision	Date	10	No	Date in "dd/mm/yyyy" format
	fechaVencimiento	Date	10	No	Date in "dd/mm/yyyy" format. It will only be mandatory for CKD, Obligations and Warrants
Issue Prime	prima	Num	6.6	No	
Exercise Type	tipoEjercicio	Alpha	50	No	Description of the type of exercise of the Warrant
Strike Price	precioEjercicio	Alpha	6.6	No	Only mandatory for Warrants
Settlement Type	tipoLiquidacion	Alpha	50	No	Description of the type of settlement of the Warrant
Warrant Type	tipoWarrant	Alpha	50	No	Description of the type of Warrant. It will be mandatory of Warrants
Listing Date	fechaListado	Date	10	Yes	Date in "dd/mm/yyyy" format
Offer Series	series	Array	De 1 a N Elementos	Yes	Subarray with the objects that represent the series of the Offer or Listing within the JSON, it must contain at least one element

#### Offer Series

Element	Key	Datatype	Max Length	Required	Notes
Serie key	claveSerie	Alpha	5	Yes	
ISIN	isin	Alpha	12	Yes	ISIN code assigned to the series. In the case of SIC Equities, the information received in the Listing notice will be sent.
Listed	cotiza	Num	1	Yes	0 – Not Listed 1 – Listed
Valid Coupon	cuponVigente	Num	4		
Titles in Circulation	titulosCirculacion	Num	15	Yes**	
Placement Price	precioColocacion	Num	6.6	Yes**	
Placement Data	datosColocacion	Array	De 0 A M Elementos	No	Subarray with the Objects that represent each operation for the Exchange by Brokerage House and Type of Registry, it may not contain elements. It will only be mandatory for Offers.

#### Placement data

Element	Key	Datatype	Max Length	Required	Notes
Brokerage House	casaBolsa	Alpha	5	Yes**	Short code of the Brokerage House
Type of Register	tipoRegistro	Alpha	2	Yes**	OP – Public Offer SA – Over-allotment SR – Reciprocal Subscription OC – Purchase Offer
Offer Amount	montoOferta	Num	15.2	Yes**	Result of multiplying the Number of Securities in the Offer by the Placement Price
Offer Titles	titulosOferta	Num	13	Yes**
